Tables

2.1	Combinations of individual and group-level social exclusion	15
3.1	Definition of demand for secondary and tertiary education	45
3.2	Activity and unemployment rates for different age groups and educational attainments	49
3.3	Young people, by relationship to head of household	51
3.4	Household income distribution, by demand of education variable	52
3.5	Gender differences in the demand for education	54
3.6	Demanders for various levels of education, by father's educational attainment	55
3.7	Binomial logit models: estimations of the probability of demanding each type of education	61
3A.1	Descriptives of the main variables used in the analysis	69
4.1	Proportion of employees who started in their current job (as at spring 1995) after 1 January 1994	75
4.2	The previous situation of new recruits, 1995	76
4.3	The educational level of persons recruited in 1995 (comparison between those who were either at school or unemployed in the previous year and the total population recruited)	81
4.4	Distribution of jobs, by gender	87
4.5	The most important sectors for young labour market entrants, by individual educational level, 1995	91
4.6	Employment status of the various categories of recruits, by previous situation, 1995	93
4.7	Share of recruits looking for other jobs, 1995	94
5.1	Logistic regression of the log-odds of obtaining a job, 18 months post-programme	107
5.2	Measures of programme effectiveness: predicted probabilities of employment, 18 months post-programme	108
5.3	Tobit estimations of post-programme employment duration	111
5.4	Tobit estimations of post-programme earnings from employment	113

5.5	Programme participants and non-participants, by gender	114
6.1	Criteria for evaluating training policy	126
6.2	Dutch instruments for training the unemployed	130
6.3	Number of participants in the various training schemes for the unemployed, 1985–94	134
6.4	Qualitative impression of the composition of the participant groups of the various instruments, compared with their share in unemployment	135
6.5	Results for the completion percentage: mean, standard deviation and number of cases	136
6.6	Equation for the completion rate	138
6.7	Results for the placement percentage: mean, standard deviation and number of cases	139
6.8	Equation for the placement rate	140
6.9	Overview of Dutch studies based on the non-experimental control group approach	141
6.10	Summary of results for all training instruments for the unemployed taken together, 1985–94	146
6.11	Relative performance of the various training instruments	147
7.1	Estimates of models of determinants of ratios of starting wage rate in destination job to final wage in origin job in West Germany	164
7.2	Estimates of stochastic differential equation model of wage rate growth within jobs in West Germany	167
7.3	Estimates of determinants of transition into unemployment in East Germany, 1989–93	170
7.4	Estimates of effects of further education on re-employment of unemployed men and women in East Germany, 1989–93	173
7A.1	Partial-likelihood estimates of effects of independent variables on the likelihood of participation in further training in West Germany	182
7A.2	Estimates of participation in further training in East Germany, 1989–93	183
8.1	Contractual and statutory rights to paid time off for training in selected European countries	188
8.2	Training of adults by level of education	199
8.3	Participation in training: results from the logistic regression	201
8.4	Transitions from employment to unemployment	208
8.5	Transitions from unemployment to employment	211
8A.1	Eurobarometer data set analysis	218
9.1	Access rate to training in 1991, by age group and firm size	224

Klaus Schömann and Philip J. O'Connell - 9781840642780
Downloaded from Elgar Online at 06/24/2018 09:02:16AM

9.2	Percentage distribution of all establishments in a given sector, by cluster	236
9.3	Percentage distribution of establishments, by size and cluster	237
9A.1	Distribution of establishments, by size	242
9A.2	Distribution of establishments, by sector of economic activity	242
10.1	Activity rates, by age group, in the Netherlands	243
10.2	Employment–population ratios in older age groups in a number of EU member states	244
10.3	Proportion of civil servants by age group who perceive difficulties in several aspects of their work	248
10.4	Productivity and age	252
10.5	A selection of explanatory *y* variables in the productivity and wage equations	253
10.6	Wages and age	254
10.7	A selection of explanatory variables in the wage equation	254
11.1	Results of TOBIT analysis of the number of job-related courses between 1994 and 1996	266
11.2	The risk of becoming unemployed between 1994 and 1996	268
11.3	Influence of job-related courses on the risk of becoming unemployed between 1994 and 1996, in a simultaneous model	269
11.4	Influence of job-related courses in the past on the risk of becoming unemployed between 1994 and 1996	270
11.5	Presence of training policy and intensity of training in firms	275
11.6	Explanation of the forced outflow of workers	280
12.1	Participation by employed adults aged 25–64 in continuing education and training, by educational attainment, 1994–5	287
12.2	Participation by employed adults aged 25–64 in continuing education and training, by firm size, 1994–5	288
12.3	Descriptive statistics on main variables used in the analysis of the determinants of training	289
12.4	Establishment-level determinants of training	292
12.5	Descriptive statistics on main variables used in the analysis of the effects of training	294
12.6	OLS models of employment change, 1993–5	296
12.7	OLS models of change in labour costs per employee, 1993–5	297
13.1	Firms' investment in FT, 1993	310
13.2	Diversity of firms' further training practices	310
13.3	Participation in courses per 100 employees of all enterprises	311
13.4	Most relevant inequalities in access to firm-level further training	312

13.5 Further training practices in laboratory chemicals firms 319
13.6 Further training practices in telecommunications carriers 322
13.7 Further training practices in the railway rolling stock industry 324
14.1 ESF (and ERDF) funding under the Human Resources Community Initiatives, 1989–99 342
