Figures and Tables

List of Figures

3.1 A Linear Q-Dependent Demand Curve 57
4.1 Consumer Surplus for Private Recreational Use of a Public Recreation Site 95
4.2 Three Welfare Measures From a Price Change 103
9.1 Critical Path From Choice Theory to Policy Support 193

List of Tables

3.1 Hypothetical Data Illustrating the Development of TCM Variables 70
3.2 Estimated Demand at Various Entry Fees to the Site 71
4.1 Economic Benefits of Selected Policy Proposals, Based on a Cobb-Douglas Utility Demand System 87
4.2 Economic Interpretation of CV and EV for Selected Policy Proposals 88
4.3 Formulas for Visitor Demand and Benefits From Adding a Site or Lowering Its Price: Three Common Algebraic Forms for Single Site Models 91
4.4 Demand and Benefits from Building a Site or Lowering Its Price: Three Common Algebraic Forms for Single Site Models 93
4.5 Demand and Benefit Formulas Using a Multi-Site TCM, Based on a Cobb-Douglas Utility Function with Quality 108
4.6 Example of Impacts on Demand and Benefits from Selected Policy Proposals, Using a Two Site TCM with Quality 114
5.1 Single Site Data for TCM Estimation and Estimated Visits 134
5.2 Estimated Single Site TCM for Three Common Algebraic Forms 134
5.3 Estimated Multiple Site TCM for Cobb-Douglas Utility Function with Varying Quality: Two Sites 140
7.1 Classification of TCM Variables 172
