## Introduction 1  
1 The financial crisis of 2008 and the unKeynesian Keynes 11  
   1.1 Similarities between the crises’ contexts: 1930s and 2008–9 12  
   1.2 Management strategies: aggregate demand vs effective demand 17  
2 Money, price, and interest 26  
   2.1 Definitions 27  
   2.2 Alternative Quantity Equations 30  
      The Cambridge Quantity Equation 31  
      The Fisher Quantity Equation 31  
      The Real-Balance Quantity Equation 32  
      The equation of exchange derived from the Fundamental Equations and the Demand for Liquidity Equation 33  
   2.3 Objections to the Quantity Theory 36  
   2.4 Keynes’s monetary theory in *A Treatise on Money* and his theory of Interest in *The General Theory* 42  
   2.5 From Keynes’s Fundamental Equation to his Demand for Liquidity Equation 50  
3 Keynes’s semantic shifts: the shock of *A Treatise on Money* 54  
   3.1 The Controversy over Keynes’s *Treatise* 56  
   3.2 Keynes’s definitions of terms 59  
   3.3 ‘Windfall’ profits: their characteristics and their impact on the three categories of Capital, the sources of cyclical fluctuation 64  
   3.4 Books 3 and 4 of Keynes’s *Treatise on Money* 65  
      3.4.1 The Model of Keynes’s *Treatise on Money* 66  
      3.4.2 Definitions and Causal Relationships 67  
      3.4.3 Fundamental Equations 72  
   3.5 A non-sequitur of Wicksell 75  
   3.6 Groundless criticism of Keynes’s so-called semantic inconsistencies 78
4 Keynes’s theoretical shift: casualty of the criticism of the Treatise 88
  4.1 Structure of the production process in the models of Keynes and Hayek 89
  4.2 Hayek’s Model of Prices and Production 92
  4.3 The dynamics of the cycles of Hayek and Keynes 95
    4.3.1 The Dynamics of Hayek’s Trade Cycle in Prices and Production 95
    4.3.2 The Dynamics of Keynes’s Credit Cycle in the Treatise 106
  4.4 Keynes’s productive and unproductive consumption and employment 116
5 Keynes’s causal relations: The General Theory derailed 125
  5.1 Definitions and Concepts 127
  5.2 Hicks’s Mr Keynes’s General Theory of Employment Reconsidered 134
    5.2.1 Hicks’s Models of General Theories 135
  5.3 Keynes General Theory of Employment Reconsidered 139
    5.3.1 The Classical Postulates 139
    5.3.2 Effective Demand 141
    5.3.3 Prospective Yield or Marginal Efficiency of Capital 144
    5.3.4 Income Distribution 147
    5.3.5 Keynes’s EC-SP Model 150
  5.4 Hicks’s misinterpretation of The General Theory: the IS-LM 154
6 Inflation/deflation and the policy of the general General Theory 160
  6.1 Keynes’s theory of Employment 162
  6.2 The Trade Cycle of The General Theory 165
  6.3 Wicksell: stabilization of the purchasing power 170
  6.4 Keynes: stabilization of the Marginal Efficiency of Capital 174
  6.5 Shifts of resources, income redistribution, and stabilization policy 184
Conclusion 191

Appendix: False novelties 197
  A.1 NeoClassical (or neoWalrasian) theory 198
  A.2 The Classical theory 201
  A.3 Keynes’s theory 208
  A.4 Keynes’s theory of income distribution 214
