

Tables

3.1	Derived factors for analysing potentially disruptive innovations	38
3.2	Forces for disruption in automotive applications of fuel cells	41
4.1	Characteristics for each of the 10 HyWays countries in the timeframe 2025–2030	55
4.2	Scenario characteristics	58
5.1	Sample description	71
5.2	Top twenty organizations in the fuel cell network	79
6.1	Patent characteristics in the fuel cell industry, 1980–2007	90
6.2	Level of substitutability between fuel cell technologies from 1999 to 2007	95
6.3	The evolution of technological complementarities	97
7.1	Results of hypotheses test	110
9.1	Fuel cell timetable	141
11.1	Key assumptions on hydrogen and fuel cell applications for a 2020 scenario	175
14.1	HyRaMP founding statement: 14 April 2008	219
