<i>General Introduction</i>	xi
PART 1: FOUNDATIONS	
Introduction	3
<b>1. Mises and the Austrian Tradition</b>	<b>5</b>
1 Positivism and Historicism: Specificity of the Social Field	5
1.1 The Vienna Circle and the Positivist Theories: A Critical View	6
1.2 The Refusal of Epistemological Relativism: Opposition to Historicism	9
2 Analysis of the Social Field: Theory and History	10
2.1 Apriorism, the Foundation of Theory	11
2.2 History, Field of Understanding	12
2.3 Practical Complementarity, Epistemological Subordination	13
3 Mises and His Predecessors: Contentions and Continuities	15
3.1 Fidelity to a Methodological Approach	16
3.2 An Epistemological Rift	18
<b>2. Praxeology, Axiomatic System of Economics</b>	<b>25</b>
1 The Praxeological Model's Structure	25
1.1 Characters	26
1.2 Conditions	27
1.3 Implications	28
2 Praxeological Subjectivism	29
2.1 The Reign of Wertfreiheit	29
2.2 The Rationality of Human Action	31
3 Praxeology and Psychology	32
3.1 Preference and Indifference	32
3.2 Action, Creator of Preference	33
3.3 The Tendency Towards Equilibrium: A Praxeological Definition	34

<b>3. Action and Interpersonal Exchange: The Limits of the <i>A Priori</i> Approach</b>	41
1 Varying Forms of Interpersonal Exchange: From Barter to Money	41
1.1 Barter, a Product of Theory and History	42
1.2 Indirect Exchange, the Money Price Generator	43
2 Epistemological Problems with Market Exchange	46
2.1 The Question of Subsidiary Hypotheses: The Constraints of Ignorance	46
2.2 What Theoretical Bases for Market Economics?	49
 PART 2: CATALAXY, A RESPONSE TO IGNORANCE	
Introduction	57
<b>4. Market Formation</b>	59
1 <i>The Sensory Order</i> : Hayek's Contribution	60
1.1 The Mind as Classifying Structure	61
1.2 Psychological Foundations of Subjectivity	61
2 Market and Society	62
2.1 The Map and the Model: The Role of Pre-Sensory Experience	62
2.2 Cultural Representations	64
3 Prolegomena and Prolongations	65
3.1 Ideal Types: Hayek, Schütz and the Austrian Tradition	66
3.2 Abstract Rules and Spontaneous Order	68
<b>5. A World of Discovery</b>	73
1 Markets, Equilibrium and Disequilibrium	73
1.1 Information Is Not the Same as Knowledge	73
1.2 Disequilibrium Prices	74
1.3 Ignorance, Errors and Processes	76
2 The Entrepreneur-Promoter	78
2.1 From the Praxeological Entrepreneur to the Market Promoter	78
2.2 Alertness as Ability of Perception	79
2.3 The Nature of Learning	81
2.4 From Ignorance to Knowledge: The Role of Profit	84
3 The Institutional Dimension of Entrepreneurship	87
3.1 Competition as a Discovery Process	88
3.2 Free Entry Competition	91
3.3 The 'Increment of Freedom'	92
3.4 The Myth of Social Justice	94

<b>6. Tendency towards Equilibrium</b>	103
1 Analytical Framework	104
1.1 Statics and Dynamics	104
1.2 'Exogenous Changes' and Entrepreneurship	104
1.3 'Equilibration' and Periods	105
2 Forming Expectations	107
2.1 Speculation and Understanding	108
2.2 The Contribution of Cognitive Psychology	111
2.3 The Subjectivism of Expectations	113
3 Succeeding In Expectations	118
3.1 The Entrepreneur as Creator of the Future	118
3.2 Austrian Economics of the Firm	123
3.3 The Hayekian View: Spontaneous Orders as Pattern Predictions	128
3.4 Plans and Prices	133
PART 3: APPLICATIONS AND DEBATES	
Introduction	151
<b>7. The Debate on Collectivism</b>	153
1 The 'Irrationality' of Collectivism	155
1.1 Monetary Calculation	155
1.2 The 'Chaos' of Collectivism	156
1.3 A Procedural Conception of Economic Systems	158
2 Neo-Austrian Theory versus General Economic Equilibrium	158
2.1 The Quantity of Information	159
2.2 The Change in Information	162
2.3 Computing And Mathematics: Linear Programming	167
3 The Nature of Knowledge	169
3.1 Tacit Knowledge	169
3.2 Incentives	170
3.3 Institutions	173
4 An Alternative Reading: The Rothbard Argument	175
4.1 Knowledge and Calculation	176
4.2 The Systemic Impossibility of Centralized Economic Calculation	178

<b>8. Austrian Theory of the Business Cycle</b>	<b>187</b>
1 First Steps of the Approach	188
1.1 Capital as Structure, Roundabout Production Processes	188
1.2 The Two Interest Rates	192
2 The Monetary Logic of the Cycle	196
2.1 A Monetary Mirage: The Boom	197
2.2 The Constraint of Subjectivism: The Crisis	199
3 Monetary Stability: A Default Solution	202
3.1 Monetary Neutrality and its Limits	202
3.2 From Gold Standard to Private Currencies	203
4 The Great Debates	207
4.1 Savings, Investment and Money: The Hayek Keynes Collision	207
4.2 'Equilibrium' and 'Equilibriums': Hicks' Critique	209
4.3 Real Economies versus Monetary Economies: The Hayek-Sraffa Debate	212
<b>9. Welfare Economics: Workable Definitions</b>	<b>219</b>
1 The Market and Satisfaction: A Procedural Approach to Welfare	220
1.1 Exchange Producing 'Social Utility'	221
1.2 The Kirzner Alternative: Coordination as Process	222
1.3 Private Property as a Condition of Forming Plans: 'Catallactic Efficiency'	225
2 Neo-Austrian Welfare Economics and Normativity	227
2.1 The Argument of 'Demonstrated Preference'	227
2.2 From Wertfreiheit to Free Market Normativity	228
2.3 The Pre-eminence of Value Judgements	233
3 An Open Question: The Argument of Survival	233
3.1 Survival and Coordination	233
3.2 A Praxeological View of the Survival-Normativity Relation	237
3.3 Unprescribed Normativity	241

<b>Appendix: Schumpeter and the Austrian Tradition</b>	247
<b>General Conclusion</b>	255
<i>Bibliography</i>	257
<i>Analytical Index</i>	291
<i>Index of Names</i>	299

‘If Austrian economists are to be able to work constructively in the rough and tumble of the intellectual market place, anything approaching rhetorical brawling must once and for all be rejected’ (Kirzner, ‘Reflections on the Misesian Legacy in Economics’, 1996a, p.148).
