

Index

The index contains references to subjects covered in the book. Comprehensive treatment of a subject is indicated by underlined page references; figures, tables, and notes are referenced in *italics*.

- abatement cost, 92, *100*
- acid rain, 79, 94, *220*, 328–331, *331*, 332, 336, *337*, *338*
- acidification, 94, 330, 331, 338
- ambivalence, 12, 22, 162, 177, 292, 302, 328, 335–337, 342
 - and environmental damage, 172–173
 - and innovation, 170
 - and preferences, 171, *171*
 - and technical progress, 170, *171*
 - and uncertainty, 173
 - modelling, 164–170
 - of sulphurous substances, 327, 332–335
 - of waste paper, 273–275, 279–281, 285, 288–289
 - over time, *174*, 169–174, 243, 302, 342
 - potential, 166, 168–169
- axiomatisation, 152, 156–158, *160*

- biodiversity loss, 99, 146
- blast furnace slag, 310, 313, 316, 321, 325

- calcium sulphide, 294, 295, 302, *304*
- capital
 - accumulation, 186, 295, 311, 313, 314
 - homogeneity of, 49, *66*, 82
 - neo-Austrian theory, 82, 200–216
 - stock, 81–82, 184, 201, 209, 211, 295, 302, 303, 307, 311, 324, 325
 - theory, 81, 183, 185–187, 195, 342
- case study
 - cement production, 53, 163, 307–326
 - soda and chlorine industry, 170, 172, 176, 292–305, 325
 - sulphuric acid, 170, 176, 327–337
 - waste paper, 163, 164, 170, 174, 177, *181*, 243, 273–290
- cement, 308–310
 - aggregates, 309, 310
 - clinker, 309–312
 - shipment, *314*
- cement industry, 283, 307–326, 336
 - economic development, 312–314, 317, 318, 324–326
 - economic relevance, 307
 - interrelation with other industries, *312*, *315*, *316*, 313–316, 320–322, *323*, 325
- cement manufacture, *309*, 310
 - CO₂ emission, 318, 319, *321*, 324
 - dust emission, 318, *319*
 - energy efficiency, 318, 319
 - fuels, 312, 313, *322*, 318–325
 - history, 310–318

- joint production, 308, 310, 318, 322, 324
- SO₂ emission, 319, 320
- Chance process, 296, 296, 302, 303
- chemical industry, 32, 43, 59, 115, 147, 172, 176, 292, 293, 299–303, 327, 328, 333, 333–336
- chlorine, 8, 170, 172, 176, 251, 298, 292–303, 306
 - economic significance, 305
 - environmental impact, 292
- chlorine-alkali electrolysis, 298, 298–299
- choice of production techniques, 136, 137, 184–185
- climate change, 80, 91, 146, 244, 320
- CO₂ (carbon dioxide), 51, 56, 79, 162, 188, 191, 318, 319, 332
- CO₂ emissions, 2, 62, 67, 67, 319, 320, 321, 326
- co-evolution, 301–303, 326, 327, 341
- complexity, 12, 86, 225, 229, 245, 247, 271, 307, 341
 - and responsibility, 230–233
 - due to joint production, 86–87, 233, 236, 248, 327, 335, 339
 - of concomitants, 230, 233, 235, 251, 258, 265, 266, 340
 - of ecological-economic systems, 2, 69, 195, 196, 218, 232, 241, 245, 341
- consequences of an action
 - and joint products, 232, 343
 - as basis of moral judgement, 233, 240, 251, 259
 - chance-, 230, 238, 241, 245, 255, 259
 - concomitants, 230, 231
 - intended and unintended, 90, 231
 - necessary, 238, 241, 244, 245, 255
- critical load, 330
- crude oil refining, 2, 176, 328, 334, 335
- Deacon process, 295, 296, 302, 303, 306
- degradation rate of pollutants, 78, 79, 173, 184, 188, 189, 192, 194, 195, 210
- discount rate, 189, 196, 200, 217
- dry deposition, 329–331
- duality principle, 22, 47–49, 129, 130, 144, 150, 158, 159
- dynamics, 35, 69–84, 186, 196, 199, 208, 213, 245, 271, 324, 340
 - deterministic d. and stocks, 69, 71, 87
 - economic, 123
 - of ecological-economic systems, 12, 40, 184, 218, 327, 341
 - of environmental problems, 94, 97, 98, 93–99, 302–303, 304
- ecological economics, 3–6, 9, 49, 62, 177
- economic development, 317, 340
 - ambivalence and, 332
 - joint production and, 123, 300, 301, 327, 337, 339
- economic growth, 129, 130, 183, 317
 - limits, 5, 6
- economic theorising
 - axiomatisation, 156, 160
 - formalisation, 157–159
 - problem-oriented and theorem-oriented, 153, 152–155, 157, 159
 - scientific realism, 153, 160
 - structuralism, 155, 157, 159
 - subjective elements, 29, 33
- economies of scope, 141, 149
- ecosystem, 5, 67, 76, 89–94, 98, 99, 295, 330, 336, 338
 - as sink for pollutants, 1, 67, 92, 93, 97, 162, 331
 - functions, 71, 93
- end-of-pipe abatement, 40, 97, 205, 218, 318
- entropy, 4, 5, 10, 12, 46, 50–65, 67, 68, 188
 - e. 'theory of value', 66
 - specific, 51, 51, 52–53, 56, 65, 66

