Contributors

EDITOR

Michael G. Plummer is Professor of International Economics at Johns Hopkins University SAIS-Bologna. He received his Ph.D. in Economics from Michigan State University, and has been, inter alia, Research Fellow at the East–West Center in Honolulu; Research Professor at Kobe University; and Assistant and Associate Professor of Economics at Brandeis University. He has been a Fulbright Chair in Economics and Pew Fellow of International Affairs, Harvard University. His interests are mainly in the area of international economic integration and Asian economic development. He has published extensively on issues related to these areas. Many of his articles and books have been co-authored with Professor Kreinin, who was his major professor at Michigan State.

CHAPTER CONTRIBUTORS

Sven W. Arndt is the Charles M. Stone Professor of Money, Credit and Trade, and Director of the Lowe Institute of Political Economy at Claremont McKenna College. He received his Ph.D. in economics from the University of California, Berkeley in 1964. He has served on the faculties of the University of California, Los Angeles and the University of California, Santa Cruz, and has been visiting professor at Stanford University, Johns Hopkins University, SAIS-Bologna, the Institute for Advanced Studies, Vienna and the Universities of Mannheim and Konstanz in Germany. He has served as Director, Office of International Monetary Research, US Department of the Treasury, as Visiting Scholar, Board of Governors of the Federal Reserve System, and as trade project director at the American Enterprise Institute in Washington, DC. He has served as president of the North American Economics and Finance Association and is Managing Editor of the North American Journal of Economics and Finance. He has authored and edited several books and written articles in a variety of professional journals. His current research interests include trade and trade policy, cross-border production networks, exchange rate stability and macro modeling of open economies.
Chad P. Bown is an assistant professor in the Department of Economics and International Business School at Brandeis University in Waltham, Massachusetts. Professor Bown holds a Ph.D. in Economics from the University of Wisconsin at Madison. His recent publications include articles on GATT/WTO dispute settlement and the use and proliferation of antidumping measures.

James Cassing is Professor of Economics at the University of Pittsburgh and holds a B.A. in economics from the University of Kansas, and an M.A. and Ph.D. from the University of Iowa (1975). His special areas of interest include international economics and he has held visiting positions at the Australian National University, Johns Hopkins University SAIS-Bologna, and Bar-Ilan University in Tel Aviv. He has also served as Senior Trade Analysis Advisor to the Government of Indonesia, residing in Jakarta, and worked on trade and development projects in Southeast Asia, Egypt, Kenya and Zimbabwe.

Carl Davidson joined the faculty at Michigan State University in 1982 after completing his Ph.D. in economics at the University of Wisconsin with a specialty in microeconomics. He has published extensively on a wide variety of topics in academic journals. Recently, he has devoted most of his attention to the implications of international trade for labor market outcomes. He and his colleague Steven Matusz have established a broad research agenda aimed at understanding how changes in trade or trade policy affect the job prospects of workers and their wages. They are also interested in the way in which the link between trade, job prospects and the distribution of income is affected by the underlying structure of the labor market. Since 2001, Professor Davidson has been External Research Fellow with the Leverhulme Centre for Research on Globalization and Economic Policy at the University of Nottingham, UK.

Fernando De Paolis has been an assistant professor at the Monterey Institute of International Studies since receiving his Ph.D. in Urban Planning from UCLA in 2000. His research covers a number of issue areas in the Americas and beyond: preferential trade agreements (particularly NAFTA), regional development, income distribution, urbanization and development, and the links among these topics.

Jorge G. Gonzalez obtained his Ph.D. in Economics from Michigan State University. Since 1989 he has been at Trinity University, where he currently holds the titles of Professor and Chairman of the Department of Economics. His research focuses on foreign investment, the economics of undocumented immigration, international trade between the United States and Latin America, the political economy of trade liberalization and of immigration restrictions, and the Mexican economy.
**Steven Husted**, Professor of Economics and Associate Dean for Graduate Studies & Research, joined the University of Pittsburgh faculty in 1980 and became Dean in 1999. Professor Husted has published widely in the areas of international trade, international finance and monetary economics, and is co-author with Michael Melvin of a popular textbook in international economics. He has had wide-ranging international experience, including visiting appointments to the Australian National University and the University of Strathclyde in Glasgow, Scotland.

**Joon-Kyung Kim** is a Senior Fellow at the Korea Development Institute (KDI), Seoul. He gained his doctorate from the University of California at San Diego and served as Assistant Professor at Virginia Polytechnic Institute and State University before joining KDI. His recent research focuses on economic restructuring and related institutional reforms in the financial and corporate sectors in Korea. He has published various articles on Korean financial markets locally and overseas.

