

Tables

1.1	Key characteristics of quantitative chapters	9
2.1	'Ideal types' of societal time in different economies	30
2.2	Three paradigms of social exclusion	35
2.3	Average duration of employment tenure with a firm	38
3.1	Regulation of working time	64
4.1	Part-time employment as percentage of employment (national definitions)	96
4.2	Unemployment rates for men and women in Sweden and the Netherlands, 1986–91	99
4.3	Transition rates as percentage of 1986 status	104
4.4	Estimation of probability of being out of the labour force in 1986 (Sweden and the Netherlands)	107
4.5	Estimation of probability of working part time in 1986 (Sweden and the Netherlands)	109
4.6	Estimation of probability of working full time in 1986 (Sweden and the Netherlands)	111
4.7	Transitions from part-time work, 1986 (Sweden and the Netherlands)	113
A4.1	Main characteristics of the 1986 sample (the Netherlands)	120
A4.2	Main characteristics of the 1986 sample (Sweden)	121
A4.3	Main characteristics of the 1991 sample (the Netherlands)	122
A4.4	Main characteristics of the 1991 sample (Sweden)	123
A4.5a	Transition matrix, Sweden (men)	125
A4.5b	Transition matrix, Sweden (women)	126
A4.6a	Transition matrix, the Netherlands (men)	127
A4.6b	Transition matrix, the Netherlands (women)	128
5.1	Male and female transition patterns through part-time employment, 1990–95	141
5.2	Summary of survival analysis of full- and part-time episodes in Britain and western Germany, 1990–95	144
5.3	Determinants for transitions from part-time to full-time work, non-employment or unemployment (as percentage changes in transition rates)	152

A5.1	Employment status episodes of the BHPS and GSOEP spell data by censoring (distributions in brackets)	163
A5.2	Partial likelihood estimates for transitions from part-time into full-time work, non-employment, unemployment or other statuses (British women)	164
A5.3	Partial likelihood estimates for transitions from part-time into full-time work, non-employment, unemployment or other statuses (western German women)	166
6.1	The distribution of employees by contract status and full- and part-time work in Spain and the UK, 1996	175
6.2	The characteristics of part-time employment in Spain and the UK by age and sex, 1996	177
6.3a	Length of time part-time employees have spent with current employer in Spain and the UK, 1996	181
6.3b	Ratio of the length of time part-time employees have spent with current employer to that of full-time employees in Spain and the UK, 1996	181
6.4	Multinomial logistics regression on the exit from part-time work in Spain and the UK	188
6.5	Multinomial logistics regression on the entry to part-time or full-time work from non-employment in Spain and the UK	190
6.6	Share of the working-age population who remain in the same status for all five quarters in Spain and the UK, 1995–6	193
6.7a	Trajectories out of part-time work by reason and gender in Spain and the UK	194
6.7b	Trajectories into part-time work by reason and gender in Spain and the UK	195
7.1	Transition matrix for women's labour market status in Ireland and Spain, activity in 1994 by activity in 1993	217
7.2	Multinomial logistic regression, Irish and Spanish data	219
7.3	Two binomial logit models of the probability of working part time in Ireland and Spain	224
7.4	Mean gross hourly wage by transition status and working time in 1994, all working women in Ireland and Spain	229
7.5	OLS regression of gross hourly wage in Ireland and Spain	231
7.6	OLS regression of gross hourly wage in Ireland and Spain (adding labour market status in 1993)	233
7.7	OLS regression of gross hourly wage in Ireland and Spain (adding household characteristics and involuntary part-time variables)	235
A7.1	Wage equation for women working 15 hours or more in Ireland and Spain	244

A7.2	Wage equation for women working 15 hours or more in Ireland and Spain, controlling for job tenure	245
8.1	Distribution of employment by sector in Sweden and France, 1993	255
8.2	Unemployment rates by gender and age in Sweden and France, 1996	257
8.3	Men and women working part time (as a percentage of all women and men in work)	259
8.4	Employers' objectives and transitions	270
8.5	Forms of negotiation on working time and individual transitions	276
10.1	Health-sector employment in the Netherlands, United Kingdom and France	323
10.2	Share of part-time work in the French health-care sector, 1997	324
10.3	The British case-study workforce by occupational group	328
10.4	Workforce composition in the Dutch case studies	331
10.5	Full time/part time: absolute numbers and shares by occupational categories (Dutch study)	332
