

Tables

2.1	Market for corporate control and executive turnover	28
2.2	Holding period of raiders' purchases: mean, median and holding period distribution in some European countries (1990–2001)	29
2.3	Flat CEO's compensation and stakeholder society: variable remuneration as percentage of total remuneration in some countries	30
2.4	Comparative features of labour relations in some countries: stability of employment, wage setting system and wage spread in Coordinated Market Economies (CME) and Liberal Market Economies (LME)	33
2.5	Comparative features of corporate governance in the 1990s in Coordinated Market Economies (CME) and Liberal Market Economies (LME). Concentration of ownership and of voting rights, role of financial institutions and inter-firm relations	34
2.6	Remuneration and incidence of incentive systems in Coordinated Market Economies (CME) and Liberal Market Economies (LME)	36
2.7	Control rights and payoff rights of employees in some OECD countries	40
4.1	Organizational elements and practices	70
4.2	Types of relationships among organizational elements	73
4.3	Equifinal organizational formulas (by function and contingency)	82
7.1	Drivers of outsourcing by rank	126
7.A1	Parameter values used to calibrate the model	145
8.1	Expected outsourcing correlations: organizational level	151
8.2	Expected outsourcing correlations: production level	155
8.3	Expected outsourcing correlations: industrial level	157
8.4	Expected outsourcing correlations: innovation level	160
8.5	Reggio Emilia: industrial structure of the firm population (2001)	164
8.6	Reggio Emilia: outsourcing firms of the sample by activity (1998–2001)	165

8.7	Regression results: the four different levels of analysis	170
8.8	Regression results: all levels of analysis	175
9.1	Characteristics of the sample ($N = 162$)	190
9.2	Correlations among the original variables	195
9.3	Association between variables denoting networking activities and variables denoting technical capital	196
9.4	Canonical correlation analysis	197
9.5	Correlations between the <i>VAR</i> variables and the canonical variables of the <i>WITH</i> variables, and between the <i>WITH</i> variables and the canonical variables of the <i>VAR</i> variables	198
10.1	Structure of the production in an integrated and in a deverticalized firm	214
10.2	Effects of outsourcing on turnover	222
10.3	Effects of outsourcing on EBITDA	223
10.4	Net/gross effects of delocalization and fragmentation	226
10.5	Delocalization and the boundary of the firm	227
10.A1	Descriptive statistics of the companies included in the sample (2003)	230
10.A2	Limited and joint stock companies	231
