

List of tables

2.1	Bid vectors for CV_{ALL} and CV_{HH}	23
2.2	Payment ladder used in the general public survey (CV version) and choices of a hypothetical respondent	24
2.3	Sample question used in the general public survey – CR version	26
2.4	Socioeconomic characteristics of different subsamples	29
2.5	Comparison of participation rates in different forms of donations	31
2.6	Summary of existing donations of time and money	32
2.7	Correlation between different motives for monetary donations	36
2.8	Correlation between different approaches to monetary donations	41
2.9	Correlations between different motives for volunteering	45
2.10	Percentage of respondents in each response category	47
2.11	Yearly WTP estimates for different models and uncertainty assumptions	48
2.12	Yearly WTP for CV_{ALL} and for CV_{HH} from payment ladder	50
2.13	Distribution of total WTP across different areas of charitable activity	52
2.14	Description of explanatory variables	54
2.15	Valuation functions for CV_{ALL} and CV_{HH} : payment ladder results	56
2.16	Results of contingent ranking version	59
2.17	Summary of debriefing questions across subsamples	60
2.18	A comparison of WTP estimates across models	62
2.19	Relative importance of different charitable subsectors	64
3.1	Definition of services provided by different types of hostels	77
3.2	List and characteristics of selected hostels	78
3.3	Summary statistics of selected socioeconomic variables	79
3.4	Housing history	82
3.5	Correlation between attitudes towards the proposed scenario and attitudes towards hostel services	90
3.6	WTA compensation to give up hostel services	91
3.7	Description of explanatory variables	93
3.8	Valuation function: WTA compensation for hostel closure	94

3.9	Reasons for not answering the valuation question	97
4.1	Summary of Heckman selectivity models used to fit net hourly wage	104
4.2	Estimated value of volunteer time using the opportunity cost approach	105
4.3	IGS volunteer categories against equivalent <i>NES</i> occupational categories with corresponding average male and female hourly wage rates for 1993	107
4.4	Estimated value of volunteer time using the replacement cost approach	108
5.1	The net social value of housing and homelessness charities, 1997	117
5.2	The net social value of all charities, 1997	118
6.1	Summary of literature on price and income elasticities of giving	126
6.2	Contrast between tax treatment of charitable donations in the USA and the UK	127
6.3	Summary of literature on price and income elasticities of volunteering	130
6.4	Monthly philanthropic participation rates against different price variables	138
6.5	Mean monthly donations against different price variables	139
6.6	Heckman selectivity models for giving and volunteering	142
6.7	Price and income elasticities for different types of philanthropic activity	144
7.1	Cross-tabulation of fundraising approaches and giving behaviour	154
7.2	Summary statistics for different fundraising methods	155
7.3	Ordinary least squares regression models for the number of fundraising approaches	159
7.4	Selectivity models for all philanthropic gifts with controlling for fundraising effort	162
7.5	Estimated marginal effects of fundraising	163
8.1	A comparative profile of some of the UK's major environmental groups	172
8.2	Environmental group membership patterns from <i>BSAS</i>	174
8.3	Summary of coefficient estimates for logit models of group membership	177
8.4	P and N against number of variables used in targeting	183
8.5	Overlap ratios for target population segments between groups for the 'AND' strategy	188
