

Contributors

Marke Ambard is with the Canadian Forest Service.

Tom Beckley is a professor in the Faculty of Forestry and Environmental Management at the University of New Brunswick. His research focuses on forest communities, public participation in forestry and indicators of social sustainability. He recently co-edited *Two Paths Toward Sustainable Forests: Public Values in Canada and the United States* with Bruce Shindler and Carmel Finley.

Jean-Eudes Beuret is a lecturer at the Agronomic Superior National School of Rennes, France and was an expert for the Territorial Development Service of the Organisation for Economic Co-operation and Development from 1997 to 2001. He specializes in rural amenity policies.

Joan M. Brehm is an assistant professor in the Department of Sociology and Anthropology at Illinois State University. Her areas of teaching expertise focus on community, environment and research methods. Her current research focuses on an examination of the role of natural environment amenities in community attachment and their relationship to community well-being in rural areas.

Jacqueline Candau holds a PhD in sociology. She is a research fellow in Cemagref (Research Institute in Agricultural and Environmental Engineering), a French public research institute under the jurisdiction of the Ministry of Research and Ministry of Agriculture. She has expertise in rural and environmental sociology, dialogue process and cognitive elaboration for collective actions. Her research activities address local and rural projects with environmental aims and the evolution of the social contract between agriculture and society in France.

Greg Clendenning recently completed his PhD in the Department of Forest Ecology and Management at the University of Wisconsin-Madison. His research interests include natural resources management, land-use planning, community change and community development. He currently resides in Washington, DC.

Christy Dearien is a research associate in the Department of Agricultural Economics and Rural Sociology at the University of Idaho. She is the

co-author (with Priscilla Salant) of the book *Local Government Guide to the Internet* published by Tennessee Valley Authority Rural Studies and the National League of Cities. She currently splits her time between managing the Indicators Website for the Northwest Area Foundation (www.indicators.nwaf.org) and working on publications about rural Idaho and the Northwest.

Steven C. Deller is professor in the Department of Agricultural and Applied Economics at the University of Wisconsin-Madison and community economist with the University of Wisconsin-Extension. His work focuses on regional economic modeling with an eye toward economic development policy. His work has appeared in *Review of Economics and Statistics*, *American Journal of Agricultural Economics*, *Land Economics* and the *Journal of the Community Development Society*. He currently serves as co-editor of the *Journal of Regional Analysis and Policy*.

Philippe Deuffic holds a MS degree in landscape planning. He is a research fellow in Cemagref (Research Institute in Agricultural and Environmental Engineering), a French public research institute under the jurisdiction of the Ministry of Research and Ministry of Agriculture. Using the theoretical frame of common-sense knowledge sociology, he works on social representations of the environment and of the multifunctionality concept by farmers and foresters and their consequences with respect to farming and forestry public policies.

J.C. Dissart holds an engineering degree from Ecole Supérieure d'Agriculture de Purpan (Toulouse, France), an MS in agricultural economics from McGill University and a PhD in urban and regional planning from the University of Wisconsin-Madison. His research interests include regional economic development and natural resource management. He is currently an assistant professor at the Institut Supérieur d'Agriculture in Lille, France.

Donald B.K. English is a social scientist with the US Forest Service in Athens, Georgia. His work focuses on the role of forest amenities in rural economic growth and development. His work has appeared in *Journal of Regional Science*, *Journal of Regional Analysis and Policy* and *Annals of Tourism Research*.

Sylvie Ferrari holds a PhD in economics. She is assistant professor in economics at the University of La Réunion (France). As a researcher in Cemagref (Research Institute in Agricultural and Environmental Engineering), a French public research institute under the jurisdiction of the Ministry of Research and Ministry of Agriculture, she works on energy, groundwater resource and sustainable development economics and

landscape valuation. Her approach is based on a paradigm that takes into account thermodynamics and ecology in relation to economics. The main purpose of her current research is to study the implication of irreversibility which results from the entropy law concerning the sustainability of the production process and the role of qualitative change. Some of her recent work in progress deal with a fund-flow approach of the agricultural production process with a particular emphasis on landscape and waste within a joint production model.

Donald R. Field is professor in the Departments of Forest Ecology and Management and Rural Sociology at the University of Wisconsin-Madison. He is the founder and executive director of the International Symposium on Society and Resource Management. He recently published *National Parks and Rural Development: Practice and Policy in the United States* (Island Press, 2000) and *Ecosystem Management* (Taylor & Francis, 1999).

W. Richard Goe is professor in the Department of Sociology, Anthropology and Social Work at Kansas State University. He conducts research in community and regional development.

Stephan J. Goetz is the director of the Northeast Regional Center for Rural Development and professor in the Department of Agricultural Economics and Rural Sociology at the Pennsylvania State University. He has published or presented over 150 professional papers, including 10 book chapters and he is the senior co-editor of two books. He chairs the Social Sciences Subcommittee of the Experiment Station Committee on Organization and Policy (ESCOP) and he is a member of the Board of Directors of the Center for Rural Pennsylvania.

Gary Paul Green is professor and chair in the Department of Rural Sociology at the University of Wisconsin-Madison. His research, teaching and outreach activities focus on community and regional development. His recent books include *Asset Building and Community Development* (Sage Publications, 2002) and *Places of Consumption: Restructuring and the Growth of Nonmetropolitan Localities in the United States* (SUNY Press, forthcoming).

