<i>Preface</i>	xiii
<i>Introduction</i>	1
<b>PART I THE CHALLENGE OF SUSTAINABLE WATER RESOURCES GOVERNANCE</b>	
1 Water resources governance in context	11
Introduction	11
The values underpinning water use	11
(a) A range of values	11
(b) Philosophical and religious foundations of water use	12
(c) Utilitarian and economic foundations of water use	13
(d) A traditional system of sustainable water use	14
The availability of water resources for human use	14
(a) Uses of water	14
(b) Sources of water	15
(c) Availability of water	15
(d) Pressures on water availability and use	16
Conclusion	17
2 The conceptual framework of sustainability	21
Introduction	21
The theoretical foundations of sustainable development	22
(a) The language of sustainable development	22
(b) Sustainable development as a cultural value	23
(c) Sustainable development as a moral value	25
The operational foundations of sustainable development	26
(a) Sustainable development as a function	26
(b) Sustainable development as a legal norm	29
The sustainable development of water resources	34
Conclusion	37
3 Governance for sustainable development	42
The theoretical foundations of governance	42
(a) The challenge of governance for sustainability	42
(b) The function of governance	43
(c) Governance as a juridical concept	45
(d) Governance for sustainable water resources development	46

Models of governance for sustainable development	47
(a) Introduction	47
(b) New Zealand	48
(c) The European Union	49
(d) The Draft International Covenant	50
Conclusion	52
PART II THE FORMAL STRUCTURE OF WATER RESOURCES GOVERNANCE	
4 The doctrinal foundations of water resources law	59
The challenges of the water cycle	59
(a) Introduction	59
(b) Water as a common-pool resource	60
The fundamental doctrines of the legal system	61
(a) Introduction	61
(b) The concept of sovereignty	61
(c) The concept of property	63
(d) The nature and function of rights in relation to water	64
The concept of property in water	67
(a) The ambiguity of the concept	67
(b) Property as an economic instrument	68
(c) Water as common property	69
(d) Water as private property	70
Conclusion	71
5 The range of functions performed by states	75
Rights of sovereignty	75
(a) Introduction	75
(b) Rights of sovereignty in relation to water resources	76
(c) The exercise of rights of sovereignty	77
A regime of <i>Grundnorms</i>	77
A regime of appropriation by enforceable rules	79
A regime of allocation by administrative grants	80
A regime of direct or indirect public management	82
Conclusion	83
6 Individual water rights	85
Introduction	85
Natural and human rights in relation to water	85
Environmental rights in relation to water	87
Constitutional rights in relation to water	88
The relevance of custom and practice in relation to water	89
Customary rights in relation to water	91
Conclusion	93

7	Water entitlements	96
	Introduction	96
	Roman law	97
	English law	98
	(a) Water and land during the middle ages	98
	(b) The appropriation doctrine	99
	(c) The riparian doctrine	100
	(d) Intervention by the legislature	101
	Islamic law	102
	Conclusion	103

### PART III THE NORMATIVE STRUCTURE OF INTERNATIONAL ARRANGEMENTS

8	Norms of international law	109
	International norms controlling national water resources	109
	(a) The issues	109
	(b) The contribution of paralegal rules	110
	(c) The contribution of legal rules	112
	(d) Conclusion	114
	International norms controlling international water resources	114
	(a) The issue	114
	(b) The emergence of a community of interest	115
	(c) Towards reasonable and equitable use	118
	(d) A set of coherent principles	119
	(e) The emergence of strategic and operational norms	122
	Conclusion	125
9	Norms in interstate agreements	129
	Introduction	129
	Norms of strategy	130
	(a) African, American and central Asian arrangements	130
	(b) Arrangements in the European Union	131
	Norms of operation	133
	(a) Introduction	133
	(b) Africa	133
	(c) Asia	138
	Conclusion	139

### PART IV THE NORMATIVE STRUCTURE OF ARRANGEMENTS WITHIN STATES

10	Normative arrangements in federal jurisdictions	147
	Introduction	147
	United States of America	147
	(a) The constitutional context	147

(b)	Judicially imposed arrangements	148
(c)	Consensual arrangements	149
(d)	Conclusion	153
	Canada	153
	Australia	154
(a)	Introduction	154
(b)	Intergovernmental agreements	155
(c)	The constitutional foundations of the Water Act of 2007	156
(d)	The detail of the Water Act 2007	157
	Conclusion	159
11	Normative arrangements in unitary jurisdictions	163
	Introduction	163
	Chinese law	163
	Roman law	164
	Islamic law	165
(a)	The context	165
(b)	The detail	166
(c)	Conclusion	168
	English law	168
(a)	The relationship between water and land	168
(b)	The normative structure of the riparian doctrine	170
(c)	Statutory arrangements in England	172
(d)	Conclusion	174
	Codified normative arrangements in Islamic law	174
(a)	Introduction	174
(b)	Codified Islamic law	174
(c)	The code in the Sultanate of Lahj	177
(d)	The constitution and Islamic law in Iraq	178
	Codified normative arrangements in the civil law	179
(a)	Introduction	179
(b)	Codified public domain regimes	179
(c)	The function of the civil code	180
	Conclusion	183
PART V EVOLVING INTERNATIONAL ARRANGEMENTS FOR WATER RESOURCES GOVERNANCE		

12	The dynamics of the international legal system	189
	Introduction	189
	The context	189
	The functions of international law in relation to water resources	191
	Water as a shared resource in international law	192
	Equity as an operational principle	193
	The principle of harm avoidance	195
	The relationship between equity and harm avoidance	197

