*Preface*  

**Introduction**  
1 The financial crisis of 2008 and the unKeynesian Keynes  
1.1 Similarities between the crises’ contexts: 1930s and 2008–9  
1.2 Management strategies: aggregate demand vs effective demand  

2 Money, price, and interest  
2.1 Definitions  
2.2 Alternative Quantity Equations  
The Cambridge Quantity Equation  
The Fisher Quantity Equation  
The Real-Balance Quantity Equation  
The equation of exchange derived from the Fundamental Equations and the Demand for Liquidity Equation  
2.3 Objections to the Quantity Theory  
2.4 Keynes’s monetary theory in *A Treatise on Money* and his theory of Interest in *The General Theory*  
2.5 From Keynes’s Fundamental Equation to his Demand for Liquidity Equation  

3 Keynes’s semantic shifts: the shock of *A Treatise on Money*  
3.1 The Controversy over Keynes’s *Treatise*  
3.2 Keynes’s definitions of terms  
3.3 ‘Windfall’ profits: their characteristics and their impact on the three categories of Capital, the sources of cyclical fluctuation  
3.4 Books 3 and 4 of Keynes’s *Treatise on Money*  
3.4.1 The Model of Keynes’s *Treatise on Money*  
3.4.2 Definitions and Causal Relationships  
3.4.3 Fundamental Equations  
3.5 A non-sequitur of Wicksell  
3.6 Groundless criticism of Keynes’s so-called semantic inconsistencies

4 Keynes’s theoretical shift: casualty of the criticism of the *Treatise* 88
  4.1 Structure of the production process in the models of Keynes and Hayek 89
  4.2 Hayek’s Model of *Prices and Production* 92
  4.3 The dynamics of the cycles of Hayek and Keynes 95
    4.3.1 The Dynamics of Hayek’s Trade Cycle in *Prices and Production* 95
    4.3.2 The Dynamics of Keynes’s Credit Cycle in the *Treatise* 106
  4.4 Keynes’s productive and unproductive consumption and employment 116
5 Keynes’s causal relations: *The General Theory* derailed 125
  5.1 Definitions and Concepts 127
  5.2 Hicks’s Mr Keynes’s *General Theory of Employment* Reconsidered 134
    5.2.1 Hicks’s Models of General Theories 135
  5.3 Keynes *General Theory of Employment* Reconsidered 139
    5.3.1 The Classical Postulates 139
    5.3.2 Effective Demand 141
    5.3.3 Prospective Yield or Marginal Efficiency of Capital 144
    5.3.4 Income Distribution 147
    5.3.5 Keynes’s EC-SP Model 150
  5.4 Hicks’s misinterpretation of *The General Theory*: the IS-LM 154
6 Inflation/deflation and the policy of the general *General Theory* 160
  6.1 Keynes’s theory of Employment 162
  6.2 The Trade Cycle of *The General Theory* 165
  6.3 Wicksell: stabilization of the purchasing power 170
  6.4 Keynes: stabilization of the Marginal Efficiency of Capital 174
  6.5 Shifts of resources, income redistribution, and stabilization policy 184
Conclusion 191

Appendix: False novelties 197
  A.1 NeoClassical (or neoWalrasian) theory 198
  A.2 The Classical theory 201
  A.3 Keynes’s theory 208
  A.4 Keynes’s theory of income distribution 214
