

Figures

1.1	The circular flow of the main points for each chapter	10
3.1	OIs and economic growth	40
3.2	The OIs input as a multiplicative vector to the inputs of K and L	61
3.3	The OIs input as a distinct factor of production	61
4.1	Taylorist-Fordism system and the production possibility frontier	77
4.2	The three integrated axes	107
4.3	The relationship between the three axes	108
5.1	Firms, networks, industries and markets	138
5.2	The process of economic growth: an atomic/systemic proposition	142
5.3	The complete atomic/systemic model	144
6.1	USA, TFP of manufacturing sectors, average annual percentage growth, 1899–1937	159
6.2	USA, manufacturing sectors, real output, average annual percentage growth, 1899–1937	160
6.3	Japan, real output indexes for eight industries	162
6.4	Japan, manufacturing sectors, five-year moving average of growth rates	163
6.5	Japan, manufacturing sectors, five-year moving average of growth rates	164
6.6	Japan, eight industries, 1874–1940, two cointegrating vectors	165
6.7	Industrial chemicals, real output index	167
6.8	Electrical machinery, real output index	168
6.9	Real output, annual percentage growth rates, for the USA and Japan, 1964–98	169
6.10a	Non-ferrous metals, indices of industrial production, 1963–98	171
6.10b	Non-ferrous metals, first and second differences, 1963–98	172
6.11	Japan, real output, annual percentage growth rates, for three sub-periods	174
6.12	USA, real output, annual percentage growth rates, for three sub-periods	175
6.13a	Real output, annual percentage growth rates for the USA and Japan, 1964–76	176

6.13b	Real output, annual percentage growth rates for the USA and Japan, 1977–86	177
6.13c	Real output, annual percentage growth rates for the USA and Japan, 1987–98	178
6.14	TFP annual percentage changes 1960–80 for the USA and Japan	180
6.15	TFP annual percentage changes, two-digit sectors, 1960–70 and 1960–85, for the USA and Japan	182
6.16	Real output and TFP annual percentage changes, 1960–85, USA and Japan	183
6.17	TFP annual percentage changes, 1987–98, in Japan and the USA	185
6.18	Real output, annual percentage changes, 1987–98, for Japan and the USA	186
7.1	Chronology of implementation of JIT in the USA and Japan	214
7.2	From JIT/QC to industrial growth	218
7.3	USA, inventories to shipments ratio, 28 ISIC sectors	226
7.4a	USA, sector 382, inventories to shipments ratio	227
7.4b	USA, manufacturing total, inventories to shipments ratio, 1929–97	228
7.4c	USA, sector 383, TFP, labour productivity, inventories to shipments ratio and unemployment (total USA), in percentage changes	229
7.5	USA TFP 28 SIC sectors, 1964–96	231
7.6	USA TFP versus other variables	236
7.7	USA TFP average NBER and UNIDO for 28 ISIC sectors	238
7.8	The links between theoretical concepts and quantitative analysis	256
