

Figures

3.1	Keynes's <i>General Theory</i> model of interest rate determination	89
3.2	The neo-Keynesian model of the money supply process	91
3.3	The neo-Keynesian model of the money supply process with interest rate targeting by the central bank	92
3.4	Competing Post Keynesian theory of endogenous money	94
3.5	The horizontalist model of the money supply process	96
3.6	Determination of the supply of high-powered money, the money supply, bank lending and interest rates	99
3.7	The LM schedule in an endogenous money system	104
3.8	The 'corridor' model of short-term interest rate management	105
4.1	The emission of central-bank money as a flow on the interbank market	118
6.1	The evolution of fixed investment, exports and trade account with respect to GDP	158
6.2	Gross domestic product and credit relations	159
6.3	Net internal credit and international reserves with respect to the monetary base	160
6.4	Exchange-rate depreciation, interest rates and inflation rates	161
6.5	Exchange-rate depreciation and real exchange-rate movements	162
7.1	Gold stocks and flows	184
8.1	Kaldor's IS–LL diagram	190
8.2	Money-market equilibrium	191
8.3	A horizontal money-supply curve	196
9.1	Keynes's principle of effective demand in the D–Z model	211
9.2	Using IY–LM to illustrate Keynes's concept of long-period unemployment equilibrium in a laissez-faire economy	213
10.1	The horizontal supply of loans	231
12.1	The loanable funds theory	267
12.2	The liquidity preference theory	268
12.3	Horizontalism	271
12.4	Real interest rate determination	278
13.1	Wicksell's theory of interest	291

13.2	A change in policy-determined interest rates	297
13.3	Real GDP growth, credit spread and interest rate on ten-year government bonds, Australia, 1980–2015	303
14.1	New Zealand CPI inflation rate and first mortgage interest rate, March 1970–December 2006	311
14.2	New Zealand Phillips curve, March 1985–March 1993	313
14.3	New Zealand real exchange rate, March 1970–December 2006	314
14.4	Process analysis of Keynes’s model of investment finance	318
14.5	New Zealand share price index, January 1980–December 1989	320
14.6	New Zealand house inflation and interest rates, 1982–2006	324
15.1	The horizontalist approach of endogenous money and credit	331
15.2	The structuralist approach with incomplete accommodation of the central bank	334
15.3	The structuralist approach with complete accommodation of the central bank	335
15.4	A time framework explanation of endogenous money with complete accommodation of the central bank	336
15.5	A time framework explanation of endogenous money with incomplete accommodation of the central bank	337
16.1	The impact of an exogenous increase in the inventories of firms	370
16.2	The impact of an exogenous permanent increase in government expenditures	372
19.1	A general endogenous-money analysis of the reserve market	414
19.2	A general endogenous-money analysis of the credit market	418
19.3	A general endogenous-money analysis of the financial market	420
