Benefit-cost analysis, 2

CERCLA, 2

Clean Water Act, 2

compensating variation  
definition, 6

contingent valuation

distribution-free

unrestricted likelihood function, 62

unrestricted maximum likelihood estimates, 63

unrestricted probability statement, 61

double-bounded, 115

elicitation format, 17

bidding games, 18

dichotomous choice, 18

open-ended questions, 18

payment cards, 18

incentive compatibility of, 18

indifference in, 131

logit, 28, 36, 37, 48, 52, 54

multiple question, 115

bivariate probit, 116

composite error model, 120

independent probits, 119

interval data, 123

random effects probit, 121

open-ended, 128

incentive compatibility of, 114

relative efficiency, 114

optimal bid design, 129

parametric models, 23

payment cards, 125

probability of yes, 26, 51

bivariate, 116

bound logit, 98

bound probit, 98

Box-Cox utility, 40

exponential WTP function, 54

linear utility, 27

linear WTP function, 52

log-linear utility, 36

Turnbull, 60

varying parameter utility, 48

probit, 27, 36, 48, 52, 54

sources of randomness, 34

spike model, 133

survey design, 17

Turnbull, 59

distribution estimates, 67

likelihood function, 66

pooling procedure, 69

variance estimate, 71

distributions

exponential logistic, 309

generalized extreme value, 315

Gumbel, 313

negative binomial, 312

Poisson, 312

truncated normal, 310

Type-I extreme-value, 313

Efficiency, 1
