Editors

Stefano Pogutz
Stefano Pogutz is Assistant Professor of Management, Department of Management, at Bocconi University, Milan, Italy. He is the Director of Bocconi first level Master on ‘Energy and Environmental Economics and Management’. He is a senior researcher at SPACE, the European Research Centre on Risk, Security Occupational Health and Safety, Environmental and Crisis Management, Bocconi University. His research interests are sustainability and innovation, cleaner technologies, renewable energies, environmental management and corporate social responsibility.

Angeloantonio Russo
Angeloantonio Russo is Assistant Professor of Management at Parthenope University, Naples, Italy. He got his Ph.D. in Business Administration and Management at Bocconi University, where he is also Research Fellow of the CSR Unit, Department of Management. His research interests are mergers and acquisitions, strategic alliances, environmental management, renewable energies, sustainability and corporate responsibility.

Paolo Migliavacca
Paolo Migliavacca is Junior Assistant Professor of Management at Bocconi University, Milan, Italy and Lecturer at the University of Turin, Turin, Italy. He got his Ph.D. in Management at Catholic University – Milan. He is Research Fellow of the CSR Unit and the SPACE Research Centre, Department of Management, Bocconi University. He serves as independent director in some public and private institutions. His research interests are mergers and acquisitions, strategic alliances, innovation finance, renewable energies, sustainability and corporate responsibility.
Contributors

Paolo Agnolucci
Paolo Agnolucci is Visiting Scholar at the Cambridge Centre for Climate Change Mitigation Research (4CMR) which is part of the Department of Land Economy, at University of Cambridge, Cambridge, UK, and a freelance analyst and modeller. Paolo obtained his Ph.D. from Birkbeck College, University of London and spent several years working at the Policy Studies Institute. His research interests are energy demand forecasting, dynamic models for time-series and panel datasets, use of hydrogen in the energy system and renewable electricity.

Michael Ball
Michael Ball studied Industrial Engineering and Economics at the University of Karlsruhe and the North Carolina State University. He earned his Ph.D. from the University of Karlsruhe in the field of energy system modelling, developing a model for hydrogen infrastructure analysis, which served as a tool for producing the European Hydrogen Energy Roadmap. He currently works as CO₂ advisor for a multi-national energy company.

James Brown
James Brown is currently a Principal Researcher on an ESRC funded study ‘The “uncertain middle”: the role of demonstration projects and trials in influencing success in sustainable innovation’. After graduating in Mathematics at Cambridge, Jim Brown worked in the computer industry as a systems engineer, specializing in large mainframe applications. In 1994 he joined Cass Business School and since then has carried out a number of research projects on biotechnology, optoelectronics and fuel cell technology into issues related to the management of technology.

Mary Jean Bürer
Mary Jean Bürer is a post-doctoral researcher at the College of Management of Technology at the Ecole Polytechnique Fédérale de Lausanne (EPFL), Lausanne, Switzerland. She received her doctorate in Economics at the University of St Gallen. Her research fields are sustainable energy policy and economics, climate change policy and clean energy finance.

Marcello Contestabile
Marcello Contestabile is Research Associate in Energy Policy and Technology at Imperial College London, UK. His current research interests are low-carbon road transport technology and policy, particularly
in the area of hydrogen fuel cell and battery electric vehicles and related infrastructures. Marcello graduated in electrochemistry at the University of Rome ‘La Sapienza’ and worked as an R&D scientist in the battery industry before joining Imperial College.

Ludovic Dibiaggio
Ludovic Dibiaggio is Associate Professor and Associate Dean of Research at CERAM Business School, Sophia Antipolis, France. His research is dedicated to the impact of knowledge on firms, industries and territories; he is also interested in the problem of the organization of knowledge systems and the subsequent issues on the coordination of activities in innovation processes.

Dale Goddard
Dale Goddard is a student of the energy markets with specialties in computer software and economics. He has a master’s degree in Business Administration from the University of Utah and an undergraduate degree in Geology from The Colorado College.

