

# Figures

---

2.1	The opportunity costs of depleting ores that contain 10 per cent copper and replacing them with ores that contain 5 per cent copper	41
2.2	The change in yield associated with climate variables that have a physiological optimum	46
3.1	Determination of wages and land rents	60
9.1	Mass flows in the US non-ferrous metals sector, 1993	223
9.2	The US economic system as a whole from a mass flow perspective, 1993	227
9.3	Fuels: apparent consumption mass (GDP: USA 1900–1995)	229
9.4	Construction materials: apparent consumption (mass/GDP: USA 1900–1995)	230
9.5	Non-ferrous metals: apparent consumption (mass/GDP: USA 1900–1995)	231
9.6	Miscellaneous other materials: production (mass/GDP: USA 1900–1995)	232
9.7	Fuels: apparent consumption (mass/capita: USA 1900–1995)	233
9.8	Construction materials: apparent consumption (mass/capita: USA 1900–1995)	234
9.9	Non-ferrous metals: apparent consumption (mass/capita: USA 1900–1995)	235
9.10	Miscellaneous other materials: apparent consumption (mass/capita: USA 1900–1995)	236
10.1	High self-restraint indifference curves	255
10.2	High and low self-restraint indifference curves	255
10.3	Switching locus	257
10.4	Non-convex willingness to pay	259
10.5a	Optimistic regulator	260
10.5b	Pessimistic regulator	260
10.6	Smoothing willingness to pay	262
