Acknowledgments

We have spent the last 15 years working together in our dedication to experiential learning in higher education and more specifically in the running of the Management Consulting Field Experience program at Babson College that is devoted to student consulting projects. Our program has been successful and is considered a signature learning experience at Babson. To get to where we are today, we are so appreciative of our students and those who have served as project advisors including our MBA students, faculty, executives in residence and alumni. The work that our project advisors do continues to inspire us as we look at the impact they have on their student teams, the clients they serve and Babson College as a whole.

We are continually impressed by the quality of the work that our student consulting teams produce year after year. We know that the teams have a positive impact on the organizations they are working with, since clients come back repeatedly for more projects and tell others about how good these teams really are. Much of that success comes from having quality students on the teams but more importantly, from our perspective, it comes largely from having project advisors who signed up for this experience because they wanted to learn and develop the talent on their team as well as their own leadership skills.

There are many people to acknowledge who have helped over the years. Marilyn Bachelder Snyder, whose office initially coordinated the MCFE program at Babson, worked closely with Joseph Weintraub in 1988 to start using Babson MBA students as project advisors to undergraduate teams. Marilyn's entrepreneurial spirit was a major contributor to our success today.

The support for our program from top administrators at Babson has been significant. Special thanks go to the Dean of our Undergraduate Program, Ian Lapp, for his continuous support and belief in what we do and in the future of experiential education. Ian has done so much to build relationships with students and clients. Appreciation also goes to Ken Matsuno, Dean of Faculty, and Mark Rice, Provost, for providing the necessary support so we could complete this book.

Our ability to deliver this program requires a lot of administrative support including the recruiting of project advisors, students and clients with good projects. We are grateful to Donna Sosnowski, Director of the Hoffman Family Undergraduate Center for Career Development at Babson, and her staff for their support over the years.

Many of our colleagues at Babson have willingly shared their expertise in the development of this book. Our appreciation goes to Bob Bonnevie, Paul Horn, Amanda Malin, Miguel Rivera and Jonathan Sims.

For significant contributions to the content of this book, special thanks go to Dwight Gertz, Faculty Co-director of the Office of Experiential Learning at Babson and Faculty Director of the required MBA student consulting program. Dwight shared his expertise, perspective and humor to help us develop several areas, including the 'student consulting process model' used in this book. We also want to express our gratitude to Sarah Stefanon, Joe's graduate assistant at Babson, for her outstanding contributions, energy and willingness to get things done (even when Joe gave her little time in which to do it!).

We also want to recognize the major written contributions to the content of this book from Sadie Burton-Goss, Paul Horn, Carrie Lerner and Jonathan Sims. They were great to work with and provided many suggestions and insights that had a positive impact on how this book was written.

We also want to acknowledge the many people who have made a difference to us and who support the value of experiential learning in education. We want to thank John Aboud, Jenn Cassie, Dennis Ceru, Nancy Doherty, James Hunt, Nan Langowitz, David Sachs, Amanda Solomon and Paula Weafer.

There are many groups and departments at Babson that have supported our efforts in running a successful student consulting program over the years. We have received help from the Babson Speech Center with their director Sharon Sinnott and speech consultants Paul Horn and Laurie Lesser, along with a great group of other speech consultants. They have made a major difference in the success of our teams by dramatically improving the quality of project presentations. Likewise, our Writing Center and its director Kristi Girdharry do so much to prepare our students for the written portions of consulting projects. We also appreciate the work done by our research librarians, especially Stephanie Farne and Samantha Porter, in helping the student teams learn how to do the necessary research and collect information about their clients and their project topics. In addition, we want to acknowledge the innovations we have made in our student consulting program that came from our wonderful colleagues in the Academic Technology Information (ATI) Center and the Media Services team. From the Management Division, the administrative help from Louise Lawson is greatly appreciated. We also want to acknowledge the work of Raquel Robertson, assistant to the undergraduate dean and a former MBA project advisor, for helping us in so many ways.

We could not run a student consulting program without great clients who provide a real-life experience for our students and who are learning partners with us and our students. We are very appreciative of the challenging projects they ask our students to do. In particular, we want to thank Anna Ivashko, Evan Shirley, Lorraine Mackiewicz and their colleagues from Clarkston Consulting;

Stacy Madison, founder of Stacy's Pita Chips and now Stacy's Juice Bar and BeBOLD Energy Bars; Louis Joseph from Alps & Meters; Jason Lumsden from the Boston Red Sox; and Robert Graybill from FMS US and Canada.

In order to make innovations in our undergraduate student consulting program, we want to recognize the support that we have received from our dedicated alumni, friends of the college and clients. Special thanks and appreciation go to David Sachs and Allison Hockler Sachs for their advice and financial support over the years. David has been an advisor to the authors and has been instrumental in recruiting many of the client companies in MCFE. We also want to thank Robert (Bob) and Kimberly Graybill for their financial support and commitment to the MCFE program. Bob has also been a client for several MCFE teams. We appreciate all that they have done, allowing us to take experiential learning and the undergraduate MCFE program at Babson to even higher levels.

We also want to thank Edward Elgar Publishing and Alan Sturmer, executive editor, who believed in the value of this project from the beginning and supported us throughout. Alan was a great project advisor to us and always responded to our questions within hours and often in minutes.

Writing a book can be very stressful for the authors and for their families and having a strong support system is critical. Arline MacCormack would like to thank her daughter, Liz Thomas. Liz, you are the greatest blessing of my life. You are happy, confident and fulfilled, and I am so proud of the remarkable woman you have become. I love you most. I would also like to thank my siblings Kathy, Jane, Jim and Christine for their continuous love and support through this messy journey that is our lives. You are my best friends, confidants and travel buddies. I am truly fortunate.

George Lee would like to recognize the energy and enthusiasm of Professor Joe Weintraub who created this program at Babson and who worked tirelessly to make this book a reality. As described previously, the growth and dedication of our students inspire those of us on the program side to continuously improve its content. I am appreciative that my wife, Beth, allowed me the time and space to complete this project.

Joe Weintraub wants to thank his wife, Carol, and daughter, Sarah, for providing the love and support needed during this project and all the other parts of life. They both constantly demonstrate courage, commitment and compassion in everything they do. They are my inspiration.

And finally, Joe wants to thank his two coauthors, George Lee and Arline MacCormack, for the major contributions that they have each made to the development of experiential learning at Babson and for their significant accomplishment in helping to develop our undergraduate MCFE program.