(a) The rules in the 1997 Convention	197
(b) The relationship between the rules	198
(c) The nature of the obligation	199
The emerging relevance of sustainability	201
(a) The relevance of sustainability for use and development	201
(b) The function of sustainable development	202
(c) Conclusion	202
The human right to water	203
Conclusion	203
13 The dynamics of interstate agreements	207
Introduction	207
(a) The power to enter into agreements	207
(b) The relevance of interests external to the agreement	208
The function and structure of interstate agreements	209
(a) Introduction	209
(b) Water resource development as the principal function	209
(c) Water resource protection as a subsidiary function	210
(d) An emerging pattern of functions	211
The challenges facing cooperation	212
(a) The need for political will	212
(b) Conflicting perceptions of the relevant legal rules	213
(c) Confronting hydrological issues	215
(d) The need for comprehensive information	217
(e) Conclusion	217
The response to the challenge of cooperation in Europe	218
(a) Scandinavia	218
(b) The Rhine basin	219
Conditions necessary for successful interstate agreements	220
(a) A mutuality of interest	220
(b) Good faith	220
(c) Observable principles	221
(d) Detailed knowledge	221
Trade, transfers and interstate agreements	221
(a) Introduction	221
(b) The issues	222
(c) Arrangements for the transfer of water	223
(d) The relationship between use rules and trade rules	226
Conclusion	227

## PART VI EVOLVING NATIONAL ARRANGEMENTS FOR WATER RESOURCES GOVERNANCE

14 <i>Grundnorms</i> underlying water resources development	235
The range of approaches	235
(a) Introduction	235

(b)	The emergence of the public domain	235
(c)	The source of individual rights	236
	Constitutional <i>Grundnorms</i>	237
(a)	Introduction	237
(b)	The rights of a state	238
(c)	The substantive rights of individuals	239
(d)	The procedural rights of individuals	239
(e)	The relationships between constitutional and common law rights	241
	The <i>Grundnorm</i> of the public domain	243
(a)	A public domain by public ownership	243
(b)	A public domain by public control	245
	The administration of the public domain	246
(a)	Introduction	246
(b)	Administration according to principles and directions	247
(c)	Administration for sustainable development	248
	Conclusion	250
15	Planning for water resources development	254
	Introduction	254
	Planning to facilitate water resources development	254
(a)	Informal planning	254
(b)	Project planning	256
(c)	Water resources planning	257
	Planning for water transfers	258
(a)	Introduction	258
(b)	Interstate transfers	259
(c)	Interbasin transfers	260
	Planning to regulate water resources development	261
(a)	Introduction	261
(b)	Planned regulation in the United States of America	262
(c)	Planned regulation in public domain regimes	264
	Conclusion	266
16	Water rights as regulatory instruments	269
	The sources of water rights	269
	Water rights as private legal relationships	270
	Water rights automatically available	271
(a)	Water rights conferred directly by legislation	271
(b)	Customary water rights	273
	Water rights by allocation	274
(a)	Introduction	274
(b)	Allocation according to principles	275
(c)	Allocation according to procedures	275
(d)	Allocation according to rules	276
	Trading in water rights	277
(a)	Introduction	277

(b) The creation of a market	278
(c) Trading in common law water rights	279
(d) Trading in statutory water rights	281
Water rights for ecological purposes	283
(a) Introduction	283
(b) Protection by administrative integration	284
(c) Protection by water rights	286
(d) Protection by reserves	287
Water rights administration and adjudication	288
(a) Introduction	288
(b) The creation and enforcement of rights	289
(c) The adjudication of rights	290
Conclusion	291

## PART VII TOWARDS SUSTAINABLE WATER RESOURCES GOVERNANCE

17 Evolving statutory structures for water resources governance	299
Introduction	299
Water resources development and protection in Iran	301
Public water resources management in Singapore	303
Arrangements in India	304
(a) Public water resources management	304
(b) Constraints upon public management	305
Sustainability in Indonesia	307
Sustainable development goals in the Philippines	308
Integrated water resources management in Flemish Belgium	310
Sustainable water resources development in Scotland	311
(a) The statutory structure	311
(b) The statutory details	312
(c) The techniques of regulation	313
Conservation of water resources in South Africa	314
Water resources use priorities in Australia	316
(a) The structure of the legislation	316
(b) Judicial interpretation of the legislation	317
Conclusion	319
18 The need for doctrinal innovation	322
Towards legal integration	322
(a) The challenge	322
(b) Integrated water resources management	323
(c) The relevance of legal arrangements	324
(d) The coherence of legal instruments	326
(e) The function of rules of law	327
(f) The issue of enforceability	329
A synoptic review of international approaches	330
(a) The principles of international law	330

(b) Sustainable development in international law	331
(c) Sustainable development in interstate agreements	333
(d) Conclusion	335
A synoptic review of national approaches	336
(a) Constitutional foundations	336
(b) Statutory foundations	336
19 Models of doctrinal innovation	340
Normative structures for integrated management	340
(a) Introduction	340
(b) Trends for the future	340
(c) A conflict of interest rule	342
(d) A framework for guardianship	343
The elements of an integrated legal structure	344
(a) Integration of normative arrangements	344
(b) Formalising coherence in international arrangements	345
(c) A structure for coherence in international arrangements	346
(d) Formalising coherence in national arrangements	348
(e) A constitutional framework for national arrangements	349
(f) The implementation of a constitutional framework	351
(g) Ensuring the effectiveness of national arrangements	352
(h) Ensuring coherence	354
Conclusion	356
<i>Bibliography</i>	359
<i>Index</i>	373
