England 87–90, 98–104
environmental audit 7, 32
environmental damages 2, 4, 5, 7–8, 10, 79
environmental databases 92–3
environmental disclosures 50
environmental motivation of innovators 3–5, 17, 73, 154
environmental performance of innovations 3–5, 14, 17, 27–8, 31–4, 41, 51, 73–5, 154
environmental policy
  cycle see Krozer’s model
  effectiveness 18, 29, 78, 154
  enforcement 31
  instruments 27–8
  stringency 29–32, 78
environmental preservation 1, 4, 13, 17, 33, 101
environmental protection expenditures 90–91
environmental regulation see environmental policy
environmental reputation 49–51, 78, 107–8, 126–8, 156
environmentalism 29
equilibrium 13, 17
equity 42–9, 57, 89, 104, 125–6
evolutionism 13–14, 17–18
expectations
in investments 49, 46–7
of niche actors 80, 84, 129, 130, 134–5, 140–42, 155
externalities 11–12, 26, 154
financial architecture 55–6, 87–8, 90, 95, 104
financial constraints
definition 44
determinants 51–3
multi-level perspective and 81–2
past empirical evidence 46–9
financial intermediaries 40–42, 53–4, 59–60, 64, 89, 108
financial markets 40–43, 53–7, 59, 64, 108
financial system
bank-based 54–6, 63
bank-centred 56, 87–8, 104
in Italy 56, 87–91
in the UK 56–7, 63, 87–91
market-based 54–6, 63–4, 87–8
fossil-based regime see unsustainable regime
funding options 40–42
funds shortage 44, 53, 81
green capabilities 31, 35
green finance 40–42, 154
green investments 40–41
green stocks 51
greenhouse gases 1, 4, 8
greening of innovation systems 15–17
hierarchy of finance 42, 46–9
household savings 55
incremental innovations 8–9, 13, 28, 35, 62, 72–6, 79, 82, 89–90, 125
incumbent technologies 18, 27, 78
insider-dominated systems 57, 59
institutional actors 121, 140–41, 155
institutional innovations 8, 77
integrated technologies 5–6, 28
inventions 8, 92–4
investment decisions 42–51
Italy 87–90, 98–104
Krozer’s model 29–32, 79–80
Kuznets curve 9–10
learning of niche actors 71, 80, 129, 134
legal framework
civil law 62–3, 64, 88, 90
common law 62–4, 88, 90
lemons market 42–6
lenders 44, 54, 57, 60
liabilities 40, 50, 53–4
liberal market economies 61–2, 64, 90
lock-in failures 15
manufacturing sector 90–91, 97–108
market failures 11–12, 15, 17–19, 26, 78
market imperfections 42
marketing innovations 5, 100
maturation period 31, 79
Modigliani-Miller theorem 42–4
monopolistic markets 32
moral hazard 59–60
multi-level perspective 70–72
macro-level see socio-technical landscape
meso-level see socio-technical regime
micro-level see technological niche
national system of innovations 53
neoclassicism 9, 11–13, 17–18, 25–6
networking 130, 141–2, 155
niche readiness 84, 130, 134–5, 141, 154
non-excludable goods 26
non-rival goods 26
non-technological eco-innovations 5, 7–8, 17, 92
organisational innovations 5, 7, 18–19, 73–5, 79, 82, 84, 90–94, 100, 125, 154
outsider-dominated systems 57, 59
paradigmatic shift 75
patents 78, 92–3
