About the editors

Mohammed Dore did his doctoral studies at Oxford University. He is Professor of Economics at Brock University and has published four books, the latest being *Global Environmental Economics*, published by Basil Blackwell in 1999. A Japanese language edition of an earlier book, *The Macrodynamics of Business Cycles*, also published by Basil Blackwell, appeared in 1996. He has published a number of articles which have appeared in *Theory and Decision*, the *Journal of Environmental Economics and Management*, *Nonlinear Dynamics, Psychology and the Life Sciences*, *Environmental Ethics*, the *Journal of Post-Keynesian Economics*, *Science and Society*, *Ambio: The Journal of the Human Environment*, *Economics Letters*, the *International Review of Applied Economics*, the *Canadian Journal of Development Studies*, *History of Political Economy*, the *Canadian Journal of Economics*, and the *Journal of Comparative Economics*. Mohammed Dore also serves on the editorial boards of several journals. He was recently appointed by UNESCO to be an editor of one of the volumes of the UNESCO *Encyclopedia of Life Support Systems*. This is a major international undertaking in response to Agenda 21, and the *Encyclopedia* has 21 Nobel Laureates on its Editorial Advisory Board.

His current research interests include climate change in Canada, and global environmental change and its distributional consequences for the rich and the poor. He has collaborated with an inter-American team of researchers from South, Central and North America on the role of forests in mitigating global warming. His research has been funded by the Social Sciences and Humanities Research Council of Canada, the National Science Foundation of the USA, the Inter American Institute of Global Change Research (which is now based in Brazil) and the National Science Foundation of Brazil. He is also a member of an international consortium of research, NEPAMA, based at the University of Brasilia.

Rubén Guevara is currently Director-General and Chief Executive Officer of the Tropical Agricultural Research and Higher Education Center (CATIE), an international institution based in Costa Rica, with the mandate to improve the well-being of humankind by applying scientific research and higher education to the development, conservation and sustainable use of natural resources in the American tropics. He received his doctoral degree from the University

of Idaho and attended the Program for Management Development, an Executive Education Program of the Graduate School of Business Administration, at Harvard University.

Dr Guevara has been Chairman of the Council of the International Tropical Timber Organization (ITTO), a specialized body of the United Nations Conference on Trade and Development (UNCTAD), responsible for reconciling resource management and trade issues dealing with tropical forests. He is a member of the board of the Interamerican Economic Council, based in Washington and of the International Union of Forestry Research Organizations (IUFRO), based in Austria. He has been a member of the board – serving in various capacities – in the Latin American Energy Organization (OLADE), based in Ecuador, and the Latin American Fisheries Organization (OLDEPESCA), based in Peru, and has served in specialized instances in numerous private and international institutions or organizations dealing with agricultural research, environmental conservation, higher education and rural development, such as FAO, IUCN and the Earth Council.

He has written extensively on issues associated with forestry development, human development and economic development. He is the co-author of two books: *Research in Alliance with Nature* and *Guidelines for Sustainable Forest Industries*. His current research interests include the effect of agricultural research on poverty alleviation and environmental enhancement, as well as the valuation of environmental services *vis-à-vis* the implementation of mechanisms aimed at improving human well-being and environmental protection.
