Contributors

Cristina d’Almeida, MSc, is a chemical engineer and is currently working on a PhD in economic sciences at University Paris 13. Since 2000, she has been working with intellectual property management and its potential impacts on public health policies concerning HIV/AIDS in southern countries. Mrs d’Almeida previously worked as an advisor on intellectual property and technology transfer at Farmanguinhos, the federal pharmaceutical laboratory of the Brazilian Ministry of Health. In 2003, she moved to the Brazilian STD/AIDS Program, where she worked as an international cooperation advisor and the Executive Secretary of the Technological Network on HIV/AIDS.

Andreia Pereira de Assis holds a BA (social service) from the Federal University of Fluminense and an MA (social policies) from the State University of Rio de Janeiro. She works as a municipal social worker in Rio de Janeiro and as a research assistant in the Programa de Estudos sobre a Esfera Pública at the Fundação Getulio Vargas, Rio de Janeiro.

Mamadou Camara is Associate Professor in Economics at the Centre for Distance Education in the University of Paris 13’s Institute of Technology, and a researcher at the Paris Nord Centre for Economics (CEPN), University of Paris 13. He is a member of the Intellectual Property Law, South–South Production and Circulation of Unbranded Anti-Viral Drugs team, a project financed by the National Agency for Research on AIDS. He obtained his PhD in economics in 2001. His postdoctoral research on ‘Access to Antiviral Treatment in Sub-Saharan Africa: An Evaluation of the Regional Projects in the Production of Unbranded Antiviral Drugs in the ECOWAS (Economic Community of West African States) Area’, a project financed by the association Sidaction, was undertaken in 2004.

Kenneth Rochel de Camargo Jr is Adjunct Professor at the State University of Rio de Janeiro and an international partner of the HIV Center for Clinical and Behavioral Studies at Columbia University. He holds a PhD in public health from the State University of Rio de Janeiro (1993) and a postdoc from McGill University, Canada (2000/2001). He is an international associate editor of the American Journal of Public Health and editor of Physis.
Maurice Cassier is a sociologist at CNRS. His work focuses on intellectual property rights on scientific results, life forms and medical products in the 19th and 20th centuries. His most recent publications concern the appropriation of Pasteur’s vaccines (‘Appropriation and commercialization of the Pasteur anthrax vaccine’, *Studies in History and Philosophy of Biological and Biomedical Sciences*, 36(4), 2005), shared ownership of software and the genome (Con *temporary European History*, Cambridge University Press, 2006), and intellectual property and drugs in Brazil (*Reciis*, Oswaldo Cruz Foundation, 2007).

Julien Chauveau is a PhD student currently affiliated with Research Unit UMR912 ‘Economic and Social Sciences, Health Systems and Societies’ at INSERM (French National Institute for Health and Medical Research), IRD at Aix-Marseille University and Southeastern Health Regional Observatory (ORS-PACA), all in Marseilles, France. His main research interests include HIV/AIDS: he carried out a French socio-behavioural survey in 2001. He conducted the same research in 2002 on South African socio-behaviour. Since 2003, he has been affiliated to the ANRS (French National Agency for Research on AIDS and Viral Hepatitis). His research agenda focuses on access to AIDS drugs in Africa and in Brazil at the Department 379 at INSERM, where he is currently leading his doctoral thesis on economy of health.

Benjamin Coriat is Professor of Economics at the University Paris 13 and Chairman of the coordinated action group ‘Socio-economics of AIDS’ at ANRS. He also leads the research unit ‘Innovations, Institutions and Economic Dynamic’ at CEPN. His recent research focuses on intellectual property rights and the economics of innovation and he has published a number of articles and books on these issues.

Marilena Correa, MD, is a professor at the Institute of Social Medicine of the State University of Rio de Janeiro, where her current research area is biomedical innovation. She has a PhD in humanities and health sciences and has published a book on human reproduction and medically-assisted procreation.

