Nelson H. Barbosa-Filho is Professor of Macroeconomics and Public Finance at the Institute of Economics of the Federal University of Rio de Janeiro, Brazil and holds a PhD in economics from the New School for Social Research. Since 2003, Barbosa has been working in President Lula's Administration and he is currently the Secretary of Economic Policy at the Brazilian Ministry of Finance.

Elissa Braunstein is Assistant Professor of Economics at Colorado State University, Fort Collins, Colorado. She received her PhD in economics from the University of Massachusetts Amherst and a Master of Pacific International Affairs from the School of International Relations and Pacific Studies at the University of California San Diego. Prior to joining CSU, Braunstein was an assistant research professor at the Political Economy Research Institute (PERI) at the University of Massachusetts Amherst. Her research focuses on feminist analyses of international economics, including the role of foreign direct investment in development. Recent work involves analysing the impact of foreign investment on gender-based wage inequality in mainland China, the gender-differentiated employment impacts of deflationary monetary policy in developing countries, the linkages between trade liberalization and reproductive health and rights, and the impact of US state tax policy on women's employment. Among her recent publications are *Trading Women's Health & Rights? Trade Liberalization and Reproductive Health in Developing Countries* (Zed Books, 2006, co-edited with Caren Grown and Anju Malhotra).

Jose Antonio Cordero is Professor of Economics at the Escuela de Economía, Universidad de Costa Rica, San Jose, Costa Rica, and Center for Economic and Policy Research (CEPR). Portions of his chapter were written during an academic year as visiting professor at Mount Holyoke College. Cordero received his PhD from the University of Notre Dame in 1995. His research focuses on the macroeconomics of growth and distribution in open-monetary economies, and on the effects of FDI on economic development.

Gerald Epstein is Professor of Economics and founding Co-Director of the Political Economy Research Institute (PERI) at the University of Massachusetts Amherst. His major research and teaching areas are the

political economy of central banking, the political economy of international finance and egalitarian macroeconomic policy reform. He has published widely in these areas. He has also served as a consultant to the United Nations Development Programme (UNDP), International Labor Organization (ILO), United Nations Conference on Trade and Development (UNCTAD) and is a staff economist with the Center for Popular Economics (CPE) in Amherst, Massachusetts.

Roberto Frenkel is Principal Research Associate at CEDES (since 1977) and Professor at the University of Buenos Aires, Argentina (since 1984). Presently he is also Director of the Graduate Program on Capital Markets, University of Buenos Aires and teaches graduate courses at the Di Tella and FLACSO-San Andrés Universities in Argentina and the University of Pavia in Italy. He is a member of the UNDP Advisors Group, member of the Board of the World Institute for Development Economic Research (WIDER), United Nations University and member of the Academic Council of CEFID-AR. He has published numerous books and articles in academic journals on macroeconomic theory and policy, money and finance, inflation and stabilization policies, and labor market and income distribution, with special focus on Argentina and Latin America.

Luis Miguel Galindo is Professor of Economics at the Faculty of Economics at the National Autonomous University of Mexico in Mexico City. He received his PhD in economics from Newcastle University in Newcastle upon Tyne in the UK. His main research interests are monetary economics and environmental economics. His recent research is concentrated in the transmission mechanism of monetary policy in emerging economics and the economics of climate change. He has worked as an advisor to several financial institutions and international organizations.

James Heintz, an Associate Research Professor and Associate Director of the Political Economy Research Institute (PERI at the University of Massachusetts, Amherst), holds a PhD from the University of Massachusetts and a Master's degree from the University of Minnesota. He has written on a wide range of economic policy issues, including job creation, global labor standards, egalitarian macroeconomic strategies and investment behavior. He has worked as an international consultant on projects in Africa sponsored by the International Labor Organization (ILO) and the United Nations Development Program (UNDP), that focus on employment-oriented development policy. From 1996 to 1998 he worked as an economist at the National Labour and Economic Development Institute in Johannesburg, a policy think tank affiliated with the South African labor movement.

Arjun Jayadev is Assistant Professor of Economics at the University of Massachusetts Boston. He has also been a research fellow at Columbia University's Committee on Global Thought. His work focuses on development and inequality. He received his PhD from the University of Massachusetts Amherst in 2005.

Raghubendra Jha is Professor of Economics and Executive Director of the Australia South Asia Research Centre, Arndt-Corden Division of Economics, Australian National University, Canberra. He obtained his PhD in economics in 1978 from Columbia University, New York, and has previously taught at Columbia University and Williams College in the US, Queen's University in Canada, the University of Warwick in the UK, and the Delhi School of Economics and Indira Gandhi Institute of Development Research in India. His work focuses on macroeconomics and public economics.

