

Figures

3.1	Convex risk penalty	32
3.2	Binary outcomes	33
3.3	Cost of risk	34
3.4	Cost of risk (hedged)	35
3.5	Symmetric distribution (normal)	36
3.6	Expected cost of risk	37
3.7	Expected cost of risk (hedged)	38
3.8	Expected cost of risk (reduced by costless hedging)	39
3.9	Concave zone	42
3.10	Concave zone	43
4.1	A comparison of mortality rates for civil servants, the total population and annuitants	58
4.2	Projected age distribution of old-age pensioners	59
4.3	Iso-CVaR curve of total pension costs	73
5.1	Productivity over the life cycle (schematic)	85
5.2	Number of errors by average age of work team members, holding average experience constant	90
5.3	Errors by average years of experience with the plant, holding age constant	91
5.4	Combined effect of age and experience	92
5.5	Errors by degree of age-related heterogeneity	93
6.1	A defined contribution pension plan	111
6.2	A defined benefit pension plan	112
6.3	The option composition of a defined benefit pension plan	113
6.4	Frequency distribution of terminal fund values: a low-risk, low-return asset allocation	119
6.5	Frequency distribution of terminal fund values: high-risk, high-return asset allocation	120
6.6	Frequency distribution of terminal fund values: deterministic lifestyle asset allocation	121
6.7	Frequency distribution of durations of UK unit trusts from inception	127

6.8	Frequency distribution of performance-related fees	146
6.9	Stochastic life-styling	147
7.1	The basic risk management architecture	170
7.2	Distribution of the duration of Dutch pension fund fixed income investments	199
7.3	Asset composition in Danish pension companies, 1999–2004	201
7.4	Shifts in the efficient frontier and actual gains in risk–return trade-off	205
7.5	Maturity of the public debt stock and government securities in the riskier portfolio	207
7.6	Basic and aggressive portfolios: VaR limits and actual VaRs, 2005–2006	208
8.1	Pension fund governance and performance: are they statistically related?	230
9.1	Probability of a shortfall and cost of insurance as a function of time	250
10.1	Liabilities and premium base of Dutch pension funds, 1990–2030	262
