David Bailey is Professor of Economic Policy and International Business at the Institute for Economic Development Policy at the University of Birmingham, and a member of DARE (Democratic Communities in Academic Research on Economic Development). His research interests include economic development policy, with particular regard to foreign direct investment and the role of the transnational corporation, the economics of transition, and European integration and enlargement. He has undertaken extensive work on structural change in the Japanese economy. He is widely published, and is co-author of several books including (with George Harte and Roger Sugden) *Making Transnationals Accountable: A Significant Step for Britain* (Routledge, 1994).

David Coates is Worrell Professor of Anglo-American studies in the Department of Political Science at Wake Forest University. He was previously Professor of Government and Director of the International Centre for labour studies at the University of Manchester. He has published widely on a range of economic and political issues and is the author of a large number of books, including *Models of Capitalism: Growth and Stability in the Modern Era* (Polity Press, 2000) and (as editor) *Varieties of Capitalism: Varieties of Approaches* (Palgrave Macmillan, 2005). His current research interests include 'third way politics' and the responses of organized labour to global production and trade, as well as comparative political economy including Japan.

Dan Coffey is Senior Lecturer in Economics at Leeds University Business School, where he was until recently Director for all economics-related MA programmes. His research interests span organization and operations in manufacturing industries, political economy and industrial sociology. His recent projects include a book on production myths and the world car industry, published as *The Myth of Japanese Efficiency: the World Car Industry in a Globalizing Age* (Edward Elgar, 2006). He publishes in a wide range of journals and is the co-editor (with Carole Thornley) of *Industrial and Labour Market Policy and Performance: Issues and Perspectives* (Routledge, 2003). He is active in associations which include the European Union Network for Industrial Policy (EUNIP).

Keith Cowling is Emeritus Professor of Economics at the University of Warwick. His main research interests are in industrial organization, economic democracy, development and industrial policy and exploring the deficiencies of monopoly capitalism. He has played significant roles as an industrial policy adviser and published extensively in the fields of industrial economics and policy. He is the author of a number of books, including *Monopoly Capitalism* (The Macmillan Press Ltd, 1982) and (with Roger Sugden) *Beyond Capitalism: Towards a New World Economic Order* (Pinter Press, 1994). Recent research includes innovative work on the causes of 'hollowing out' in Japan. He is a member of DARE (Democratic Communities in Academic Research on Economic Development) and a founding member of the European Union Network for Industrial Policy (EUNIP).

Donald W. Katzner is Thompson Professor in the Department of Economics at the University of Massachusetts, Amherst. In a distinguished career he has pursued research in a number of areas, with work on microeconomics and general equilibrium theory and a series of contributions to the study of problems involving non-measurable variables, the firm in organization theory, and the analysis of historical time and non-probabilistic uncertainty. As well as a range of papers he is author of a number of books, including *Analysis without Measurement* (Cambridge University Press, 1983), *The Walrasian Vision of the Microeconomy* (University of Michigan Press, 1989), *Time, Ignorance, and Uncertainty in Economic Models* (University of Michigan Press, 1998) and *Unmeasured Information and the Methodology of Social Scientific Inquiry* (Kluwer, 2001). In addition he has worked on the general impact of culture on economic behaviour with a particular focus on Japan and the Japanese economy as a special illustrative case.

Hiroyuki Odagiri is Professor of Economics in the Graduate School of Hitotsubashi University, Tokyo. His major research interests are in industrial organization with a particular focus on the economics of the firm and innovation, which he has extensively explored in the context of the competitiveness of Japanese firms and the Japanese economy. He is widely published in books and journals, and is the author of *Growth through Competition, Competition through Growth* (Oxford University Press, 1992) and (with Akira Goto) *Technology and Industrial Development in Japan* (Oxford University Press, 1997). His opinions have been sought by bodies which include the World Bank Institute and the Japanese Government, and he is currently Director of Research at the National Institute of Science and Technology Policy in Japan.

Terutomo Ozawa is Professor of Economics at Colorado State University. His current research focuses on the theory of international production with particular regard to the relationships between foreign direct investment, economic development and competitiveness, and on the applicability of Japanese developmental paradigms to other regional contexts. He is extensively published in a wide range of journals and is the author of a large number of books, which include *Institutions, Industrial Upgrading and Economic Performance in Japan: The 'Flying Geese' Paradigm of Catch-Up Growth* (Edward Elgar, 2005). His other research interests include flexible versus mass production methods and the impact on international trade and investment patterns.

Ulrike Schaeede is an Assistant Professor at the Graduate School of International Relations and Pacific Studies at the University of California, San Diego. She has held visiting teaching positions at the Haas School of Business at the University of California Berkeley and Hitotsubashi University, Tokyo. She has been a visiting scholar at the research institutes of the Bank of Japan as well as Japan's Ministry of Finance and the Ministry of International Trade and Industry. Her current research interests include trade associations and government–business relationships in Japan and Japan's financial organization, and the role of the Ministry of Finance in Japan. She has published in leading academic journals, and is the author of *Japan's Managed Globalization: Adapting to the 21st Century* (M. E. Sharpe, 2000).

Roger Sugden is Professor of Commerce at the Institute for Economic Development Policy at the University of Birmingham, and a member of DARE (Democratic Communities in Academic Research on Economic Development). His research interests include economic governance, development and democracy, with a particular focus on transnational corporations, small firms and industrial clusters. He is widely published and recent publications include (with Christos Pitelis and James Wilson) the edited book *Clusters and Globalization: The Development of Economics* (Edward Elgar, 2006). He has played leading roles in international research and learning projects, and is a founding member of the European Union Network for Industrial Policy (EUNIP).

Carole Thornley is Senior Lecturer in the School of Economic and Management Studies at the University of Keele, where she is also Director of Postgraduate Research for the Institute for Public Policy and Management. She is an expert on employment systems and structures, industrial organization and business strategy, and has previously worked for

major global manufacturing multinationals in Belgium. She is widely published in books and journals which include the *British Journal of Industrial Relations*, the *Industrial Relations Journal*, and *Work, Employment and Society*, and has worked on numerous commissioned projects. She is an experienced adviser to trade unions and has submitted evidence to many official inquiries and reviews. She is co-editor (with Dan Coffey) of *Industrial and Labour Market Policy and Performance* (Routledge, 2003).

Philip R. Tomlinson is Lecturer in Business Economics in the School of Management at the University of Bath, and a member of DARE (Democratic Communities in Academic Research on Economic Development). His research interests are in industrial economics and political economy, with a particular focus on globalization, economic governance, development and industrial policy. He has published singly and jointly in a number of books and leading journals which include the *Economic Journal*, *The International Review of Applied Economics* and *The Manchester School*. His recent research includes collaborative work on the effects of globalization and the 'hollowing out' of the Japanese economy that has drawn international media attention. He is a member of the European Union Network for Industrial Policy, (EUNIP).

Richard A. Werner is Professor of International Banking at the University of Southampton. His research interests are in financial markets and banking institutions, with a particular emphasis on the impact of Japanese financial institutions upon the macro economy. He has published extensively in a number of leading international journals and is the author of *Central Banking and Structural Changes in Japan and Europe* (Soshisha Press, 2003) as well as the widely acclaimed study *New Paradigm in Macroeconomics: Solving the Riddle of Japanese Macroeconomic Performance* (Palgrave Macmillan, 2005). He has extensive experience in working for research institutes and the financial sector in Tokyo, where he was chief economist at Jardine Fleming Securities (Asia) Ltd.
