<i>List of contributors</i>	vii
<i>Preface</i>	xi
<i>Biography and appreciation of Professor David Boyce by Tschangho John Kim</i>	xiii
<i>Introduction</i>	xv
1. Themes in the development and application of transport planning models	1
<i>Huw C.W.L. Williams</i>	
2. A combined distribution, hierarchical mode choice, and assignment network model with multiple user and mode classes	25
<i>K.I. Wong, S.C. Wong, J.H. Wu, Hai Yang and William H.K. Lam</i>	
3. Combined travel forecasting models: formulations and algorithms	43
<i>Hillel Bar-Gera and David Boyce</i>	
4. Iteration-free microassignment	58
<i>Michael Wegener</i>	
5. Cost minimizing behavior in random discrete choice modeling	70
<i>Sven Erlander and Jan T. Lundgren</i>	
6. A modified iterative scheme for the equilibrium traffic signal setting problem	83
<i>Claudio Meneguzzer</i>	
7. Transport and location effects of a ring road in a city with or without road pricing	113
<i>Lars-Göran Mattsson and Lina Sjölin</i>	
8. Optimal integrated pricing in a bi-modal transportation network	134
<i>Hai Yang, Qiang Meng and Timothy D. Hau</i>	
9. Planning transport network improvements over time	157
<i>Hong K. Lo and W.Y. Szeto</i>	
10. Estimating link delays for arterial streets	177
<i>Elliott A. Torres, Peter C. Nelson, Nagui M. Rouphail and Joseph Raj</i>	
11. Modeling travel times along signalized streets using expected cumulative counts	210
<i>Andrew P. Tarko and Gopalakrishnan Rajaraman</i>	
12. System performance in network with parking and/or route information systems	232
<i>William H.K. Lam, K.S. Chan and B.F. Si</i>	
13. Real-time spatiotemporal data mining for short-term traffic forecasting	252
<i>Hongyu Sun, Heng Xiao and Bin Ran</i>	
14. On-line traffic assignment and network loading	260
<i>Pitu Mirchandani, Rohit Syal, David Lucas and Yang He</i>	

15. Multi-modal routing and navigation cost functions for location-based services (LBS) <i>Tschangho John Kim</i>	278
16. Supply chain supernetworks with random demands <i>June Dong, Ding Zhang and Anna Nagurney</i>	289
17. An efficient path-based algorithm for a dynamic user equilibrium problem <i>Huey-Kuo Chen, Hsiao-Chi Peng and Cheng-Yi Chou</i>	314
18. Numerical experiments with a decision support methodology for strategic traffic management. <i>Torbjörn Larsson, Jan T. Lundgren, Michael Patriksson and Clas Rydergren</i>	337
19. Free trade and transportation infrastructure in Brazil: towards an integrated approach <i>Paulo Resende, Joaquim J.M. Guilhoto and Geoffrey J.D. Hewings</i>	365
20. Accessibility and site rents in the C-economy <i>Åke E. Andersson and David Emanuel Andersson</i>	380
<i>Index</i>	391