Maria Helena Costa-Couto, a social worker, trained in social services at the Federal University of Rio de Janeiro (1991). She received her MPhil (2002) and PhD (2007) in public health at the State University of Rio de Janeiro. Since 2006, she has coordinated the Ethics in Research Committee and in 2008 became an associate researcher of the Policy, Planning and Health Administration department of the Social Medicine Institute, both at the State University of Rio de Janeiro.
Eric Delaporte is Professor of Infectious and Tropical Diseases and Head of the Department of International Health at the University of Montpellier and director of a research unit on AIDS in developing countries at Institut de Recherche pour le Développement (IRD) (French Institute of Research for Development). He has 20 years’ experience of conducting research and intervention programs in Africa. He was formerly the technical assistant for the EU of different public health programs on STIs/HIV in Senegal and Gabon. His main focus in HIV research concerns access to antiretroviral therapy in Africa. He was also the principal investigator for the European Commission of an operational research project on a multidisciplinary evaluation of the Senegalese initiative of access to ARV. He is currently the northern coordinator of the Cameroonian sites of research for ANRS.

Karim Diop is a chemist specializing in public health. Between 2001 and 2003 he undertook a research project for ANRS giving medical care, especially antiretroviral drugs, at the National University Hospital of Fann in Senegal. Since 2004, he has been in charge of antiretroviral drugs at the National Program for the Fight against AIDS in Senegal and, since 2006, he has coordinated the ESTHER Program in Senegal.

Sonia Fleury holds a BSc in psychology, from UFMG, Brazil, and an MSc in sociology and a PhD in political science, both from IUPERJ, Brazil. She is a member of the Social and Economic Development Council of Brazil, coordinator of the Public Domain Study Program of the Observatory of Social Innovation and professor at the Brazilian School of Public Administration and Business at the Getulio Vargas Foundation. She gained experience in the areas of education, research and institutional analysis for several organizations in Brazil and abroad, mainly on topics relating to health and social security. She has published a number of books, chapters and articles about democracy, health systems and health policy.

Kenneth A. Freedberg, MD, MSc, is Director of the Program in HIV Epidemiology and Outcomes Research at the Harvard Center for AIDS Research (CFAR) and Associate Professor of Medicine at Harvard Medical School. He is a member of the United States Public Health Service/Infectious Diseases of America (USPHS/IDSA) Committee on Guidelines for Opportunistic Infections in HIV Disease, and a former Chair of the Outcomes Committee of the US AIDS Clinical Trials Group (ACTG). His research interests are in cost-effectiveness of strategies for HIV management, and the use of simulation models to inform clinical care and health policy in problems in global health.
Lia Hasenclever is an associate professor in economics at the Department of Industrial Economics at the Federal University of Rio de Janeiro. She is a graduate in economics and industrial economics from the same university and a PhD in production engineering. Since 1996, she has been a research member of the Economics of Innovation Group at the Federal University of Rio de Janeiro. Her research areas include industrial and technological structure of the chemical/petrochemical and pharmaceutical industries, dynamics of innovation and the management of R&D, science and technology indicators, regional development and industrial clusters. She has published in the areas of intellectual property and innovation in the pharmaceutical industry.

Sinata Koulla-Shiro is an associate professor of microbiology and infectious diseases in the Faculty of Medicine and Biomedical Sciences at the University of Yaoundé 1, Cameroon. After working for four years in the unit of internal medicine at Yaoundé Central Hospital, she obtained, in 1982, a World Health Organization Fellowship for postgraduate study at the Faculty of Medicine, University of Geneva, Switzerland where, in 1985, she received a diploma in Internal Medicine. Between 1999 and 2002 she was the coordinator of the Cameroon National AIDS Program and, since 2002, has been the vice-chair of the National AIDS Control Committee (NACC). She is currently the first Technical Advisor at the Ministry of Public Health where she is in charge of HIV/AIDS matters at the Ministry’s cabinet.

Gaëlle Krikorian is a doctoral student in sociology at EHESS (Ecole des Hautes Etudes en Sciences Sociales). She is currently working on the way health issues are taken into account in the bilateral negotiations of free trade agreements. Her research agenda focuses, in general, on the political working-out of developing countries in the intellectual property and public health fields. She is also a research member of the IRIS (Institut de recherche interdisciplinaire sur les enjeux sociaux) and a member of ACT UP (a French association which fights against AIDS) in Paris.

