<i>Preface</i>	x
<i>Acknowledgements</i>	xii
1 The role of competition and diversity in economic performance: an overview	1
1.1 Introduction	1
1.2 General themes in the book	2
1.3 An outline of the topics covered in each chapter of this book	4
1.4 Concluding comments	16
2 Concepts of economic competition and performance in context	20
2.1 Introduction	20
2.2 Competition and economic efficiency: the relationships	22
2.3 Competition and productive efficiency: some extensions of the concepts	26
2.4 The structural approach to competition policy	29
2.5 Approaches to competition policy other than the structure–conduct–performance approach	39
2.6 Concluding observations	43
3 Diversity of consumers, product innovation and economic performance	48
3.1 Introduction	48
3.2 Types of attributes of consumers of significance for dynamic economic performance	50
3.3 The role of consumer diversity in product innovation	52
3.4 Some product-cycle and other dynamic perspectives	54
3.5 Associations between diversity of consumers' preferences for product differentiation and the supply of product variety	60
3.6 Conclusion	63

4	Schumpeter and the dynamics of capitalism: the driving force of business innovation	67
4.1	Introduction	67
4.2	Schumpeter, Darwinian-type theories of economic evolution and ideal market structures	69
4.3	Schumpeter, Marx and the evolution of capitalism and industrial structure	73
4.4	Major issues not addressed by Schumpeter	74
4.5	Concluding comments	78
5	Reasons for business diversity and their economic importance	83
5.1	Introduction	83
5.2	Business diversity in a stationary (static) economic state	84
5.3	Business diversity in dynamic (as well as in some further static) situations: preliminary observations	88
5.4	Some quantitative aspects of economic performance and business diversity	99
5.5	Market rivalry, innovation and diversity	101
5.6	Conclusions	104
6	Diversity and the evolution of competitive economic systems	109
6.1	Introduction	109
6.2	Some background observations	110
6.3	Production efficiency frontiers and business diversity	116
6.4	Market competition, efficiency, performance and diversity	121
6.5	Further observations on increasing industrial uniformity and development dynamics	124
6.6	Concluding comments	126
7	Competition, diversity, evolution and sustainability: are there lessons from ecology?	132
7.1	Introduction	132
7.2	Concepts of competition in economics and ecology	133
7.3	Mechanisms of evolutionary change	135
7.4	More on the links between optimization, competition and evolution	138
7.5	Intraspecific competition (scramble and contest) and the dependence of the survival of populations on diversity of fitness	141
7.6	Evolution of a new industry and changes from mutualism to competition between firms	150

7.7	Conclusions and policy consequences	153
8	Market niches, competition and economic performance: more clues from ecology?	160
8.1	Introduction	160
8.2	Concepts of the niche in everyday use, in ecology, in economics and business management	163
8.3	Origins of market niches and their relationships to competition and economic efficiency	166
8.4	Consequences of market niches for long-term economic growth and development	170
8.5	Economic niches and diversity of commodities	174
8.6	Relevance of this analysis to the economic globalization debate	176
8.7	Concluding comments	179
9	Market impediments, restrained reactions and market dynamics	183
9.1	Introduction	183
9.2	Market stabilization resulting from non-profit maximizing behaviours	184
9.3	More on market dynamics and damped or restrained market reactions	186
9.4	Market transaction costs and market dynamics	193
9.5	Knowledge as a factor in market dynamics and performance	196
9.6	Conclusion	199
10	Variations in the fitness of firms, dynamic economic performance, and vulnerability	202
10.1	Introduction	202
10.2	Variation in economic fitness of price-taking firms and the dynamic performance of markets	202
10.3	Scale economies, market extension and economic vulnerability	207
10.4	Other factors increasing industrial vulnerability in modern economies	210
10.5	Are there similar findings in ecology to those above?	214
10.6	Conclusions	215
11	More on differences in the fitness of firms, market selection and product variety	218

11.1	Introduction	218
11.2	Economies of scale, variations in economic fitness and sorting failures	219
11.3	Hotelling's market stability theory, niches and product variety	222
11.4	The view of Broda and Weinstein that globalization increases product variety and economic welfare	224
11.5	Does reduced product variety always reduce economic welfare?	226
11.6	Conclusions	229
12	Using market mechanisms (for example, contracting out) for the efficient public provision of commodities	233
12.1	Introduction	233
12.2	Contracting out of the supply of publicly funded commodities	236
12.3	Insecure public employment contracts – greater contestability of public employment	240
12.4	User charges for publicly provided commodities	241
12.5	Performance budgeting and accounting: limits to rationalism in public administration	244
12.6	Competitive mechanisms for allocating public funds for research: are they efficient?	246
12.7	Concluding observations	248
13	Using markets and market-like mechanisms to manage a multidivisional business efficiently	253
13.1	Introduction	253
13.2	Make-or-buy decisions (contracting out), the existence of firms and business performance	255
13.3	Transfer pricing as a means for managing multidivisional firms	260
13.4	Optimal transfer pricing and the worth of a business division when market transaction costs are important	265
13.5	Optimal transfer pricing (supposing significant market transaction costs) may retard desirable technological progress	270
13.6	Discussion and conclusion	274
14	Business partnerships, cooperation and the enhancement of economic performance	279
14.1	Introduction	279

14.2	Concepts of the firm as a decision-making unit and the firm's connection with markets	280
14.3	Economic advantages and disadvantages of interfirm cooperation	284
14.4	Processes and influences on the formation of business partnerships and the development of cooperation	287
14.5	Sharing the economic benefits from business cooperation – general observations	289
14.6	The gains to business partners of sharing and providing knowledge of economic value	291
14.7	Observations about some different institutional forms of economic cooperation	294
14.8	Networks, information flows and coordination of business activity	298
14.9	Concluding comments	299
