List of figures vii
Preface viii

Introduction 1
1 The financial crisis of 2008 and the unKeynesian Keynes 11
1.1 Similarities between the crises’ contexts: 1930s and 2008–9 12
1.2 Management strategies: aggregate demand vs effective demand 17
2 Money, price, and interest 26
2.1 Definitions 27
2.2 Alternative Quantity Equations 30
   The Cambridge Quantity Equation 31
   The Fisher Quantity Equation 31
   The Real-Balance Quantity Equation 32
   The equation of exchange derived from the Fundamental Equations and the Demand for Liquidity Equation 33
2.3 Objections to the Quantity Theory 36
2.4 Keynes’s monetary theory in A Treatise on Money and his theory of Interest in The General Theory 42
2.5 From Keynes’s Fundamental Equation to his Demand for Liquidity Equation 50
3 Keynes’s semantic shifts: the shock of A Treatise on Money 54
3.1 The Controversy over Keynes’s Treatise 56
3.2 Keynes’s definitions of terms 59
3.3 ‘Windfall’ profits: their characteristics and their impact on the three categories of Capital, the sources of cyclical fluctuation 64
3.4 Books 3 and 4 of Keynes’s Treatise on Money 65
   3.4.1 The Model of Keynes’s Treatise on Money 66
   3.4.2 Definitions and Causal Relationships 67
   3.4.3 Fundamental Equations 72
3.5 A non-sequitur of Wicksell 75
3.6 Groundless criticism of Keynes’s so-called semantic inconsistencies 78
Money, investment and consumption

4 Keynes’s theoretical shift: casualty of the criticism of the Treatise
   4.1 Structure of the production process in the models of Keynes and Hayek
   4.2 Hayek’s Model of Prices and Production
   4.3 The dynamics of the cycles of Hayek and Keynes
      4.3.1 The Dynamics of Hayek’s Trade Cycle in Prices and Production
      4.3.2 The Dynamics of Keynes’s Credit Cycle in the Treatise
   4.4 Keynes’s productive and unproductive consumption and employment

5 Keynes’s causal relations: The General Theory derailed
   5.1 Definitions and Concepts
   5.2 Hicks’s Mr Keynes’s General Theory of Employment Reconsidered
      5.2.1 Hicks’s Models of General Theories
   5.3 Keynes General Theory of Employment Reconsidered
      5.3.1 The Classical Postulates
      5.3.2 Effective Demand
      5.3.3 Prospective Yield or Marginal Efficiency of Capital
      5.3.4 Income Distribution
      5.3.5 Keynes’s EC-SP Model
   5.4 Hicks’s misinterpretation of The General Theory: the IS-LM

6 Inflation/deflation and the policy of the general General Theory
   6.1 Keynes’s theory of Employment
   6.2 The Trade Cycle of The General Theory
   6.3 Wicksell: stabilization of the purchasing power
   6.4 Keynes: stabilization of the Marginal Efficiency of Capital
   6.5 Shifts of resources, income redistribution, and stabilization policy

Conclusion

Appendix: False novelties
   A.1 NeoClassical (or neoWalrasian) theory
   A.2 The Classical theory
   A.3 Keynes’s theory
   A.4 Keynes’s theory of income distribution