John Hintz is a PhD candidate in geography at the University of Kentucky. His research applies various theoretical approaches to the relationship between nature and society with a regional focus in the US West about which he has published in the journal *Capitalism, Nature, Socialism*.

Dana A. Jensen is a professional planning consultant who provides a variety of planning services to communities throughout the upper

Midwest. Her work focuses on rural community planning, growth management in the urban fringe and multi-jurisdictional planning. She holds an MS degree in Urban and Regional Planning and a second MS in Land Resources through the Gaylord Nelson Institute for Environmental Studies, both at the University of Wisconsin-Madison.

Kenneth M. Johnson is a demographer and professor in the Department of Sociology at Loyola University-Chicago. His research examines population distribution trends in the United States with a particular focus on demographic trends in nonmetropolitan areas.

Karlheinz Knickel is deputy director and manager of the Institute for Rural Development Research at Johann Wolfgang Goethe University in Frankfurt, Germany. He has long-term experience in agricultural, agri-environmental and rural development policy analysis, monitoring and evaluation. He works as a senior advisor for national and regional level governmental bodies as well as agricultural, rural development and environmental agencies.

Marie-Christine Kovacshazy is a scientific advisor in the Commissariat General du Plan, services du Premier ministre, France, and vice-chair of the working group on rural policies of the Territorial Development Policies Committee of the Organisation for Economic Co-operation and Development.

Nathalie Lewis holds a PhD in sociology and a MS degree in political sciences. She is a research fellow in Cemagref (Research Institute in Agricultural and Environmental Engineering). She has expertise in environmental sociology. Her research activities address local and rural social dynamics particularly through forest areas and watershed ecosystems.

Victor Lledo is a former graduate research assistant in the Department of Agricultural and Applied Economics at the University of Wisconsin-Madison. He is currently an economist with the International Monetary Fund. His dissertation focused on institutional changes in the public sector of Brazil with attention to intergovernmental arrangements.

David W. Marcouiller is professor in the Department of Urban and Regional Planning and a resource economist with the University of Wisconsin-Extension. His work focuses on the linkages between natural resources and rural economic development with a particular interest in resource dependency and the tourism-timber tradeoff. He serves as co-editor of the *Journal of Regional Analysis and Policy* and has recently completed a co-authored textbook entitled *Community Economics: Linking Theory and Practice*.

Mbolatiana Rambonilaza holds a PhD in economics. She is a research fellow in Cemagref (Research Institute in Agricultural and Environmental Engineering). She has expertise in valuation methods for environmental goods, in public economics and in econometrics. Her research activities address the valuation of rural amenities and economic analysis of the multifunctionality of agriculture and landscape.

Eric Olson is a graduate student in the Department of Urban and Regional Planning at the University of Wisconsin-Madison. He has worked as an urban forester in the Twin Cities of Minnesota and as a recreation planner for the Wisconsin Department of Natural Resources. He recently began a teaching and extension position at the Center for Land Use Education at the University of Wisconsin-Stevens Point.

Sarah Peter is a junior researcher at the Institute for Rural Development Research at Johann Wolfgang Goethe University in Frankfurt, Germany. She is completing her PhD at the Institute for Society and Policy Analysis in the field of urban development. Her main research interests are regional development processes, regional partnerships and constellations of actors and urban-rural relations.

Thomas Michael Power is professor and chair of the Economics Department at the University of Montana. He received his PhD from Princeton University in 1970. He specializes in natural resource and regional economics. He has authored five books in these areas, and most recently *Post-Cowboy Economics: Pay and Prosperity in the New American West* (Island Press, 2001).

Gundars Rudzitis is professor in the Department of Geography at the University of Idaho. He is the author most recently of *Wilderness and the Changing American West* (John Wiley and Sons) and the forthcoming *The Ongoing Transformation of the American West* (University of Chicago Press). When he is not writing about the American West he enjoys hiking and backpacking on the public wildlands.

Martin Shields is an associate professor of agricultural and regional economics at the Pennsylvania State University and Director of Penn State's Center for Economic and Community Development. His ongoing research examines labor markets and economic growth in rural areas. Shields earned his PhD in agricultural and applied economics in 1998 from the University of Wisconsin-Madison.

Michael D. Smith is an associate professor in the Department of Environmental and Natural Resource Sciences at Humboldt State University in Arcata, California. His research interests include rural com-

munity planning and development; environmental and social impact assessment, outdoor recreation-related tourism planning and management, planning and management of parks and protected areas, public environment and land use attitudes and public participation and involvement strategies.

Lisa M. Spadoni graduated from Western Washington University's Huxley College with a BS degree in environmental science and continued on to a master's of science program with Humboldt State University. She is currently finishing her MS degree in Natural Resources Planning and Interpretation and working as an assistant planner with City of Goleta, California.

Richard Stedman is an assistant professor in the Department of Agricultural Economics and Rural Sociology at Penn State University. His work examines sense of place and the well-being of resource dependent communities.

Susan I. Stewart is a research social scientist with the US Department of Agriculture North Central Research Station. She has conducted research on the wildland-urban interface, second-home decision making and has studied the linkages between second homeownership and migration.

Sara Wallace is a graduate student in the Faculty of Forestry and Environmental Management at the University of New Brunswick. Her research is on public involvement processes in forest management planning in Newfoundland.

Quiyan (Cindy) Wang is a postdoctoral fellow at the Northeast Regional Center for Rural Development at the Pennsylvania State University. She earned her MS and PhD degrees in agricultural economics and demography from the Pennsylvania State University and a bachelor's degree in agricultural finance from China Agricultural University.
