Contributors

**Claudia Empacher** is an independent researcher and consultant and works as a freelancer at the Institute for Social-Ecological Research (ISOE), Frankfurt am Main. She studied socio-economy with emphasis on environmental economics and economic psychology. Her main research interests are sustainable consumption, consumption behaviour, lifestyles, sustainable nutrition, social sustainability and corporate social responsibility (empacher.kofler@t-online.de).

**Konrad Götz**, sociologist, is senior researcher in the research area ‘mobility and lifestyle analysis’ of the Institute for Social-Ecological Research (ISOE), Frankfurt am Main (goetz@isoe.de). He was instrumental in developing ISOE’s social-ecological lifestyle approach and has carried out numerous qualitative and quantitative empirical studies with target group orientation in the fields of mobility, nutrition, textiles, tourism and leisure. Before his job at ISOE, he was working in the field of industrial sociology and as a market researcher at the SINUS-Institute in Heidelberg.

**Kirsten Gram-Hanssen** is a senior researcher at the governmental research institute Danish Building and Urban Research, Department of Housing and Urban Renewal (kgh@by-og-byg.dk). She is educated as a socio-engineer with a Masters and a PhD from the Technical University of Denmark. Her main research interest concerns differences in consumption practices related to housing and urban life. She has conducted numerous empirical studies on energy consumption, lifestyle and everyday life using different combinations of quantitative and qualitative methods.

**Tim Jackson** is Professor of Sustainable Development at the Centre for Environmental Strategy in the University of Surrey (T.Jackson@surrey.ac.uk). He has lectured and carried out research in the social, economic and technical dimensions of sustainable development for 18 years. His current research interests include consumer behaviour and the environment, sustainable energy systems, ecological economics and environmental philosophy. Since January 2003, he has been employed at CES on a research fellowship, funded under the Economic and Social Research Council’s Sustainable Technologies Programme, on the ‘social psychology of sustainable consumption’.
Wander Jager is a social psychologist at the University of Groningen (NL), Faculty of Management and Organisation (w.jager@bdk.rug.nl). His main interests are consumer behaviour, common resource management, behavioural dynamics, market dynamics, societal transition dynamics and multi-agent computer simulation of behaviour. He is involved in the European Social Simulation Association.

Mikko Jalas is a researcher and a PhD student at the Helsinki School of Economics, Department for Management (jalas@hkkk.fi) and holds a degree in Industrial Management. His major research interests are the producer–consumer–relationships in the eco-modernistic debate as well as the history of time-use surveys and other indices of well-being. His PhD thesis works towards a collective account of consumption and eco-efficiency.

Jesper Jespersen has been Professor of Economics at the Faculty of Social Sciences, Roskilde University since 1996 (jesperj@ruc.dk). He received his PhD from The European University in Firenze, September 1979. In 1998 and 2001/02 he was awarded a Carlsberg overseas fellowship at Churchill College, Cambridge doing research in Post Keynesian Macroeconomics. His main research interests are related to macroeconomic theory and methodology, and environmental macroeconomics. He is a member of the Post Keynesian Economic Study Group, the Nordic Network of Keynesian Inspired Economics, and the Danish Network of Environmental Economics Research.

Laurie Michaelis is an associate fellow of the Environmental Change Institute at Oxford University (laurie.michaelis@eci.ox.ac.uk). His main interests are in collective choice, cultural change and their roles in shaping consumption patterns within communities. He was director of research for the Oxford Commission on Sustainable Consumption from 1999 to 2002, and is currently working mainly with Quaker meetings in Britain.

Lucia A. Reisch is Lecturer at the University of Hohenheim in Stuttgart, Department of Consumption Theory and Consumer Policy (lureisch@uni-hohenheim.de). She holds a PhD in economics and received MBA training at UCLA (US). Her major research interest is empirical consumer behaviour research in the field of ecologically and socially responsible consumer behaviour. As a member of the Scientific Advisory Board for Consumer, Food and Nutrition Policies to the German Federal Ministry of Consumer Protection, Food and Agriculture, she was in charge of a Strategy Paper that represented the groundwork for the Ministry’s new consumer policy strategy.

Inge Røpke is a socio-economist and Associate Professor at the Technical University of Denmark, Department of Manufacturing Engineering.
and Management (ir@ipl.dtu.dk). Her main research interests are the
development and present state of ecological economics, the relations
between consumption and the environment and the interplay between
technological change and long-term changes of everyday life. She has been
actively involved in the International Society for Ecological Economics
since the early 1990s.

Elizabeth Shove is a Reader in Sociology at Lancaster University, England
(e.shove@lancaster.ac.uk). She has worked on questions of energy
consumption and environmental change for a number of years and
recently coordinated a European Science Foundation funded programme
of summer schools, workshops and exchanges on ‘consumption, everyday
life and sustainability’. She is interested in ordinary technologies and
the transformation of routines and practices and has written Comfort, Cleanliness and Convenience: The Social Organization of Normality (2003). She is currently working on kitchens, bathrooms and future concepts of comfort.

Joachim H. Spangenberg is a biologist, ecologist and economist, invited
professor at the University of Versailles Saint Quentin-en-Yvelines invited
expert at UNCSD, UNDP, OECD and national ministries, and vice-president
of SERI, the Sustainable Europe Research Institute in Vienna (Joachim.
Spangenberg@seri.de). His main interests are integrated sustainability
scenarios and indicators for policy and household use, bridging the gap
between social, institutional, economic and environmental aspects of
sustainable development and consumption. He is a member of ESEE and
ISEE, and executive committee member of the International Network of
Engineers and Scientists for Global Responsibility.

Sigrid Stagl is Lecturer at the University of Leeds, School of the Environment
(sts@env.leeds.ac.uk). She was awarded the first PhD in Ecological
Economics worldwide (Rensselaer Polytechnic Institute, Troy, NY). Her main
research interests are human behaviour and social institutions, sustainable
consumption, participatory multi-criteria evaluation and sustainable rural
development. She is currently vice-president of the European Society of
Ecological Economics.

Richard Wilk was trained as an archaeologist and cultural anthropologist,
and is now professor of anthropology and gender studies at Indiana
University (wilkr@indiana.edu). His recent research has been concerned
with consumer culture in poor countries with a focus on food and gender,
and in rich countries on energy and the moral economy. He is past president
of the Society for Economic Anthropology.
