# Tables

5.1 The future of service-sector employment in developed countries: winners and losers 118  
6.1 Attendance on the two education programmes 146  
6.2 Statistical data on HbA1c scores 147  
6.3 Independent samples test for HbA1c scores 149  
7.1 The distribution of researchers, publications and citations across the different scientific fields 168  
7.2 The distribution of researchers, publications and citations across the Italian regions 169  
7.3 R&D expenditures and publications across Italian regions 170  
10.1 Summary of the examined innovation processes in KIBS 235  
11.1 Correlation coefficients and descriptive statistics 258  
11.2 Regression of system on predictors 261  
11.3 Regression of performance measures on SPOTS 262  
11.4 Regression of performance measures on SPOTS and TQM 267  
14.1 Knowledge sources for innovation activities 329  
14.2 Joint innovation activities with research institutions (universities) 331  
14.3 Relationship between collaboration activities with research institutes and other forms of knowledge sources 333  
15.1 A stylisation of knowledge and appropriability regimes in services 347  
15.2 ‘A priori’ allocation of service sectors across knowledge and appropriability regimes 351  
17.1 Service employment by subsector and type of capitalism 396  
17.2 Explaining deindustrialisation 1992–2002 397  
17.3 Growth and productivity in some of Europe-15 (by sector, 1980–2004) 399  
17.4 Growth and productivity in the US (by sector, 1980–2004) 400  
17.5 Structural change indicators: education and diffusion of ICT at the end of the 1990s 403  
17.6 Employment growth breakdown by skill level in manufacturing and services (annual % growth rates, 1980s) 404  
17.7 Degrees of business regulation in 1998 by type of capitalist countries 407
17.8 Degrees of regulation in some large networked service industries, 1998  
18.1 Evolution of the participation of KIS in intermediate consumptions, 1995–2000  
18.2 Evolution of R&D expenditures in KIS, 1995–2000  
18.3 Estimation of the effects of the use of KIS on productivity, 1995–2000  
18.4 Product-embodied R&D per unit of value added diffused through domestic and imported intermediate consumptions of KIS, 2000  
18.5 Total product-embodied R&D diffused through domestic and imported intermediate consumptions of KIS, 2000  
18.6 Imported intermediate consumptions, R&D intensities and product-embodied R&D diffused through imports, 2000  
20.1 Export-oriented FDI projects offshored  
20.2 Offshoring/outsourcing matrix  
20.3 Features of previous and present wave of outsourcing/offsourcing  
21.1 Relationship modes with foreign clients according to service sector  
22.1 Services standards typology  
22.2 Standards-related factors of services  
22.3 Criteria for determining the relevance of standards depending on the modes of service trade  
22.4 Additional needs for standards depending on the modes of service trade  
23.1 Synthesis of the main aspects of the innovation in services, EU-15, Iceland and Norway, 1998–2000  
23.2 Services taxonomy based on the characteristics of the innovation intensity and the innovation cooperation spreading  
24.1 Business services to manufacturing  
24.2 Selected benefits of innovative services to industry  
24.3 Types of innovation  
24.4 R&D platform  
24.5 Value of innovation to the original business model and current business operation  
26.1 Distinctiveness coefficient in some key policy-related indicators: services versus goods, Europe-16
