Contributors

Margunn Aanestad, PhD, holds a post-Doctoral position in the Department of Informatics at the University of Oslo. She worked within health care and telecommunications before her doctoral study of surgical telemedicine. Her research interests are broadly related to IT in health care.

Jennifer Blechar holds an MSc in Analysis, Design and Management of Information Systems from the London School of Economics and Political Science, UK and a BA in Mathematics from Bryn Mawr College, USA. She is a PhD candidate and research fellow with the Department of Informatics at the University of Oslo, Norway and has several years’ experience as a consultant within the telecommunications field. Her research interests involve the design, implementation and use of rich media content services in the mobile industry.

Claudio Ciborra graduated in Electronic Engineering from the Politecnico di Milano, Italy, before pursuing studies in management, economics and organization theory at the University of California, Los Angeles and Harvard University. He held teaching positions at a number of Italian universities and was a Visiting Professor in many European and American universities. He was Chair Professor at the Department of Information Systems and Research Professor at the Centre for the Analysis of Risk and Regulation at the London School of Economics and Political Science. He carried out extensive research in the fields of new technologies, organizational design, learning, knowledge and change.

Miria Grisot, MA, is a PhD candidate at the University of Oslo, in the Department of Informatics at the Information Systems Group, Oslo, Norway. Her research interest is on issues of coordination related to the implementation of IT in hospitals. She holds an MA in Political Science from the University of Bologna, Italy.

Ole Hanseth, PhD, is Professor in the Department of Informatics at the University of Oslo, Norway. His research focuses mainly on the interplay between social and technical issues in the development and use of large-scale networking applications. He is also Visiting Professor at the London School of Economics, Department of Information Systems.
Edoardo Jacucci works in the Strategy Department at Accenture in Oslo. He holds a PhD in Information Systems from the University of Oslo and an MSc degree in Information Systems Engineering at the Politecnico di Milano, Italy. His research focuses on socio-technical conceptualizations of standards and on processes of standard-making in the health care sector in Norway and in South Africa.

Jannis Kallinikos (PhD Uppsala University, Sweden) is a Reader in the Department of Information Systems at the London School of Economics. His major research interests involve the institutional construction of predictable worlds (that is, the practices, technologies and formal languages by which organizations are rendered predictable and manageable) and the investigation of the modes by which current institutional and technological developments challenge the organizational forms that dominated modernity. Some of these themes are analysed in detail in his recent book The Consequences of Information: Institutional Implications of Technological Change (Edward Elgar, 2006).

Eric Monteiro is Professor in Information Systems at the Norwegian University of Science and Technology (NTNU) and holds an adjunct position at the University of Oslo. Monteiro is broadly interested in organizational implementation and use of integrated information systems. Empirically, his studies cover both public organizations (in particular the health care sector) as well as larger business organizations. He has published his work in outlets including Computer-supported Cooperative Work, MIS Quarterly, Science, Technology & Human Values, The Information Society, Information and Organization, Systems Practice and Action Research, Information Technology for Development and Methods of Information in Medicine.

Daniel Osei-Joehene is a PhD candidate at the London School of Economics. His research interests focus on risks related to large scale information systems and organizations.

Knut H. Rolland is Associate Professor at the Department of Computer and Information Science at the Norwegian University of Science and Technology (NTNU), Norway. His main research interest is the management of information systems across global organizations. In particular, his research explores various intended and unintended consequences of the socio-technical processes of integration and standardization of information systems. His research has been published in a wide range of international IS conferences as well as in The Information Society journal.