- environmental and resource economics, 3, 11, 43, 48, 50, 92, 105, 108, 139, 145, 189, 340
- environmental impact, 27, 32, 33, 38, 89, 99, *100*, 147, 162, 173, 175, 190–192, 264, 324, 332
- assessment, 342
 - irreversible, 98
 - of cement manufacture, 308, 318–323
 - of chlorinated substances, 292
 - of SO₂, 329–332
 - reversible, 97
- environmental Kuznets curve, *101*
- environmental policy, 40, 175, 195, 223, 227, 228, 263, 273, 339, 341, 343–345
- ambivalence of joint products, 178, 336
 - general aims of, 92
 - instruments, 264
 - joint externalities, 336, 337
 - role of knowledge, 344
- environmental problems, 89
- causes of, 91, 96
 - due to sulphurous substances, 295, 328, 335
 - economic analysis of, 99, 105
 - joint production as cause, 50, 61, 95, 99, 339
 - solution by re-use of joint outputs, 335
 - substitution of, 98, 303, 335, 342
 - temporal pattern of, 93, *94*, 96, *97*, *98*, 293, 302, *304*, 331–332, 345
- epistemology, 3, 8, 223
- ethics, 3, 8, 12, 100, 146, 223–267, 339–344
- evolution, 17, 27, 36, 83, 89, 173, 324, 326, 332, 337, 338
- industrial, 176, 271, 293, 301–304, 315, 325, 334
 - of economic methodology, *148*, 152
- exergy, 49–52, 54, *55*, *56*, 54–62, *66*, *67*
- law of Gouy and Stodola, 54
- externality, 7, 11, 23, 43, 48, 50, *99*, 105, 131, 140, 145, 337, 340, 342, 344
- hidden, 175, 336, 337, 342
 - joint, 176, *177*, 328, 335–337, 342
 - joint production and, 23–24
 - Pigouvian approach to, 46, 139
 - theory of, 140
- flow pollution, 80, 188, 190, 195, 199, 204, 208, 213, 214, 303, 331
- flows of input and output, 37
- forest die-back, 330, *331*, *338*
- fossil fuel, 91, 101, 162, 191, 308, 318, 320, 321, 328, 329
- free disposal, 7, 44, 122, 132–134, 137, 138, 144, 145, 159
- free riding, 7, 145
- freedom to act, 225, 226, 229, 231, *237*, 239, 264, 340, 344
- creativity, 2, 344
 - knowledge as a prerequisite, 239
- general equilibrium analysis, 130, 143, *148*
- modern, 131–134
 - neo-Ricardian, 134–138, 144
 - of joint production, 7, 123–124, 128, 130, 144, 163, 175
 - of public goods, 139
 - role of free disposal, 133, 138
 - structuralism, 155
- good life, 235
- heuristic of fear, 241, 247, 250, 253
- homo economicus, 2, 261, 340, 343, 344
- homo politicus, 261, 340, 343, 345
- hydrochloric acid, 170, 295, 300, 305, *306*
- hydrogen chloride, 239, 241, *251*, 294–296, 300, 303, 305
- industrial ecology, *146*

