Index

acid rain 12–13
alkali industry 23–5
automobile industry
and planned obsolescence 29–30
definitions of value in 42–3
learning processes in 86–7
types of strategic perspectives in 47–9
automobile PCS
 evolution of 176–9
history of 102–3
post-consumer waste in 151–3
resource networks in 147, 153–7
strategic perspectives in 124, 131, 138, 140, 153–4
Brent Spar 94–5
carrying capacity 9–10
cultural 10
chemical industry 30
in nineteenth century Britain 23–5
and detergents 38
and REACH 89–90
climate change 142, 144
position of Ford on 132–3
position of GM on 136
coercion 53–4
as transmission mechanism 162
coffee PCS 101–18
 evolution of 174–6
history of 102–3
resource networks in 104, 109, 113, 116–17
strategic perspectives in 108, 112, 115–16
sustainability standards in 103–5
competitive advantage
 see ecological strategies
decoupling 54, 80, 97
 see also greenwashing
definition of ecological value 12–16, 56–7, 60, 74, 183–4, 191
in automobile PCS 154
in coffee PCS 116–17
defined 14
historical examples of 20–37
and institutionalization 92
of Philips CE 66–7
as a result of framing 70–71
of Scanda Metal 65
shared 16
standards and 174–5
in US mining industry 93–4
detergents 38
dominant coalition 70
and change of strategic perspective 170, 184, 187
and coherence of strategic perspective 186
and novelty creation 161
dominant design 41–2
establishing new 45–6
in automobile PCS 119, 146
ecological cycles 1, 10, 39, 57, 77–8, 164, 188, 192
ecological value
creating 2
 see also definition of ecological value
ecological impact 8–9
economic development and 10–12
 technological change and 38–9
ecological strategies 60–63
and competitive advantage 7, 8, 52–3, 74–5, 189
convergence of 5, 54, 189
 coordinative 61–3, 82, 99
defined 14
diversity in 2–6, 54, 160, 189
formative 61–3, 74, 80, 87, 92, 116, 133–4, 149, 154–7, 167, 176–9
operative 61–2, 81–2, 168–9
as a result of problem solving 71
yardstick for 8–12
electric vehicles 45, 125, 128, 130, 134, 137, 140, 161, 163, 170, 178
in France 146–7
in the US 148–9
end of life vehicles 151–3, 155, 178–9
energy PCS 44–5, 49
environmental management 6, 88, 91, 96, 162
evolutionary mechanisms 166, 185
in automobile PCS 176–9
in coffee PCS 174–6
propositions on 187–8
reflexivity and 166–7, 192
retention 162, 166, 168, 170
selection 162, 164–7, 172, 185–8
and system dynamics 171–4
transmission 162–4, 166, 172, 185–8
variation 160–61, 166, 185
evolutionary perspective 5
general structure 159–60
evolutionary process
as punctuated equilibria 40–41
firm
defined 73
rise of the modern 20
see also internal dynamics
food PCS 49
fuel cell vehicles (FCV) 122, 126, 129, 130, 133–4, 136–8, 140–41, 146, 150–51, 177
fuel efficiency 142–5, 155–6, 176–7
fragmentation 170–71
global warming 77–8
and automobile PCS 142–5, 154–5, 176
see also climate change
greenwashing 54, 74, 80, 97
governance
changing 33
self-governance 88, 90–91
hybrid vehicles 50, 121, 126, 130, 134, 136–7, 140, 148, 150–51, 154, 157, 163, 174, 178
Toyota Prius 1, 128–9, 150
imitation 166, 172
in automobile PCS 177–8
in coffee PCS 175–6
as transmission mechanism 163
innovations 16
and ecological strategies 61
technological 40–41
incremental 40
paradigm shifting 45
and resource networks 82–5
institutional theory 8, 53–4, 162–3, 189–90
internal dynamics 63, 70–71, 97, 170, 184, 186–7
and novelty creation 160
as source of variation 160–61
internal combustion engine (ICE) alternatives to 146–51
IPAT formula 39
learning 58, 71, 160–61, 186, 191
collaborative 60
in resource networks 82–6
legitimacy 53–4, 60–62, 74, 79–80, 169
and rules 85–90
and societal demands 90–95
lock-in 44
systemic 16, 46
metabolic consistency 10, 50, 192
of carbon economy 78
mining industry 93–4
natural environment
as wider context of strategy 77–8
niche 154, 165, 167, 172–3, 175, 178, 187–8, 190, 192
market 7, 72, 106
oil industry 28–9
see also Brent Spar
organic coffee 110–11, 113, 161
organizational fields 97–9, 185–7, 189–90
in automobile PCS 176–7
in coffee PCS 174–5
new 169
distinctiveness of 171
dynamics in 171–4
transmission and selection in 165–7
organizational routines 57–60
coordinative 58–60, 82, 85, 96, 99, 167–9, 186, 189
formative 58–60, 87–8, 92, 167–8, 186
as a result of learning and routinizing 71
operative 58–60, 169
planned obsolescence 29–30, 35
power 184–6
and dominant coalition 63, 70, 161, 184
market 29, 35
in resource networks 79, 81–2, 96–7, 184
see also coercion
problem solving 42, 71, 83, 169, 184, 186–7
in resource networks 82–5
as source of variation 160–61
production and consumption system (PCS)
defined 15
dynamics in 171–4
and organizational fields 97–8
propositions regarding 187–8
social structure of 41–2
product service systems 63, 81
resource-based view 52–4, 60, 74, 189
resource dependency
see resource networks
resource networks 79–80, 170–71, 172–3, 184, 186–7, 190
in automobile PCS 147, 153–7
in coffee PCS 104, 109, 113, 116–17
interrelatedness of 95–8
knowledge 82–5
material and financial 80–82
around rules 85–90
around societal demands 90–95
regulation 30–32, 59, 61–2, 87–90, 190
compliance with 6–7
as transmission 162
as selection pressure 165
scenarios of system dynamics 171–4, 180, 187–8
in the automobile PCS 176–9
in the coffee PCS 174–6
selection pressure 164–5, 188–90
ecological 164–5, 188, 190–91, 192
competitive 165
as distinct from transmission 165
and reflexivity 165–6
and system dynamics 172–4
see also evolutionary mechanisms
social constructionist perspective 14, 36, 46, 54, 182–3
standards
in coffee PCS 103–5, 113–16, 174–6
on environmental management 91, 96–7
in resource networks 85, 88, 173
and transmission 162–4
strategic perspective
coherence in 170–71, 186
definition of 47
dynamic 47
elements of 55–63
and evolutionary mechanisms 168–70
examples of 63–70
grey areas between 49–50, 72
propositions regarding 185–8
stable 47
transformative 47
typology of 46–50
strategic orientation 55–6
as a result of positioning 70
sufficiency perspective 39, 57
sustainable development 9, 32–3, 57
systemic perspective 15–17, 59, 183, 190

technological change 17, 38
and ecological impact 38–9
as a socially embedded process 40
technological discontinuities 40
technological paradigm 42–6
  in automobile PCS 154, 170
technological trajectories 40–44
  transformation of 45
technology 34
  definition of 38
timing 169
transition management 62, 172, 174
uncertainty 34–5, 41, 45, 92, 164, 188
  as motive for imitation 54, 163