**Chung H. Lee** is Professor of Economics at the University of Hawaii at Manoa, where he has served as Chair of the Department of Economics and Director of Center for Korean Studies. He has also served as senior fellow and project leader at the East–West Center, Honolulu, Hawaii. He has held teaching/research positions at the University of Essex, University of Manchester, Miami University (Ohio), Kobe University, OECD Development Centre, the Kiel Institute of World Economics, the European Institute of Japanese Studies at the Stockholm School of Economics, and Johns Hopkins University SAIS-Bologna. He received a Ph.D. in Economics from the University of California at Berkeley in 1966. He has published numerous papers and edited volumes on Asian economies, their financial systems and foreign direct investment.

**Peter J. Lloyd** is Emeritus Professor at the University of Melbourne, after teaching and researching there for 20 years. His main interests are international policy and theory and microeconomic theory. He has worked as a consultant for many Australian and New Zealand Government departments and organizations and for a number of international organizations, including the GATT, WTO, OECD and World Bank.

**Steven J. Matusz** has been a member of the faculty at Michigan State University since completing his Ph.D. at the University of Pennsylvania in 1983. His doctoral thesis represented one of the earliest attempts in the literature to formally embed endogenously determined unemployment within general equilibrium models of international trade. His interest in this topic was sparked by the disconnect that he observed between popular views of the effect of trade on employment and the existing body of trade theory, which assumed that labor was always fully employed. He has published extensively in this area.
Since 2001, Matusz has been an External Research Fellow with the Lever-hulme Centre for Research on Globalization and Economic Policy at the University of Nottingham, UK.

Robert K. McCleery is an associate professor at the Monterey Institute of International Studies. He received his Ph.D. in Economics from Stanford University, and has worked for the East–West Center in Honolulu, Kobe University (Japan), and Claremont McKenna College. His research areas are immigration, FDI and preferential trade agreements in Asia and the Americas.

Rachel McCulloch is the Rosen Family Professor of International Finance at Brandeis University. Professor McCulloch received her Ph.D. from the University of Chicago and taught at Chicago, Harvard and Wisconsin before joining the Brandeis faculty in 1987. Her research focuses on international economic policy.

Marcus Noland is a Senior Fellow at the Institute for International Economics and an Associate of the International Food Policy Research Institute. He was a senior economist at the Council of Economic Advisers in the Executive Office of the President of the United States, and has held research or teaching positions at the Johns Hopkins University, the University of Southern California, Tokyo University, Saitama University, the University of Ghana, the Korea Development Institute and the East–West Center. He has been the recipient of fellowships sponsored by the Japan Society for the Promotion of Science, the Council on Foreign Relations, the Council for the International Exchange of Scholars and the Pohang Iron and Steel Corporation (POSCO). His book, Avoiding the Apocalypse: the Future of the Two Koreas, won the prestigious Ohira Memorial Prize.

Richard Pomfret has been Professor of Economics at the University of Adelaide in Australia since 1992. He was previously at the Johns Hopkins University (1979–91), Concordia University in Montreal (1976–79) and the Institut für Weltwirtschaft at the University of Kiel (1974–76). He has published 16 books and numerous articles in the areas of international trade and economic development.
Dominick Salvatore is Distinguished Professor and Director of the Ph.D. Program in Economics at Fordham University in New York. He is the author of many articles and books on international economics. He is a Fellow of the New York Academy of Sciences and Research Fellow of the Institute for European Affairs of the Vienna University of Business and Economics, as well as a consultant to the United Nations, World Bank, International Monetary Fund and the Economic Policy Institute in Washington, DC. He has taught and lectured at many universities in the United States and abroad.

Robert C. Shelburne is a senior international economist in the Division of Foreign Economic Research of the US Department of Labor. He received his Ph.D. in Economics from the University of North Carolina at Chapel Hill and has taught at Ohio University and North Carolina State University. Dr Shelburne’s areas of research are the effects of international trade on employment and wages; the macroeconomics of trade policy; the theory and estimation of intra-industry trade; trade and labor standards; Caribbean and Latin American trade patterns; and the geographical concentration of manufacturing. Dr Shelburne has published numerous articles in a number of journals throughout the world, and has authored over a dozen Congressional reports concerning the operation of US trade preference programs.

Edward Tower is a professor of economics at Duke University. After earning his Ph.D. from Harvard, he taught at Tufts, the University of Auckland, Simon Fraser University and Nanjing University, and held visiting fellowships at the Australian National University. He has also consulted with USAID, the World Bank and the Harvard Institute for International Development.
