Acknowledgements

This book is a collective effort. Thanks to the many people involved in its production. They include: Matt Pittman and the staff at Edward Elgar; the UK Economic and Physical Sciences Research Council (EPSRC) and Economic and Social Research Council (ESRC) for the research funding for the infrastructure BUiness models, valuation and Innovation for Local Delivery (iBUILD) research centre (Grant Ref No. EP/K012398/1) and the iBUILD research team, especially Catherine Bale, Chris Bouch, Andy Brown, John Bryson, David Dawson, Richard Dawson, Stephanie Glendinning, Steve Hall, Jane Gibbon, Oliver Heidrich, Eleni Iacovidou, Niall Kerr, Duncan Lindo, Mark Powell, Phil Purnell, Katy Roelich, Chris Rogers, Claire Walsh, and Richard Whittle; the iBUILD Expert Advisory Board members Seema Alim, Ben Fine, Geoff Hewings, Becky Loo, Peter McDermott, Phil O’Neill, Tom O’Rourke, David Penhallurick, Richard Ploszek, Tom Theis and Chris Zevenbergen; the three anonymous reviewers and Al James for engagement with and comments on the book proposal; Brett Christophers, Andy Cumbers, Kean Fan Lim, Danny MacKinnon, Phil O’Neill and Heather Whiteside for reading and providing insightful comments on drafts of various chapters; Duncan Smith for the employment density map; Paul Marsh, Mike Coombes and Matt Jenkins for the Regeneration and Investment Organisation (RIO) projects map; Colin Wymer for the rest of the maps; and, Michelle Wood at Sea Tern (seatern.co.uk) for the cover art.

Earlier versions of the research for this book were presented at various events in Birmingham, Boston, Cambridge, Canberra, Chicago, Cologne, Dublin, Edinburgh, Leeds, Leuven, London, New Orleans, Newcastle, Oxford, San Francisco, Shanghai, Sheffield, Singapore, and Sydney. We thank the participants for their comments and questions – especially Niamh Moore-Cherry, Jen Nelles, Patrick Le Galès, and Andy Jonas – that have helped shape the development of the arguments here.

Andy Pike would like to thank his co-authors for their collegiality and expert and timely inputs, and his other research collaborators for their dialogue and insights: David Bailey, Andy Cumbers, Stuart Dawley, Emil Evenhuis, Ben Gardiner, Richard Harris, Louise Kempton, David Marlow, Ron Martin, Anja McCarthy, Danny MacKinnon, Robert McMaster, Jane Pollard, Peter Sunley and Peter Tyler, as well as
colleagues at the Centre for Urban and Regional Development Studies (CURDS), Newcastle University, UK, where the research ethos and culture continues to inspire and inflect our work. Thanks to Liam Keenan for the excellent research support. Thanks also for Liam’s PhD work on financialisation, the brewing industry and pubs in Britain and Germany, and Emile Boustani’s PhD research on finance, economic change and variegations of capitalism in the car components industry in eastern Germany and Hungary – both of which studies have informed and influenced the arguments here. Thanks also to Neil Coe and Henry Yeung at the GPN@NUS research centre for their support for a visiting professorship at the Department of Geography, NUS, in 2016.

Peter O’Brien would like to thank his co-authors and colleagues in CURDS and the iBUILD research centre, particularly the Centre Director Richard Dawson, for their advice and support during the iBUILD project.

Tom Strickland would like to thank the ESRC for the PhD studentship funding, colleagues at CURDS, Newcastle City Council and the Great Cities Institute at the College of Urban Planning and Public Affairs at the University of Illinois at Chicago (UIC), Ray Mills for his support and generosity, and, with particular thanks, the PhD supervisors Andy Pike and Jane Pollard.

Graham Thrower would like to thank the numerous multilateral financial institutions, sovereign wealth funds, pension funds and annuity providers, infrastructure funds and private equity firms that provided rich contextual detail to his research on the spatially uneven nature of infrastructure investment markets. Thanks are also due to his iBUILD-funded PhD studentship and his supervisors Andy Pike, Jane Gibbon and Oliver Heidrich. Additional research materials came from the Summer Institute in Economic Geography, Kentucky in 2016, the Newton-Al-Farabi partnership programme in 2015 and Western Sydney University, Australia, in 2015–16.

John Tomaney would like to thank his research collaborators Claire Colomb, Jessica Ferm and Niamh Moore-Cherry.

The curiosity, insights and questions of the PhD and MA postgraduates in the Local and Regional Development and Planning programmes in CURDS and UCL and Undergraduates on the Geography and Planning programmes at Newcastle University and UCL have contributed in important ways to sharpening our understanding and communication of the funding, financing and governing of city infrastructure.

Referencing has been organised using Richard Walker’s (2018: xvi) “Berkeley system” from Pictures of a Gone City (PM Press, Oakland) because it “provides references (and comments) at a glance in footnotes along with the convenience of a consolidated bibliography”.

The usual disclaimers apply.
