# Figures

---

1.1	The product as the conjunction of characteristics and competences	37
2.1	The layers of innovation in services	55
4.1	Price trends: auto repair and maintenance vs. auto insurance vs. CPI, 1948–1992	88
5.1	CO <sub>2</sub> emissions by sector, France, 2005	95
5.2	28 OECD and EU countries: share of services in employment and CO <sub>2</sub> emission, per capita, 2003	96
5.3	28 OECD and EU countries: share of services in employment and ecological footprint per capita, 2003	97
5.4	Index of employment variations by sectors in France	101
5.5	Household consumption index, France	101
5.6	Evolution of GDP and of indicators of environmental pressure (1970–2004)	103
5.7	The evolution of transport and communication (1800–2000)	104
6.1	Multi-agent framework of co-evolving service characteristics, competences and preferences	134
6.2	Interaction between SCDT and MMU in the co-production of the patient-centred education programme	143
7.1	The relation between private R&D expenditures and scientific productivity	171
11.1	Performance, SPOTS model, environmental and national context	252
11.2	Context and performance: USA top, UK bottom	265
13.1	Factors driving the growth of services	303
13.2	Changes of the role of the customer in service production and innovation	313
14.1	Overview of the database	328
15.1	Distribution of cases and total service business population by member states	354
15.2	Distribution of cases by sector	355
15.3	Cluster of service sectors differentiated by knowledge regimes	357
15.4	Importance of different protection instruments differentiated by clusters	359

16.1	The employment impact of innovation at a firm level	380
17.1	Relative importance of the various types of regulation	408
17.2	Changes in degrees of regulation between 1978 and 1998	409
17.3	Strictness of employment protection and legislation, 1988–98	410
19.1	Shares of innovation expenditure by sector, UK	455
19.2	Market-creating service innovations	462
19.3	Elements of experiential service design	463
19.4	Growth of Starbucks stores, 2002–07: United States and international	464
20.1	Characteristics of services outsourced/offshored	474
20.2	Offshored projects by different business functions	475
21.1	Assets explaining competitiveness of French firms according to whether they export services or manufactured goods	513
21.2	Assets explaining competitiveness of innovative French firms according to whether they export services or manufactured goods	514
21.3	Global international dynamism according to network, ICT and firm's size	522
22.1	Activities in standardisation	540
22.2	Relevance of standards for different service-related aspects	541
22.3	Average use of standards types	542
23.1	Distribution of the innovation expenditure, by type of enterprise, EU-15, 2000	554
23.2	Proportion (per unit) of enterprises involved in innovation cooperation and enterprises with innovation activities, EU-27, CIS-4	556
23.3	Proportion of enterprises involved in innovation cooperation, by partner, national level, 2002–04, EU-27, CIS-4	558
23.4	Proportion of enterprises involved in innovation cooperation, by geographic scope, 2002–04, EU-27, CIS-4	562
23.5	Proportion of service enterprises involved in innovation cooperation, by geographic scope and European countries, 2002–04, CIS-4	564
24.1	Percentage share of companies purchasing business services	575
24.2	Pathways of innovation	579
24.3	Functional phases of services	580
25.1	Central London areas: total KIBS employment, 2000, 2003, 2006	597
26.1	The rationale for a service innovation policy	637

26.2	Share of firms receiving public funding for innovation by economic sector	639
27.1	The innovation gap and the innovation–performance relationship	667
27.2	Innovation gap, performance gap and innovation–performance relationship	668
28.1	Different types of service and manufacturing encapsulation	687
28.2	The elements of a manufacturing value chain	691
28.3	The services duality: production- and product-related services	693
29.1	The tangible products–services continuum	703
29.2	Product services’ strategic roles	705
29.3	Different types of bonds	709
30.1	The two dimensions of the design process: C and K	728
30.2	Organizing the exploration of a field of innovation: the example of automobile telematics services	736
30.3	Potential areas for front-office innovation	738
