Thoralf Dassler is a Research Fellow at Queen Margaret University College, Edinburgh. Earlier in his career Thoralf worked in Project Management at Volkswagen in Germany. His PhD was on performance and regulation in EU telecoms, which is to date the only comparative study including the 15 previous member states of the EU. Thoralf has published in internationally renowned journals such as Utility Policy.

Gregory M. Duncan consults and teaches economics, statistics, and network industries. He taught at Northwestern, the University of California, Berkeley, and others. His research appears in top journals. He is Director of Economic Consulting, Deloitte Financial Advisory Services LLP and is an academic at the Fuqua School of Business in Duke University, North Carolina. Formerly, he was Senior Vice President at NERA Consulting and, earlier, Senior Scientist at GTE (VZ) Laboratories. He received an MA in Mathematical Statistics and a PhD in Economics from the University of California, Berkeley.

Dan Elliott is a Director of Frontier Economics. He is a specialist in the economics of networks industries, focusing particularly on telecommunications, transport and water. His work covers the full range of competition, regulatory and pricing issues arising in these sectors and since privatization began in the UK in the 1980s he has advised many companies in proceedings with regulatory bodies and the Competition Commission.

Michael Harker is a member of the ESRC Centre for Competition Policy and a lecturer in Norwich Law School at the University of East Anglia. His main research interests are in the fields of UK utility regulation, competition law and public law, particularly public law litigation concerning regulation.

Anthony Heyes is Professor of Economics at Royal Holloway College, University of London, and was previously a Fellow of Nuffield College, Oxford. He has published and advised extensively in the area of environmental regulation and policy.

Cloda Jenkins is a Consultant at Frontier Economics, working across the regulation, competition and strategy practices. She has provided advice to regulators and companies on key issues affecting the postal, energy, water and transport
sectors. Cloda was awarded a PhD from University College London in 2004. Her thesis, entitled *Efficiency Properties of Price Cap Regulation*, examines the performance of RPI – X regulation in the UK water, electricity distribution and electricity transmission sectors.

**Tim Jenkinson** is Reader in Business Economics at the Said Business School, Oxford University, a Fellow of the Centre for Economic Policy Research, and a director of the economics consultancy OXERA. He has written widely on finance and economics, and his current research focuses on initial public offerings, corporate finance, private equity and the cost of capital.

**Colin Kirkpatrick** is Hallsworth Professor of Development Economics at the Institute for Development Policy and Management, School of Environment and Development, University of Manchester, UK. He has published widely on privatization and regulation issues in developing countries, and was a co-editor of *Leading Issues in Regulation, Competition and Development*, published by Edward Elgar in 2004.

**Paul R. Kleindorfer** is Anheuser Busch Professor of Management Science and Professor of Business and Public Policy at the Wharton School of the University of Pennsylvania. He has published extensively on managerial economics and regulation. He is the co-author, with Michael Crew, of several monographs on economic regulation as well as an edited book series on the postal sector.

**Catherine Liston** is a Reader in Business Economics at Royal Holloway College, University of London. She has wide research experience in environmental management issues and has published academic papers in outlets such as the *Journal of Environmental Economics & Management, Public Choice* and *Journal of Public Economics*.

**Eileen Marshall** worked as a stockbroker in the City before becoming senior lecturer in industrial economics at University of Birmingham, UK. She then worked for 14 years as a regulator – in the Office of Electricity Regulation, the Office of Gas Supply and finally the Office of Gas and Electricity Markets, where she was a Managing Director. She was awarded the CBE in 1998 for her contributions to regulatory policy.

**Laurence Mathieu** is a Research Associate in the ESRC Centre for Competition Policy at the University of East Anglia, in the UK. She is an economist primarily focusing on the UK energy markets.
Contributors

David Parker is Research Professor in Privatisation and Regulation at the School of Management, Cranfield University, UK and a member of the UK Competition Commission. He has written extensively on competition and regulation issues and was joint editor of the companion volume to this Handbook, the International Handbook on Privatization, published by Edward Elgar in 2003.

Scott Reid is Director, Water Markets at ICF Consulting. He advises regulated water utilities and water sector regulators in the UK on tariff development, business and investment planning, efficiency analysis and cost–benefit analysis. He was Head of Tariffs and Water Resource Economics at the Office of Water Services (Ofwat) from 1997 to 2000.

Martin Ricketts is Professor of Economic Organization and Dean of the School of Humanities at the University of Buckingham. He is author of The Economics of Business Enterprise and editor of Neoclassical Microeconomics, both published by Edward Elgar. With Alan Peacock he is co-author of the Edinburgh Business School’s distance learning MBA course ‘Government, Industry and Privatization’.

Colin Robinson is Emeritus Professor of Economics at the University of Surrey where he founded the Economics Department. Before that, he worked for 11 years as a business economist. His writings are mainly in energy economics and policy and regulation of utilities. In 1998 he received the Outstanding Contribution to the Profession and its Literature award from the International Association for Energy Economics.

David S. Saal is Lecturer in Industrial Economics and Deputy Director of the Centre for Performance Measurement and Management at Aston Business School, Aston University, UK. His research focuses on the impact of public policy on performance, including work on the impact of utility privatization and regulation on efficiency and productivity growth. He was joint editor of the companion volume to this Handbook, the International Handbook on Privatization, published by Edward Elgar in 2003.

Ian Savage is a member of the faculty of both the Department of Economics and the Transportation Center at Northwestern University, USA. He specializes in the analysis of transport safety regulation and safety performance. He has also published on the economics of urban public transport finances and operations and, more specifically, the impacts of competition and privatization.

Timothy J. Tardiff is Vice President with NERA Economic Consulting and specializes in telecommunications economics, including studies of demand,
Contributors

competitive trends, and regulation accommodating those trends. He has participated in proceedings in over 25 states on interconnection and other issues addressed by the 1996 US Telecommunications Act as well as in proceedings before national regulators in the USA, Peru, and New Zealand.

**Peter Vass** is Director of the Centre for the Study of Regulated Industries (CRI) at the University of Bath School of Management, UK, and a senior lecturer in accounting and finance. He was the specialist adviser to the House of Lords Constitution Committee for its 2003/4 inquiry into *The Regulatory State: Ensuring its Accountability*, published in May 2004.

**Catherine Waddams Price** is Director of the ESRC Centre for Competition Policy and Professor in the School of Management at the University of East Anglia in the UK. She has published widely on privatization, regulation and the introduction of competition, especially in energy markets, and is a member of the UK Competition Commission.

**Thomas Weyman-Jones** has been Professor of Industrial Economics at Loughborough University since 1995. His major research interests are efficiency and productivity analysis using non-parametric and parametric methods, and the theory and practice of utility regulation. He has published numerous papers on data envelopment analysis and stochastic frontier analysis for yardstick competition, and on mechanisms for incentive regulation. He has been specialist adviser to energy regulators in several European countries.
