post-Keynesian macroeconomic methodology, terminology 9–14
post-Keynesian methodology, critical realism 81
post-Keynesian theory 19, 203
concept of equilibrium in 159
post-Keynesian vision 222, 226
post-Keynesianism 15, 35–9, 62, 126
and equilibrium 36–9, 157, 166–76
and uncertainty 36–9, 166–76
post-Keynesianism (I), growth, price theory and income distribution 16, 39–43
post-Keynesianism (II), money and inflation 16, 43–6
post-Keynesianism (III), need for methodology tackling reality 16, 46–8, 124
postmodernism 66
power relations 168
power structures 72, 104, 228
preference structure 184
price theory, and income distribution 41–3
price vector 157, 164
prices, and competition 210
principle, definition of 217
The Principles of Economics 3, 199
private sector savings balance 151, 152
probability concept 126
production function 214
and demand for labour 215
‘profit-equilibrium’ 204–5
profitability 210–11
property market, macro-price on 102–3
‘prospect theory’ 123, 131
public sector budget 151
Macroeconomic methodology

quaesitum 38, 39, 175–6, 228
quantity theory of money and prices 3–4, 21

random events 137
randomness 117
rational behaviour 86
‘rational belief’ 126
‘rational expectations’ 6, 29, 31, 56, 69, 88, 143, 164, 183
rational individual actions, under conditions of uncertainty 128–30
rationality 81–2
real level 57, 63, 78, 79, 81, 83–4, 157, 162, 164, 177, 178, 221, 226
realism 24, 25, 35, 36, 46–8, 57–8, 94
basis for 66
in post-Keynesianism 222
A Realist Theory of Science 66
reality 80, 83
stratified 71–3, 79
reflection, ontological 96–8
relativism 59, 66, 89
relevance, scientific 11, 13, 25, 67, 82, 87, 94, 122, 139
representative agent 12, 13, 31, 124, 135, 141, 142, 143, 144, 183–4, 186, 187–9, 193, 194, 195
research programmes 66, 67–8, 74
Lakatos on 60–61
retroduction 56–7, 77–9, 133–4, 221, 222
risk 110
compared to uncertainty theory 113–14
definition of 113
Keynes on 114–16
versus uncertainty theory 121–2
Robbins, L. 64
Robinson, J. 16, 17, 18, 40, 41, 52, 125, 164, 165
Rogers, C. 128, 211, 218
Romer, D. 26, 36, 216, 223

sales expectations 201
Samuelson, P. 16, 40, 51, 64, 165
Sargent, T.J. 16, 20, 28, 50, 76, 180–81
saving, increased propensity 191–3
saving-investment analysis 193
Say’s Law 34, 176, 207, 213, 217
scenario
best-case 88, 131
growth 209
realistic 230
worst-case 120
sector balances 150–52
‘semi-closed-system analysis’ 135, 140
semi-closures 139, 150, 153, 202
and constant wage-unit 208–9
temporary 167–70, 173
services, market for 102
Setterfield, M. 158, 167, 172
shifting equilibrium method 172–3
simulation models 165
simultaneous
alignment 157
analysis 153
demand 101
Skidelsky, R. 20, 37, 110, 122, 125, 127, 179, 225
SMEC model 180
Smith, A. 1, 13, 14, 17, 21, 127
social embeddedness 91, 92
‘social reality’ 91, 94–5
socially embedded macroeconomic theory 96
Solow, R.M. 7, 8, 11, 16, 40, 165
growth model 7–9, 17
Sonnenschein, H. 6, 124
Sorensen, P.B. 17, 26, 32, 51, 160, 223
Sraff a, P. 52
‘stagflation’ 181
‘standstill’ as equilibrium 37, 157–8, 212
stationary state equilibrium 8
stock equilibrium 8, 161, 179
strategic see operational
stratified reality 71–3
stratum
