<i>List of figures</i>	x
<i>List of tables</i>	xi
<i>Preface</i>	xii
<i>Acknowledgments</i>	xv
<i>List of abbreviations</i>	xvi
1 Spatial mobility, automation, and autonomy	1
1.1 Book objectives and scope	2
1.2 Spatial mobility	4
1.3 Automation and mobility	8
1.4 Autonomous mobility operations	13
1.5 Automation, autonomous machines, and utopia	14
1.6 Automated spatial mobility	15
1.7 Conclusion	21
2 Automated and autonomous self-moving/mobility	23
2.1 Human movement automaticity	24
2.2 Personal autonomy in mobility	25
2.3 Levels of personal autonomy by mobility modes and technologies	29
2.4 Relationships between human movement automaticity and personal autonomy	32
2.5 Car driving: movement automaticity, automatic transmission, and autonomous navigation	33
2.6 Conclusion	38
3 Automated and autonomous traffic control	40
3.1 Road traffic control	41
3.2 Train traffic control	46
3.3 Air traffic control	51
3.4 Marine traffic control	55
3.5 Comparing mobility modes by automation and autonomy in traffic control	58
3.6 Conclusion	61

4	Automated and autonomous public transportation	65
4.1	Automated and autonomous rapid transit systems	66
4.2	Trolleybuses	71
4.3	Automated and autonomous trains	72
4.4	Autopilots for airplanes	73
4.5	Autopilots for ships	75
4.6	Passenger reservation interfaces	77
4.7	Conclusion	78
5	Automated and autonomous information transmission	81
5.1	Automated and autonomous operations of fixed-line telephone systems	82
5.2	Automated and autonomous operations of mobile telephone systems	86
5.3	Automated and autonomous operations of the Internet	89
5.4	Automated communications means and being: co-presence	94
5.5	Automated communications means and doing: online activity	99
5.6	Conclusion	102
6	Autonomous vehicles	105
6.1	The development of car automation towards the introduction of AVs	106
6.2	Prospects and pitfalls for AV adoption	114
6.3	Autonomous buses	121
6.4	Automated and autonomous freight vehicles and drones	123
6.5	Interpretations of AV adoption as personal mobility and as personal autonomy	125
6.6	Historical interpretations for the introduction of AVs	126
6.7	Implications of AV adoption for individuals	130
6.8	Societal implications of AV adoption	133
6.9	New sense of automobility?	134
6.10	Conclusion	136
7	The geography of intelligent transport and communications	139
7.1	The autonomously mobile city	141
7.2	Implications of AVs for urban areas	145
7.3	Recreational and touristic dimensions of AV adoption	148
7.4	Environmental effects of AV adoption	149
7.5	Conclusion	149

8	Summary and conclusion	151
8.1	Chapter summaries	152
8.2	The status of automated and autonomous operations in spatial mobilities	165
8.3	Levels of automation and autonomous operation for spatial mobility	167
8.4	The development and implementation of automation processes for spatial mobilities	168
8.5	The future society of automated mobility	170
8.6	Continued study	171
