Acknowledgments

I would like to acknowledge with deep love and appreciation, my wonderful Mum, Patricia Kearney, who is my rock and inspiration, always showing infinite love, kindness, support and encouragement that helped make my dreams a reality.

Special thanks to my family, friends, colleagues and the internationally renowned academics who endorsed this book, I am honoured and appreciate your support and encouragement.

Thank you to all my colleagues at RCSI, University of Medicine and Health Sciences; it is a pleasure to work with you all and together make a difference to the field of healthcare.

Thank you to all the clinicians and healthcare professionals globally that have passion and compassion and who make a real difference to their patients' lives everyday.

Thank you to the editors and the excellent team at Edward Elgar Publishing who believed in this book and supported me in making it become a reality.

'This book distills today and tomorrow's complex challenges into a practical decision-making framework that informs thinking about innovation and entrepreneurship in healthcare. I am particularly impressed by the range of insights spanning strategy, leadership, team management, challenges facing women, and human capital. The coverage is pragmatic and comprehensive, helping the reader to recognize and avoid their own common biases, and takes them by the hand to make better decisions. I highly recommend this book for all health care professionals!'

Donald Bergh, University of Denver, USA

'For anyone interested in engaging in change, leadership and creating value in health care, this book is a must read. Claudine Kearney provides a thoughtful, interesting focused innovative approach to a most relevant topic today how to implement innovative leadership and an organizational approach to better healthcare all over the world.'

Robert D. Hisrich, Kent State University, Ohio, USA

'This book provides a thorough, scientific discussion of innovation and entrepreneurship, and then applies it in new and important ways to the healthcare industry. It will help both healthcare scholars and professionals to understand the ways in which the industry can and should be managed, to optimally deal with 21st century challenges.'

Killian J. McCarthy, University of Groningen, the Netherlands
