

# Permissions

---

The author and publisher wish to thank the following for permission to reproduce material:

- Figure 1.1: DHL Global Insight (Deutschland) GmbH for allowing data be drawn from a copyright figure.
- Table 1.1: Armstrong & Associates Inc. for approving its reproduction.
- Figure 1.4: Pearson Education Limited for consenting to the use and adaptation of Figure 2.3 in *Living Supply Chains: How to Mobilize the Enterprises Around Delivering What Your Customers Want* by John Gattorna (ISBN 9780273706144), p.43, and Figure 2.4 in *Dynamic Supply Chains: Delivering Value through People* (2nd edn) by John Gattorna (ISBN 978-0-273-73040-8), p. 50, with the author's approval.
- Figure 1.5: Fukunari Kimura of both Keio University, Tokyo, and Economic Research Institute for ASEAN and East Asia (ERIA), Jakarta, for countenancing the copying of the diagram on the fragmentation of production.
- Figure 1.6: Pearson Education Limited for agreeing to the reproduction of Figure 9.1 in the fourth edition of *Logistics and Supply Chain Management: Creating Value-Adding Networks* (4th edn), by Martin Christopher (ISBN 9780273731122), p.172, with the author's approval.
- Figure 2.6: Gartner Inc. for sanctioning the publication of the original version of the diagram copyrighted by AMR Research in 2004.
- Table 2.6: Gartner Inc. for consenting to the abstraction of material from <http://www.gartner.com/technology/supply-chain/top25.jsp>.
- Figures 2.7 and 2.8: TNT Express N.V. for agreeing to the reproduction of two diagrams with small amendments.
- Tables 2.8, 2.9 and 2.11: Armstrong & Associates Inc. for approving their reproduction.
- Figure 3.3: Charles McMillan, York University, Toronto, for allowing his diagram to be reproduced.

- Figure 3.5: Theo Notteboom, Institute of Transport and Maritime Management, University of Antwerp, for permitting an amended version of his figure.
- Figures 3.7 and 3.12: Jean-Paul Rodrigue, Hofstra University, New York, for allowing an amended version of the Evolution of a Port (The Anyport Model) and the reproduction of silhouettes showing the evolution of container ships from the website of 'The Geography of Transport Systems'.
- Figure 4.11: John Kasarda, University of North Carolina, Chapel Hill, for allowing the transformation of his original aerotropolis diagram.
- Figures 5.5 and 5.13: Her Majesty the Queen in Right of Canada, Department of Transport for allowing the use and adaptation of the original diagrams from 'Canada's Gateway Update: Connecting Canada to Global Opportunities', Asia Pacific Gateway and Corridor Initiative Workshop, Toronto, CA, 18 June 2010, available at <http://www.gateway-corridor.com/torontoworkshop/presentations.htm>.
- Figure II.2: Dr Sangbeom Seo, Korea Transport Institute, for allowing an amended version of a block diagram outlining the directions for a nation-state to develop strategies and actions.
- Figure 11.1: Ian Clarke, University of Edinburgh, for approving an amendment of a diagram that appeared in *The Spatial Organisation of Multinational Corporations* published by Croom Helm.
- Figure E.1: Asian Development Bank for consenting to the reproduction of a figure showing the major transit directions in Eurasia.