Joseph Larmarange completed in 2007 a PhD in demography, at University Paris Descartes, entitled ‘HIV prevalence in Africa: validity of a measurement’, supported by ANRS (IRD/Centre Muraz – ANRS 12114). He is currently a demographer at IRD in CEPED (UMR 196 – Paris Descartes/INED/IRD) and works on the ELIHoS project (ANRS 12139), a socio-behavioural, epidemiological and anthropological survey among men having sex with men (MSM) in Senegal.

Bernard Larouzé, MD, is a public health specialist and senior researcher at INSERM. He initially trained in Paris hospitals as a hepatologist and tropical medicine physician, and began his research career at the Division of Clinical
Research, Institute for Cancer Research (Philadelphia) working on hepatitis B in Mali and Senegal. Since joining INSERM, he has pursued research projects predominantly on hepatitis, HIV and tuberculosis in Maghreb, Sub-Saharan Africa and, more recently, in Brazil where he coordinates research programs on HIV and tuberculosis integrating epidemiology and social sciences.

**Guillaume Le Loup**, MD, DTMH, is a graduate of the Institut d’Etudes Politiques de Paris (Institute of Political Science of Paris). He also received an MA in history and political science from the University of Paris. He is a physician, specializing in tropical diseases and travel medicine, at AP-HP hospitals in Paris and a PhD student at University Pierre et Marie Curie (UPMC), Paris. Before his training in medicine, he worked for French local government and NGOs.

**Stéphane Luchini** is currently affiliated with GREQAM (Groupement de Recherche en Economie Quantitative d’Aix-Marseille), IDEP (Institute for Public Economics) and CNRS (Centre National de la Recherche Scientifique). He has held a PhD in economics since January 2000 and, since October 2002, has been a researcher at the CNRS, in particular for the GREQAM. He is also a permanent member of IDEP where he is in charge of the health department.

**Constance Marie Meiners** is currently affiliated with Research Unit UMR912 ‘Economic and Social Sciences, Health Systems and Societies’ at INSERM, IRD at Aix-Marseille University and Southeastern Health Regional Observatory (ORS-PACA), all in Marseilles, France. She completed her MSc in health economics at the University of York in 2005. Since January 2000 she has been a civil servant of the Brazilian Federal Government and has had the opportunity to work with issues on science and technology, patent rights and health care from a public policy perspective. She joined the research unit 379 of INSERM in August 2007 as a health economics PhD student.

**Jean-Paul Moatti** is currently affiliated with Research Unit UMR912 ‘Economic and Social Sciences, Health Systems and Societies’ at INSERM, IRD at Aix-Marseille University and Southeastern Health Regional Observatory (ORS-PACA), all in Marseilles, France. He has been a professor in economics at the University Aix-Marseille II since 1995. He is also Director of the Federative Research Institute 134 SHESS-AM (Economic, Human and Social Sciences Applied to Health at Aix-Marseille). Currently, his main scientific responsibilities include: Vice-Chair of the Scientific Advisory Council of INSERM, Member of the Advisory Committee for Health Research of the World Health Organization (WHO) and Chair of Scientific Committee 5 ‘Public Health, Human and Social Sciences’ of the French Agency for AIDS Research (ANRS).
Fabienne Orsi is an economist and researcher at IRD, INSERM, Unité 912 Marseille and CEPN, University Paris 13. She is currently working on intellectual property rights in the fields of biotechnology and the pharmaceutical industry. She has recently published two articles: ‘TRIPS post-2005 and access to new antiretroviral treatments in southern countries: issues and challenges’, *AIDS, 21*(15), 2007 (with C. d’Almeida, L. Hasenclever, P. Tigre, M. Camara and B. Coriat) and ‘The New Role and Status of Intellectual Property Rights in Contemporary Capitalism’, *Competition and Change*, 2006 (with B. Coriat).

Cristina de Albuquerque Possas is a social scientist and currently head of the Research and Development Unit at the National STD-AIDS Program of the Brazilian Ministry of Health. She is currently on leave from her role as Professor of Health Policy at the National School of Public Health at the Oswaldo Cruz Foundation (FIOCRUZ), Brazil, where she has also been the director of graduate programs. She was formerly a visiting scientist, Takemi Fellow and Fulbright Fellow in a postdoctoral program at the Harvard School of Public Health. She holds a PhD in public health from FIOCRUZ. She has published in the *Annals of the New York Academy of Sciences*, World Bank and in 2002 was editor of the special supplement *Ethics in Genetic Manipulations* of the journal *Strategic Partnerships, 16*(1).

