

Figures

1.1	Map showing local productive arrangements in Brazil	24
2.1	Productivity gains and market expansion	40
2.2	Inter-related organizational changes	44
3.1	Trends in government R&D outlays as a percentage of total budgets	84
3.2	Percentage of GERD in the HE sector	87
3.3	The socio-economic and institutional conditions for an efficient venture capital market	108
4.1	Patenting and R&D in the United States, 1965–98	123
4.2	University and national laboratory patents in the USA	128
4.3	Software and biotechnology patents in the United States	128
4.4	US productivity growth, whole economy	133
4.5	The US price/earnings ratio 1881–2000	139
5.1	Resources fundamental to economic growth – combining the tangible and reproducible dimensions	146
5.2	Knowledge management in the learning organization	163
5.3	The basic model – from macro to micro and back to macro	166
6.1	An approach of interaction between the global industrial system and a national societal system	191
6.2	Level of industrialization as a result of the articulation to the global industrial system	192
6.3	Manufacturing industry trajectories between 1970 and 1990	194
6.4	Relation between patenting trends and catching-up rate, 1973–92	198
6.5	Catching up trajectories in R&D expenditure, 1981–94	199
6.6	Taxonomy of SCTCs' quality	201
6.7	Taxonomy of SCTCs' dynamism	203
7.1	Map of Brazilian macroregions and mesoregions	218
9.1	Italy: export growth in wood furniture and spectacle frames	260
9.2	Denmark: export growth in furniture and telecoms	261
13.1	Co-operation among actors in the Campina Grande productive arrangement	341
13.2	Main sources of information for innovation	344
14.1	Shoemakers: changes in cooperation with other local actors, 1995–99	360

14.2	Shoe producers: changes in horizontal cooperation, 1995–99	361
14.3	Main sources of information for innovation	368
14.4	Product and process innovations adopted by footwear firms, 1995–99	369
16.1	Evolution (a) in the number of enterprises and (b) in the number of direct jobs in the productive arrangement of ornamental stones in the state of Espírito Santo	409
16.2	Evolution of (a) the number of employees, (b) the total production volume and (c) total gross revenue of the interviewed companies	415
17.1	Segments of the soybean industry	428
19.1	Innovation system in telecom (1977/1995)	471
19.2	Innovation system in telecom (late 1990s)	497
20.1	The Embraer innovation system	501
