Contributors

Oliver Bruttel was Research Fellow and PhD Scholar at the Social Science Research Center Berlin (WZB) from 2002 to 2005. Besides several articles on the reform of the public employment service, he has also published articles on more general labour market policy topics (e.g. the Hartz reforms and welfare-to-work policies) in international referred journals such as *West European Politics, Policy & Politics* and the *International Review of Administrative Sciences*. After completing this PhD he joined McKinsey & Company, the international business consultancy.

Lennart Delander is a senior research fellow at the Centre for Labour Market Policy Research at Växjö University. He has conducted studies in the field of labour economics and has specialized in evaluation of labour market policy.

Lieve De Lathouwer teaches ‘Labour market and social policy’ at the University of Antwerp and ‘Social policy and the Welfare State’ at the Catholic University of Brussels. She is a member of the Centre for Social Policy at the Faculty of Political and Social Sciences of the University of Antwerp. She conducts various research projects on labour market dynamics, education and social security with a special focus on social inequalities and poverty. She is a member of the EQUALSOC and the COST A23 network.

Linda van Donk was an intern at the research institute SEOR in 2005. Under the supervision of Jaap de Koning she wrote her thesis on the effectiveness of the Dutch Public Employment Services. In August 2005, she graduated at the Maastricht University in International Economic Studies. After her graduation, she joined Hay Group, a global management consultancy.

Christoph Hilbert is research fellow at the Social Science Research Center Berlin (WZB), Labour Market and Employment Research Unit. He graduated as an economist at Humboldt-University Berlin. His main research interests are regional labour market policies, benchmarking, skills and compensation.
Jaap de Koning is Professor of labour market policy at the Erasmus University Rotterdam since 1998 and Director of the research institute SEOR since 2000. Before 2000, he was in charge of the labour market department of the Netherlands Economic Institute. His main fields of research are evaluation of labour market policies, inequality in the labour market, and education and technological change in relation to the labour market.

Jonas Månsson is associate professor at the Department of Economics and Statistics, Växjö University, and researcher at the Centre for Labour Market Research (CAFO), Sweden. He has published papers in three fields: labour economics, industrial organization and production economics, as well as combinations thereof.

Nigel Meager is Director of the Institute for Employment Studies (IES) at the University of Sussex. He has previously held research posts at the Social Science Research Center Berlin (WZB) and at the Universities of Glasgow and Bath. His research interests include the evaluation of active labour market measures, international comparisons, the barriers faced by disadvantaged groups (such as disabled people) in the labour market, and the role of self-employment in the economy and labour market. He has published widely on these and other topics. He has acted as an adviser to several UK ministries, and committees of the UK parliament, as well as the European Commission and OECD. He is a co-ordinator of the Mutual Learning Programme of the European Employment Strategy on behalf of the European Commission.

Hugh Mosley received his PhD in Political Science from Duke University (USA). He is a Senior Research Fellow at the Social Science Research Centre Berlin (WZB), where he has worked since 1986. He has done comparative and interdisciplinary research on a wide range of labour market topics. His recent work has been on implementation issues, especially public employment service reforms and on policy evaluation. He is currently directing a major evaluation of the Hartz-Reforms in employment services for the German Ministry of Labour. He has published widely on these issues and has frequently worked as a consultant to the European Commission, the OECD and other governmental organisations.

Kai-Uwe Müller is a researcher in the Labour Market and Employment Research Unit at the Social Science Research Center Berlin (WZB). He has a diploma in Political Science from Berlin's Free University and is currently finishing a second degree in Economics. His interests are in applied econometrics, especially labour market policy evaluation and regional labour markets. The focus of his current work is on the impact of sanctions on the search behaviour of the unemployed.
Idesbald Nicaise is head of the research unit ‘Education and labour market policy’ at HIVA (Higher Institute of Labour Studies, University of Leuven. As a professor of economics he teaches various subjects in the field of education and economics. His own research focuses mainly on education and labour market policies for disadvantaged groups.

Erik Nyberg is a researcher at the Centre for Labour Market Policy at Växjö University. His research focuses on evaluation of labour market policy programmes.

Annelies Roggeman is a research assistant in the Department of Accounting and Finance, University of Antwerp. Her main research interests are labour market policy, corporate finance and corporate governance. In the framework of her doctoral research she examines the role of dividends of Belgian listed companies during the twentieth century.

Ludo Struyven is a researcher at the higher Institute of Labour Studies at the University of Leuven, Belgium. He specializes in implementation research, comparative research and public policy analysis of labour market policy and institutions. His PhD dissertation (Department of Sociology, University of Leuven), published in 2006 (in Dutch), deals with the emergence and consequences of market competition on employment services. A revised (English) version is forthcoming in 2007. He has recently published in the Journal of European Social Policy, the Australian Journal of Labour Economics, the OECD Social, Employment and Migration Working Papers Series as well as in several book projects.

Gerlinde Verbist is postdoctoral researcher at the Centre for Social Policy (University of Antwerp). Her main research interests include microsimulation modelling and applications, measurement of income inequality and redistribution, higher education funding policies, the interaction between taxes and the welfare state.