Amélie Robine, recently completed a PhD in Law, at University of Paris 1 – Panthéon-Sorbonne, entitled ‘Transfer and acquisition of technology in emerging countries – The Brazilian example of access to ARVs’, supported by ANRS, the French Foreign Ministry, the Brazilian Ministry of Health and Alfa European Network. She is currently working at the Centre de Recherche en Droit des Sciences et des Techniques of the University of Paris 1 (UMR 8103) both on intellectual property rights and access to medicines in developing countries and on coexistence between GM and non-GM soya supply chain issues (COEXTRA European project).

Caroline E. Sloan graduated from Harvard University with a BA in History. She is currently a project coordinator at Massachusetts General Hospital for the ‘Cost-effectiveness of Preventing AIDS Complications (CEPAC)’ group, an HIV-modelling team working on cost, effectiveness and cost-effectiveness of HIV treatment strategies in developed and developing countries.

Cassandra Sweet is a PhD candidate and Gates scholar at the University of Cambridge. Her thesis, ‘The Political Economy of South–South Trade: Indian Pharmaceuticals in Brazil’, examines a decade of increasing trade and investment, and impacts for competition in generics and public health
programmes in Brazil. Her interests include globalization, intellectual property, economic development and public health.

**Bernard Taverne**, MD, PhD, is an anthropologist and researcher in Research Unit 145 ‘VIH/SIDA et maladies associées’ (directed by Eric Delaporte) at the IRD, France. From 1993 to 1999 he studied the perceptions of HIV/AIDS in rural areas of the Mossi population in Burkino Faso. Since 2000, he has worked in Senegal supervising research on the sociology, anthropology and economics of health care in terms of access to antiretroviral drugs.

**Jean-Claude Thoenig** is an emeritus senior research fellow at the University Paris-Dauphine, CNRS, Paris. He has been a professor of management at INSEAD for many years. His research covers issues linked to organization and policy-making management. He is the author of *Making Strategy and Organization Compatible* (with Claude Michaud, 2003) and ‘Territorial institutions’ in *The Oxford Handbook of Political Institutions* (2006).

**Bruno Ventelou** is a researcher affiliated to GREQAM (Groupement de Recherche en Economie Quantitative d’Aix-Marseilles) at CNRS and the head of a team specializing in health economics at INSERM, Marseilles, Unit 912. He recently published works on the relationship between health and employability: ‘Obesity and employability, empirical evidences from a French national survey’, *Economics and Human Biology*, 3, 2005 (with Bérengère Saliba and Alain Paraponaris).

**Yann Videau** is a graduate of the Ecole Normale Supérieure de Cachan, France. He is currently a PhD student in health economics in the Research Unit UMR 912-INSERMIRD. The unit’s main fields of research are the economics of prevention, the regulation of healthcare supply and the macroeconomic impact of HIV/AIDS in developing countries. His recent publications include: ‘Time is costly: modelling the macroeconomic impact of scaling-up antiretroviral treatment in sub-Saharan Africa’, *AIDS*, 22(1), 2008 (with B. Ventelou, J.P. Moatti and M. Kazatchkine) and ‘The general practitioners in front of reforms: the reactions of the sample group of liberal physicians of the region PACA’, *International Journal of Medical Sciences*, 23(5), 2007 (with B. Ventelou, J.B. Combes, P. Verger and A. Paraponaris).

**Philippe Vinard** is a health economist specializing in health care funding (specifically: sectional approach, setting up the free access and system of payment and prepayment, and analysis of cost-effectiveness). For 15 years he has worked as an assistant in various ministries of health in Africa and Asia. He set up a research department, ALTER, on international health
which, for six years, has been working on assessment projects, interventionist identification and training in the health field for developing countries.

Yazdan Yazdanpanah is Professor in Infectious Disease at Tourcoing Hospital and Lille School of Medicine, France. He is a member of the ‘anti-retroviral and anti-hepatitis treatment’ group at AFSSAPS (French regulatory authority) and member of several scientific committees at ANRS. His research interests are in HIV and viral hepatitis, clinical epidemiology and pharmaco-economics of antimicrobials.
