Contributors

Chang-Hee Christine Bae is Associate Professor in the Department of Urban Design and Planning at the University of Washington, Seattle. Her current research interests include transportation and the environment, environmental justice, land use regulations, international urban development and the use of information technology in planning education.

Hugh Barton is Reader in Sustainable Settlements at the University of the West of England in Bristol, England. His current work includes research on neighborhoods and sustainability in the outer city, research into walking and local facilities and consultancy projects on urban spatial frameworks and sustainability appraisal.

Martin A. Bierbaum is Executive Director of the Municipal Land Use Center at the College of New Jersey. Dr. Bierbaum was formerly a member of the Rutgers University graduate faculty in public administration and worked in various capacities with New Jersey’s State Development and Redevelopment Plan, the New Jersey Redevelopment Authority and the New Jersey State Planning Commission.

Robert Cervero is Professor and Chair of City and Regional Planning at the University of California-Berkeley. He is currently conducting an evaluation of car sharing in San Francisco, a cross-national study of social exclusion and transportation, research on how built environments influence physical activity in Bogotá and case-based work on transportation and sustainable urbanism.

Kelly J. Clifton holds a joint appointment as an Assistant Professor in the Department of Civil and Environmental Engineering and the Urban Studies and Planning Program at the University of Maryland. Dr. Clifton’s research focuses on the influence of the built environment on travel choices.

Charles Connerly is the Chair and William G. and Budd Bell Professor of Urban and Regional Planning at Florida State University. His research and teaching characterize his scholarly focus and his philosophy of creating a better world for others, particularly the underserved. In addition to his research, Dr. Connerly has worked with numerous groups and projects to enhance neighborhoods and provide affordable housing.
**John W. Frece** is Associate Director of the National Center for Smart Growth Research and Education at the University of Maryland. He has been a spokesman, policy adviser and writer on Smart Growth issues. He previously served on the staff of former Maryland Governor Parris N. Glendening, working primarily on Maryland’s Smart Growth initiative.

**Jill Grant** is the Director of the School of Planning at Dalhousie University in Halifax, Nova Scotia. Her work looks at the cultural context of community planning, exploring the values that planners, developers and residents bring to the places they design and inhabit.

**Huibert A. Haccoû** is Associate Professor at the Saxion University for Professional Education in the city of Deventer in The Netherlands. He teaches urban and regional planning at the School for the Built Environment. He also serves as a consultant for strategic public policy making and as process manager in the field of spatial planning and the environment. He works as programme manager for the Habiforum Foundation and directs the INTERREG IIIC operation MILUnet a European Network Network on Multifunctional and Intensive Land Use.

**Cliff Hague** is a Professor of Planning and Spatial Development at the School of the Built Environment, Heriot-Watt University in Edinburgh, Scotland. His recent research projects include *Good Practice Guidelines on Planning for Diversity* for the Office of the Deputy Prime Minister and a paper entitled *Participatory Planning for Sustainable Communities: International Experience in Mediation, Negotiation and Engagement*.

**Rodney Harrell** is a PhD candidate in Urban Planning and Design at the University of Maryland. His research interests include public policy and urban development, particularly reinvestment in older communities, and his dissertation focuses on housing preferences and neighborhood formation in Prince George’s Country, Maryland.

**Leonie B. Janssen-Jansen** currently holds a postdoctoral position at the Amsterdam Study Center of the Metropolitan Environment at the University of Amsterdam. She received her PhD in Urban and Regional Planning from Utrecht University with a dissertation entitled: *Challenged Regions: Exploring New Paths for Strategic Spatial Planning Inspired by Growth Management*.

**Gerrit-Jan Knaap** is Professor of Urban Studies and Planning and Executive Director of the National Center for Smart Growth Research and
Education at the University of Maryland. Dr Knaap’s research interests include the economics and politics of land use planning, the efficacy of economic development instruments and the impacts of environmental policy.

**Andréa Livi Smith** is a PhD candidate in Urban Planning and Design at the University of Maryland. Her research interests include transportation and urban design, and her dissertation focuses on the influence of perceptions on the relationship between the built environment and walking behavior.

**Harry Timmermans** is Professor of Urban Planning at the Eindhoven University of Technology in The Netherlands. His research interests concern the development of models of spatial choice behavior and the development of decision support systems in a variety of application domains.

**Jef E.J. Van den Broeck** is a Professor of Spatial Design and Planning Theory at the Katholieke Universiteit in Leuven, Belgium. His expertise lies in the area of spatial planning and design at the international, national, regional and local levels of government.

**Han Verschure** is Professor at the Department of Architecture, Urbanism and Planning, Catholic University of Leuven (KULeuven), Belgium. His fields of specialization include Human Settlements, Development Policies and Planning, and Sustainable and Environmental Planning.

**Claus-Christian Wiegandt** is a Professor for Urban Geography at the University of Bonn in Germany. Dr Wiegandt received his PhD in 1989 from the University of Münster, where his doctoral thesis was on soil contamination and urban development.
