Acknowledgements

In undertaking this study I have received assistance from a wide range of people and organizations both within and beyond the Asian-Pacific Rim. In the Republic of Korea (South Korea) I have had the strong support of Dr Seoung-Yong Hong, both the 10th & 11th President of Inha University, and colleagues in its Asia-Pacific School of Logistics (APSL) and the Graduate School of Logistics (GSL), notably Professors Young-Tae Chang, Hun-Koo Ha, Hwa Jung Kim, Minsung Kim, Oh Kyoung Kwon, Sang-Yoon Lee, Jung Un Min, Kichan Park, Min-gyu Park, Yongwha Park and Jose Tongzon, and a legion of students on the Masters of Global Logistics Management (MGLM) course, technical officers, Wooyoung Jeong and Sung Hee Won, and an array of university administrators. Also the Graduate School provided opportunities for site visits to Hanjin Shipping, Hyundai Motor, Hyundai Shipping, Incheon International Airport, Samsung, LG and the ports of Busan, Gunsan and Incheon. Special mention must also be made of a former student, Jin-Hwan (Jennings) Bae, who has assisted my research endeavours in South Korea over more than eight years.

While in Korea I learned much from the international visiting faculty on the Masters of Global Logistics Management (MGLM) course during my period as the Inaugural Director, especially from Professors Jess H. Browning, Rommert Dekker, Charles Henri Fredouet, Thomas A. Grigalunas, Mary A. Hamilton, Booi H. Kam, Hirohito Kuse, Jang-hyuk Lee, Gerhardt G. Muller, Tae Hoon Oum, Edouard Reppert, Chris Whitaker and Anming Zhang.

Elsewhere in Korea I have had links with the Graduate School of Logistics in Northeast Asia at neighbouring Incheon University through Professor Hong-Seop Kim, and its inaugural chair, the late Professor Jun-il Soo, and with Professor Jin-hwan Kim from the Department of International Trade at Korea National Open University. Also I have enjoyed contacts with the Directors and staff of the Korea Maritime Institute (KMI) and the Korea Transport Institute (KOTI), particularly their respective librarians Mi-Gyeong Kim and Su-jin Kim. The Korean Port Economic Association invited me to their conferences, as did the Incheon International Airport Corporation.

In Japan I am indebted to the Asian Development Bank Institute, the Japan Transport Economics Research Center, the International Association of Ports and Harbours, particularly the late Rinnosuke Kondoh and the late Kimiko Takeda, the Japan International Freight Forwarders Association, especially Nobuyuki Kumazawa, the Institute of Supply Network Management and Strategy at Tama University, Professor Eiichi Taniguchi at Kyoto University, Hideo Yamada of the Japan Shipping Research Center, and representatives of Nippon Express, NYK Line and Nissin Corporation.

Within the People's Republic of China I have had many opportunities to observe logistics first hand in working on consultancies for the Asian Development Bank and the World Bank. More recently, I have worked with the Director and Staff of the Transport Research Planning Institute in Beijing, particularly Ran Fang, Li Xu, Jianguo Yang, Meizhen Gao, Xingyuan Yu, Xinxia Yao and Jiaqiang Wang. Helpful advice was also received from Naijie Liu, Director-General of the *Journal of China Logistics and Purchasing*, Chaohe Rong from Beijing Jiatong University, and Wang Yankun from the Comprehensive Transport Research Institute, National Development Reform Commission. My thanks are also extended to provincial officials, transport and terminal operators, and manufacturers from Anhui, Hunan and Sichuan provinces.

Beyond the Asian-Pacific Rim I have had the opportunity to visit India to extend my interaction with Dr Prabir De and his colleagues at Research and Information System for Developing Countries (RIS). In the United States Amy St Peter at Armstrong & Associates at Madison, Debra Hofman formerly AMR Research, now at Gartner Inc., and Andrew Hok Fan Sze from the Fastraxx Group have provided responses to specific queries. In Dubai Alexander Borg, Consultant for the Middle-East Region, the Chartered Institute of Logistics and Transport, has also assisted.

In Australia I am grateful to colleagues in the Division of Culture, History and Language, College of Asia and the Pacific (CAP) at the Australian National University (ANU). Particular mention must be made of the camaraderie of Professors Kent Anderson (now University of Adelaide), Prem-Chandra Athukorala, James Fox, Stuart Harris, Hal Hill, Terry Hull, Igor de Rachewiltz, Gavan McCormack, Tessa Morris-Suzuki and the late Darrell Tryon.

Throughout my 47-year career at the University I have been indebted to the Cartographic Office of the then Research School of Pacific and Asian Studies (RSPAS), particularly the work of Ian Heyward and Keith Mitchell. On this occasion I have decided to draw my own figures, but I have benefitted immensely from the tutelage, advice and tweaking of Kay

Dancey, Jennifer Sheehan and Karina Pelling from CAP's Multimedia group. Sandie Walters from CAP's Information Technology Services, Tristan Peemoeller from MAC1 ANU Pty Ltd and Joe Rimmer have helped with specific computing matters.

My thanks are also due to the staff of the Asian Collections, National Library of Australia (NLA), Canberra: Amelia McKenzie (Assistant Director General); Alexander Philip (Director, Overseas Collections Management); Di Ouyang, Irina Chou, Jie Chen and Maihua Qi (China Unit), Tieke Atikah (Indonesian Unit); Mayumi Shinozaki, Rika Wright and Sumiko Kanazawa (Japan Unit); Jung-Ok Park and Jee-Young Lee (Korean Unit); and Sophie Virayong, Jane Hopkins and Lek McFadden (Thai Unit). Brendan Whyte from the NLA's Map Collection has assisted greatly with the location of railways in Asia prior to the Second World War. I have also received invaluable assistance from Yasna Palaysa and Anna-Maria Sviatko, the librarians of the Australian Government's former Department of Broadband, Communications and the Digital Economy (now the Department of Communications).

Elsewhere in Australia the late Peter Gilmour of the Graduate School of Management at Macquarie University provided me with an introduction to physical distribution management in the early 1970s. Since then I have been appreciative of the spirited interchanges with Howard Dick, my long-term collaborator from the University of Melbourne, on transport, and urban and regional development matters. He has learnt over the years that the most favourable response to his queries follows a Liverpool Football Club victory!

Professors Jin-bang Kim, Jong-kil Kim and Young-il Park from Inha University have made comments on specific chapters, as have Booi Kam from the Royal Melbourne Institute of Technology (RMIT) University and Matthew Rimmer from the Australian National University. Responsibilities for any errors and omissions remain with the author.

In producing this book my appreciation is due to Dr Sue Rimmer for her meticulous editing. Edward Elgar, Alex Pettifer and Alexandra O'Connell of Edward Elgar Publishing have been patient in awaiting its completion. Thanks are also due to Edward Elgar Publishing's production staff, notably Jennifer Stanley, Sue Sharp, Rebecca Hastie and Cathrin Vaughan.

On a more personal note, thanks are due to the extended Rimmer family in England, especially my late brother Dr Ralph W. Rimmer and his wife Mair, and the extended Ford family in Australia and its matriarch, Joane Ford. My children and their partners, Joseph and Belinda, Matthew and Susan, and Rachel and Arunas, and five grandchildren, Marina, Joshua,

Imogen, Jethro and Griffin, have brought me much pleasure. Above all, I am indebted to my wife, Sue, for her love and unstinting encouragement over the past 47 years.

*Peter J. Rimmer
