

# Tables

---

1.1	Organizational entities and innovations historically	2
1.2	Average annual real growth rates of industrial production for some key periods in the USA and Japan, 1866–1996	4
2.1	Initial steps of quality control in Japan	29
3.1	Concepts related to the impact of OIs on economic growth	45
3.2	Technical innovations	49
3.3	Technological regimes (TIs oriented): links with OIs	54
4.1	Characteristics of the main production systems	81
4.2	Characteristics of focal factories	83
4.3	Comparison between the JIT/QC and non-JIT/QC systems	90
4.4	Comparison of original Fordism and JIT/QC	102
5.1	Examples of major leading firms	133
6.1	Sectoral productivity growth in the USA from 1899 to 1937	154
6.2	Sectoral growth in the USA (1899–1937, based on the sub-periods of Table 6.1)	156
6.3	Growth rates in real output from 1964 to 1998, industry differences	170
7.1	The quality paradigms	216
7.2	ASQ' s membership	217
7.3	Simple cross-sector OLS regression results	233
7.4	Comparison between the three periods, TFP and other variables	235
7.5	Average rates of growth for 85 sectors	237
7.6	Definitions of variables	241
7.7	Results of the simple OLS and 2SLS regressions	246
7.8	The vectors $V$ of selected VAR models	248
7.9	ECMs of the three VAR models	250