Joseph Anthony Lim is currently a Professor in the Economics Department of the Ateneo de Manila University, the Philippines. He was also professor in economics at the University of the Philippines from 1978 to 2004. He was a Rockefeller scholar and his PhD and Master of Science graduate degrees were obtained from the University of Pennsylvania and Massachusetts Institute of Technology, respectively. His fields of expertise are macroeconomics and development economics. His research works include analyses of the Asian crises, growth analyses and diagnostics of the Philippine macroeconomy, the debt burden and its adverse impact on social and economic spending of developing countries, and the gender aspects of employment generation. He was a macroeconomics, finance and debt advisor to the Bureau for Development Policy (BDP) division of the United Nations Development Programme (UNDP) New York headquarters from 2002 to 2004. He is currently a board member of the *Journal of the Asia Pacific Economy* published by Francis and Taylor.

Le Anh Tu Packard is Senior Economist at Moody's Economy.com, a division of Moody's Analytics. She is also a Research Fellow and Convener of the Research and Study Group on Vietnamese Social and Economic Reform, Center for Vietnamese Philosophy, Culture and Society, Temple University, Philadelphia, PA, US, and has spent many years helping the Vietnamese government on various aspects of economic reform. Her current research focus is on the international business cycle, trade and capital flows, and financial crises.

Robert Pollin is Professor of Economics and founding Co-Director of the Political Economy Research Institute at the University of Massachusetts Amherst. He received a PhD in economics from the New School for Social

Research in New York City in 1982. His research centers on macroeconomics, conditions for low-wage workers in the US and globally, and the analysis of financial markets. Has also written and consulted in the area of labor market policies, including the viability of 'living wage' policies in the US. He has directed United Nations Development Programme sponsored projects on employment targeted macroeconomic policies for South Africa and Kenya, and most recently has focused his research on the analysis of job creation in the US in the transition to a renewable energy based economy.

Martín Rapetti is Assistant Researcher at CEDES and a PhD student at the University of Massachusetts Amherst. His field of specialization is macroeconomics for developing countries and his current research focuses on the effects of competitive real exchange rates on economic development.

Jaime Ros is Professor of Economics at the University of Notre Dame, Notre Dame, Indiana and Fellow of the Kellogg Institute for International Studies. Ros specializes in development economics with special reference to Latin America. His most recent book is *Development Theory and the Economics of Growth* (University of Michigan Press, 2000). His articles have appeared in the *Cambridge Journal of Economics*, *World Development*, *Journal of Development Studies*, *The Manchester School of Economics and Social Studies*, *El Trimestre Económico*, *Desarrollo Económico* and other scholarly journals and edited books. Current projects include an edited handbook with Amitava Dutt on development economics as well as a book on the history of Mexico's economic development with Juan Carlos Moreno Brid.

Lance Taylor is the Arnhold Professor of International Cooperation and Development at the New School University, New York. He received a PhD in economics from Harvard University in 1968. He has been Professor in the economics departments of Harvard and the Massachusetts Institute of Technology, as well as a visiting professor at the University of Minnesota, the Universidade da Brasilia, Delhi University and the Stockholm School of Economics. He moved to the New School for Social Research in 1993. Taylor has published widely in the areas of macroeconomics, development economics and economic theory. He has served as a visiting scholar or policy advisor in over 25 countries, including Chile, Brazil, Mexico, Nicaragua, Cuba, Russia, Egypt, Tanzania, Zimbabwe, South Africa, Pakistan, India and Thailand.

Cagatay Telli is a Researcher at the State Planning Organization, Ankara, Turkey. He is a graduate of Bilkent University and his areas of expertise are on general equilibrium modelling and computational methods.

Ebru Voyvoda is Assistant Professor of Economics at the Department of Economics, Middle East Technical University, Ankara, Turkey. She holds a PhD from Bilkent University. Her areas of specialization include general equilibrium modeling, economics of productivity growth and technical change, and environmental economics.

A. Erinc Yeldan is Professor of Economics at Bilkent University, Ankara, Turkey. He was a Fulbright Scholar and Visiting Professor at the University of Massachusetts Amherst and Amherst College while this book was being written. He is also one of the directors of the International Development Economics Associates (IDEAs), New Delhi. Yeldan received his PhD from the University of Minnesota in 1988. His recent work focuses on development macroeconomics and on applied general equilibrium models with emphasis on the Turkish economy.

Andong Zhu is Assistant Professor of Economics at Tsinghua University, Beijing, China. He is a Research Associate of PERI at the University of Massachusetts Amherst. Zhu received his PhD from the University of Massachusetts Amherst in 2005. His recent work focuses on political economy and the imbalances in the world economy and China.
