Tables

1.1 The relationships between control system foci and capability forces and emphasis 17
1.2 Affect of feedback on dynamic capability processes 19
2.1 Literature matrix on dynamic capabilities and radical innovation 39
2.2 Selection criteria for incentive system characteristics 40
3.1a Descriptive statistics and t-test for H1 75
3.1b Linear regression analysis for H1 75
3.2a Descriptive statistics and t-test for H2 76
3.2b Non-linear (quadratic) regression analysis for H2 76
3.3 Linear regression analysis for H3 76
3.4 Linear regression analysis for H4 77
6.1 Descriptive statistics for subsamples and difference-between-means tests 146
6.2 Correlations (N = 145) 148
6.3 Proportional hazards regression 150
7.1 Descriptive statistics and correlations 175
7.2 Results of regression analysis of firm performance on growth for persistently and alternatingly growing companies 1990–99 176
7.3 Results of regression analysis of lagged firm performance on growth for persistently and alternatingly growing companies 1990–99 178
7.4 Results of regression analysis of lagged firm performance on positive signals 179
7.5 Results of regression analysis of lagged firm performance on negative signals 181
8.1 Overview of how project planning theory and real options theory achieve and fail to explain flexibility value assessment heuristics that lead to an effective management of the flexibility–stability balance 216
9.1 Main types of dynamic capability’s definitions 225
9.2 Examples of proposed and employed types of dynamic capabilities in the literature 234
