---

3.1	Evaluating the perceived desirability of an entrepreneurial opportunity	41
3.2	Item loadings for the McGee et al. (2009) entrepreneurial self-efficacy scale	48
3.3	Natural, accidental, and inevitable entrepreneurs	52
5.1	Scales for growth-oriented and independence-oriented entrepreneurial intention	80
5.2	Regression coefficients for the antecedents of GOI and IOI	83
6.1	Factor analysis results: entrepreneurial versus intrapreneurial intention	98
6.2	Descriptive statistics and intercorrelation matrix	99
6.3	Regression results for entrepreneurial and intrapreneurship intention	100
7.1	Factor analysis to identify the subcomponents of entrepreneurial self-efficacy	115
7.2	SEI, GOI, and IOI data correlation matrix	116
7.3	Regression models for three types of entrepreneurial intention	117
8.1	Typology of entrepreneurs based on social-benefits, profit, and innovation attitudes	138
8.2	Empirical frequency of the eight types of entrepreneur	141
9.1	Regression results for growth, independence, and social intentions	158
9.2	Reduced regression models for entrepreneurial intention	160
9.3	Sample statistics and calibration parameters for fsQCA	161

9.4	FsQCA results for social entrepreneurship intention	163
9.5	FsQCA results for independence-oriented entrepreneurial intention	165