- industrial evolution, 271, 302, 334
 - ambivalence and, 332
 - interaction of stocks, 325, 326
 - joint externalities as a result, 336
 - joint production and, 176, 293, 300–302, 308, 311, 324, 327, 337
- industrial metabolism, 47
- industrial organisation literature, 21, 105, 131, 141, 142, 145, 159, 342
- innovation, 123, 173, 271, 306
 - and joint production, 123, 170, 293, 300, 301, 303, 325
 - delay, 210, 211, 216
 - of production techniques, 122, 184–186, 188–196, 199–219, 301, 303, 313, 318, 342
- interdisciplinarity, 1, 3, 62, 69, 339
- investment decision, 105, 183, 184, 189, 190, 195, 196, 296, 306, 342
- irreversibility, 2, 5, 60–63, 98, 100, 132, 173, 251, 258, 266, 310
 - due to joint production, 87
 - thermodynamic cause, 55, 57
- joint production, 2, 23–25, 38, 339, 345
 - asymmetric, 39, 237
 - business literature, 6, 24–25, 342
 - epistemology, 8
 - externality and, 23–24
 - fixed proportions, 20, 21, 112, 118–121, 125–128, 132, 143, 169, 204–206, 214
 - flexible proportions, 20, 113, 120–128, 132, 143
 - general principle of, 84–86, 230, 307
 - in ecological systems, 5
 - industrial evolution, 176, 293, 300–303, 308, 311, 324, 327, 337
 - intersectoral link, 333, 334–337
 - irreducible ignorance, 247
 - joint products and j.p., 39
 - modelling as single prod., 126
 - modern production theory, 21–23
 - principle of, 84, 85, 188, 232, 339
 - private and public goods, 6
 - responsibility, 8, 40, 232, 343
 - services and material outputs, 85
 - source of innovation, 122–123, 148, 300, 303, 325
 - stocks and, 70, 83–84, 292
 - systems of production, 21, 25
 - thermodynamic cause, 4, 53, 64–65, 188
 - time structure, 20, 26, 40–41, 42
 - traditional notion, 19
 - ubiquity of phenomenon, 12, 223, 232, 339, 341
 - universal concept, 10, 340
- joint products, 25, 37
 - ambivalent, 162–163, 292, 302
 - and joint production, 39
 - as a waste, 4, 51, 50–53, 114–116
 - desired and undesired, 39, 113–114, 117, 131, 162–163, 200, 242–245, 251, 342
 - in basic industries, 337
 - intended and unintended, 8, 86
 - re-use in production, 116, 146, 302, 303, 333
 - substitution of, 96–97
 - thermodynamic properties, 60, 61
 - unidentified, 243
 - valuation by marginal demand, 116–118
- justice, 156, 235, 255, 257, 262
- knowledge, 2, 8, 22, 30, 83–86, 94, 153, 173, 177, 218, 223, 224, 236, 238–250, 260, 305, 310–312, 322, 325, 340–344
 - as an obligation, 250, 343–345
 - factual and normative, 145, 240, 242–245
 - joint production as a source, 247

