Tables

2.8 Province-level and county-level Gini coefficients for the nation and county-level Gini coefficients for each province, 1992 49
3.1 Change in provincial GDP per capita rankings 61
3.2 Real per capita GDP growth (1978-95) 76
4.1 Explained variable: indicator of specialization 97
5.1 Estimation results of frontier production functions 108
5.2 Coefficients of variation 112
6.1 Economic structure and market openness in China, 1995 (%) 132
6.2 Sources, structure and distribution of household income in China, 1995 136
6.3 Summary of simulations design 139
6.4 Major macroeconomic results under China’s WTO accession scenarios, 2005 (percentage change relative to E2, except Gini coefficient) 141
6.5 Households, welfare changes under China’s WTO accession scenarios, 2005 (percentage change from disposable income in E2) 143
6.6 Changes of factor prices under China’s WTO accession scenarios, 2005 (percentage change relative to E2) 144
7.1 Gross output value of industry by ownership in China (billion) 149
7.2 Spatial inequality in China: by provincial GNP per capita 151
7.3 Changes in income inequality in China, 1978–1997 151
7.4 Decomposition analysis of income inequality in rural China, 1988 and 1995 154
7.5 Decomposition analysis of income inequality in urban China, 1988 and 1995 156
7.6 Decomposition of within-group and between-group inequality in 1988 and 1995 158
7A.1 The trend of income growth and income inequality in rural China, 1978–1997 164
7A.2 The trend of income growth and income inequality in urban China, 1978–1997 165
8.1 Changes in infant mortality rates in Chinese provinces (per 1000 live births) 169
8.2 Estimate of the parameters of infant mortality 182
8A.1 Relations between external openness and other determinants of IMR 192
9.1 The regional distribution of foreign direct investment in China: 1987–1997 196
9.2 Human capital variables, 1994 (%)  
9.3 The ratios of neoclassical return rates: regions over Shanghai  
9.4a The ratios of neoclassical return rates to capital adjusted by primary education: regions over Shanghai  
9.4b The ratios of neoclassical return rates to capital adjusted by secondary education: regions over Shanghai  
9.4c The ratios of neoclassical return rates adjusted by higher education: regions over Shanghai  
9.5 The ratios of human capital adjusted over neoclassical return rates: regions over Shanghai  
9.6 Description of variables  
9.7 Regression result  
10.1 Econometric results  
11.1 Investment in different forms of ownership  
11.2 Investment in coastal and central provinces  
11A.1 Economic indicators across provinces in 1995  
11A.2 Sources and uses of funds in rural credit cooperatives  
11A.3 Investment and its financing according to ownership forms  
11A.4 Investment financing of collectively-owned TVEs in the coastal and central provinces  
12.1 Summary statistics for enterprise sample  
12.2 Distribution of sample by ownership and sector, 1990 (%)  
12.3 Summary statistics on exporters  
12.4 Summary statistics on exporters by ownership and sector, 1990  
12.5 Size of exporters and non-exporters (unweighted averages of selected variables)  
12.6 Persistence and volatility of export status  
12.7 Comparing performance of exporters and non-exporters  
12.8 Basic model results  
12.9 Export histories  
12.10 Basic model controlling for export histories  
13.1 Regression results, 1978–1996  
13.2 Stationarity tests results  
13.3 Regression results on panel data  
13A.1 Evolutions of real incomes per capita, consumer prices in rural and urban areas, real and nominal effective exchange rates of Renminbi
