

List of figures

4.1	Foreign control of large Canadian firms	49
4.2	Governance structures of large Canadian firms (weighted by total assets)	52
4.3	Governance structures of large Canadian firms (equally weighted)	53
4.4	Governance structures of large Canadian private sector domestically controlled firms (weighted by total assets)	54
4.5	Governance structures of large Canadian private sector domestically controlled firms (equally weighted)	55
4.6	A stylized control pyramid	57
6.1	Average annual growth rates of selected activities of multinational enterprises, 1991–2000	101
6.2	Foreign direct investment as a percentage of GDP	102
6.3	International transactions of firms based in Canada: royalties and licence fees, 1990–2001	105
7.1	Free trade equilibrium	132
7.2	Rybczynski effect	134
7.3	Multinational activity: Condition C	139
7.4	Multinational activity: Condition C'	140
8.1	Determining capacity and output with random demand	158
9.1	The distribution of world FDI	187
9.2	NAFTA partner FDI shares	189
9.3	NAFTA members' inward FDI shares: all inward FDI	189
9.4	NAFTA members' inward FDI shares: intra-North American FDI	190
9.5	NAFTA members' inward FDI shares: net of intra-North American FDI	190
9.6	Distribution of US outward FDI stocks, by region	191
9.7	Distribution of US exports and imports: developed regions	192
9.8	The measured impact of free trade on US FDI into Canada and Mexico	198
9.9	The measured impact of free trade on OECD FDI into the United States, Canada and Mexico	200
10.1	Trends in product diversification of manufacturing plants	220
10.2	Trends in share of multi-product plants in manufacturing	221

10.3	Trends in product diversification of multi-product plants in manufacturing	222
12.1	External costs associated with use of a public good (unpolluted air), and private costs associated with reducing the use of this good (reducing the amount of pollution)	276
12.2	Reaching the optimum price and quantity where an external cost is present	280
12.3	If total costs, B , including both internal private costs and external social costs, exceed the reservation price, D , there will be no output of the relevant product. Internalization of the external cost is equivalent to a ban on the production and sale of this product	282
12.4	If output, Q^P , is set above the socially optimal quantity, Q^B , uncompensated external cost will exceed appropriate consumer surplus	284
12.5	If output, Q^P , is set below the socially optimal, Q^B , appropriate consumer surplus will be lost in excess of compensation of external cost	285