- observer's, 32, 33
- perfect, 158, 173, 344
- unidentified joint products, 243
- Leblanc process, 239, 293, 294, 296, 293–302, 304
 - production share, 299
- lifetime, 26, 41, 44, 78, 76–81, 188
 - of capital goods, 188
 - of pollutants, 79, 188–195, 342
- Lindahl equilibrium, 140, 141, 146, 154
 - problem of free-riding, 141
- market, 8, 11, 21, 22, 45, 48, 90, 109–113, 119, 123, 126, 131, 139–142, 145, 149, 181, 189, 231, 264, 273–275, 288, 310–318
 - failure, 46, 139, 140, 189, 198
 - waste paper, 273–290
- morality, 223
- MUSCOD-II, 219
- nature, 1, 43, 94, 199, 231, 232, 233, 236, 245, 262–266, 318, 343
- observer's interest, 27–37, 43, 72, 77
- ozone 'hole', 146, 244, 303
- Pareto efficiency, 7, 133, 138, 141, 145, 146, 189
- partial equilibrium analysis of joint production, 120, 123, 128
- permanency, 70–72, 72, 74–76, 80, 83
- persistency, 81
- pH-value, 338
- philosophy of economics, 152, 153
- phronesis, 236, 237, 249, 263
- political activity, 223, 256, 262, 265
- political power, 226, 228, 256, 258, 262
 - and joint production, 258
- Porter hypothesis, 306
- precautionary principle, 11, 12, 247, 247–250, 251, 252, 342, 345
- prediction, 36, 45, 69, 77, 87, 153, 160
- price, 23, 109, 109–144, 161, 165, 187–190, 273, 295, 316, 317, 333
 - ambivalence of waste paper, 273–275, 279–281, 285, 288–289
 - equilibrium-, 118–121, 127, 133, 147
 - market-, 46, 109, 110, 121
 - natural, 109–112
 - non-negativity, 130, 133, 137, 144, 150, 158, 159
 - p. taker, 22, 126
 - relative, 112
 - shadow, 163, 167–173, 178, 181
 - soda, 294, 297, 298
 - waste paper, 163, 165, 274, 275, 279, 281, 286, 279–290, 290
- principle of hope, 241, 247, 250, 251
- production, 4
 - cost function, 21–22
 - function, 21–23, 165, 175
 - fundamental factors, 4, 49–50
 - industrial, 51, 51–53, 55
 - input-output relation, 10
 - jointness of inputs, 5
 - material description, 33–34, 39, 43, 49, 175, 177, 341
 - modern theory, 22–23
 - multi-output, 21, 141–142
 - primal and dual description, 22
 - process, 4, 25, 38, 51, 55, 164, 169
 - system, 20, 25, 38
 - technique, 184, 186, 202
 - thermodynamic efficiency, 54–62
 - thermodynamic notion, 51, 50–53, 55, 341
 - time structure, 199, 201
 - vector, 125
- public good, 48, 84, 91, 139–141, 145, 154, 231
 - impure, 84
 - theory of, 50
- purpose of an action, 229, 238
- railway, 121, 313, 315, 315, 316, 324, 325

- recycling, 100, 115, 116, 162, 170, 281–283, 286–288, 291
- responsibility, 8, 12, 146, 223, 225, 225–267, 287, 304, 340, 344
- as a pre-ethical category, 233
 - as a virtue, 235–236, 249, 253, 261–263, 345
 - ascription, 226–227, 229, 233, 305
 - based on consequences of an action, 230
 - ethics of, 223, 233, 234, 250, 258, 259
 - freedom and, 226
 - homo politicus, 261–263
 - imperative of, 223, 233, 241, 250
 - individual and collective, 259, 266, 343, 345
 - joint production and, 232, 250, 340, 343, 344
 - knowledge as a prerequisite, 238, 240, 305, 322, 340, 343
 - knowledge as an obligation, 240–242, 250, 343–345
 - legal, 225–228, 254, 255, 288, 305, 323, 343
 - limits, 226, 230, 230, 253, 255–259, 263–265, 304, 340–344
 - moral, 223–227, 254, 288, 343
 - moral obligation, 227–228, 229, 234, 249, 259, 305, 343, 344
 - negative, 227, 229, 234
 - of the economic agent, 263–265
 - political, 256, 263, 287, 305, 323, 340, 343, 345
 - political-ethical, 256, 257, 261, 265, 340, 343, 345
 - positive, 228, 229, 234, 237
 - power and, 226
 - self-, 231
 - ubiquity of phenomenon, 223
- risk society, 260
- roundaboutness, 202
- scientific realism, 153, 160
- secondary resource, 163–170, 177, 178, 273–276, 283–288, 320, 325, 338
- markets, 289–290
- sensus communis, 249, 252
- SO₂ (sulphur dioxide), 79, 93–95, 100, 139, 318, 319, 320, 323, 327–337
- environmental impact, 329–333, 338
 - environmental regulation, 329, 338
