

Tables

2.1	Searching information channels	41
	Panel A: Hypothetical information channels	
	Panel B: Optimal search sequence for hypothetical information channels	
2.2	A multi-stage search plan using a truncated search sequence	47
3.1	Demographic attributes of repeat entrepreneurs	61
3.2	Content analysis	63
5.1	Potential of ideas identified by the MBA treatment and control groups	116
5.2	Comparing the number of wealth-creating ideas discovered by MBA students using either alertness or constrained, systematic search	117
5.3	Effects of specific knowledge on wealth creation by the working poor	118
5.4	Wealth-creating potential by working poor treatment and control groups	118
5.5	Effects of specific knowledge on wealth creation by technically trained employees	119
5.6	Wealth-creating potential by technically trained employee treatment and control groups	119
6.1	Trial-level tests	133
6.2	Combinability tests	134
6.3	Bias tests	134
6.4	Individual-level estimates	137
7.1	Constructs	155
7.2	Nested model comparison	159
7.3	Direct and indirect path calculations	160