Yuko Harayama
Yuko Harayama is Professor in the Management of Science and Technology Department at the Graduate School of Engineering of Tohoku University, Sendai, Japan. She received her Ph.D. in Education Science in 1996 and a Ph.D. in Economics in 1997, both from the University of Geneva, Geneva, Switzerland. She has a broad range of experience that encompasses work as an Assistant Professor in the Department of Political Economy at the University of Geneva, a Fellow at the Research Institute of Economy, Trade and Industry in Japan and an executive member at the Council for Science and Technology Policy in Japan. Her research interests are science and technology policy, innovation strategy and higher education policy.

Paul Harborne
Paul Harborne is currently a Principal Researcher on an ESRC funded study ‘The “uncertain middle”: the role of demonstration projects and trials in influencing success in sustainable innovation’. Paul worked for nearly 30 years in telecommunications in a variety of product management, new product development and change management roles, also gaining an MBA (Marketing) and Ph.D. from City University during that period. His research interests are the leadership and management of innovation, particularly radical technological innovation and service product innovation.
Chris Hendry

Chris Hendry is Centenary Professor in Organizational Behaviour; Director of the Centre for New Technologies, Innovation and Entrepreneurship (CENTIVE); and was, until recently, Associate Dean (Research). He was previously Principal Research Fellow and Associate Director in the Centre for Corporate Strategy and Change at Warwick University, UK. Chris has been active for a number of years in research concerning innovation and major technological change, particularly in biotechnology, optoelectronics and fuel cell technology.

Kuniaki Honda

Kuniaki Honda is Director in CTO Office of Osaka Gas Co., Ltd, Osaka, Japan. He graduated from Doshisha University with a bachelor’s degree in Chemical Engineering in 1972. He was the National Coordinator of Hydrogen/Fuel Cell of Coordination Program of Science & Technology Projects, Council for Science and Technology Policy, Cabinet Office, Government of Japan from July 2005 to the end of March 2008. His research interests are hydrogen energy and fuel cell cogeneration system.

Philippe Larrue

Philippe Larrue is the Director of Technopolis Group France, Paris, France. His core competencies lie in the area of energy research and innovation policy. Philippe holds a Ph.D. in economics of innovation from the University of Bordeaux. His research focused on the public and private strategies that drive environmental innovation patterns in the early stage of an industry. This research was carried out through the case of advanced batteries for electric and hybrid vehicles. Previous experiences include research fellow positions at INSEAD Strategy Department and at RIETI (‘Think-tank’ of the Japanese Ministry of Economy Trade and Industry). Since joining Technopolis at the beginning of 2004, he has worked on projects mainly related to evaluation and strategy of public policies for research, innovation and education.

Maryam Nasiriyar

Maryam Nasiriyar is doctoral student at IAE of Aix-en-Provence, Sophia Antipolis, France and CERAM Business School. Her areas of interest are focused on strategic management, technological innovation and industrial dynamics. She dedicated her research to the role of technological knowledge in firms’ conduct and performance.

Paul Nieuwenhuis

Paul Nieuwenhuis is Co-Director of the Centre for Automotive Industry Research (CAIR) at Cardiff University, Wales, UK which he joined in 1990.
CAIR studies economic and strategic aspects of the world motor industry. He is a founder member of the ESRC Centre for Business Relationships, Accountability, Sustainability and Society (BRASS). His main interests have been historic and environmental and publications have been in these areas, for example *The Green Car Guide* (1992), *The Death of Motoring?* (1997), *The Automotive Industry and the Environment* (2003), a string of articles and he also contributed to the Beaulieu Encyclopaedia of the Automobile which won a Cugnot Award from the Society of Automotive Historians.

**Stian Nygaard**
Stian Nygaard is a Lecturer at the Centre for Technology, Innovation and Culture – TIK at the University of Oslo, Oslo, Norway. Stian Nygaard has a Ph.D. in innovation studies from Lund University and his research focus is on commercialization processes for emerging energy technologies.

**Marieke Reijalt**
Marieke Reijalt has a background in International Environmental Law and is a professional silk screen printer, working in her family’s screen printing business in the Netherlands and California. Her printing and environmental background brought her in contact with the first fuel cell developments. She set up the World Fuel Cell Council’s Italian office in Milan in 2002 and was subsequently asked to run the office of the Italian Hydrogen and Fuel Cell Association, H2IT. Since 2006 she has been the Executive Director of the European Hydrogen Association, EHA, and is Vice President of COGEN Europe, the European cogeneration association. Recently she became the Vice President of the Educational Working Group of the International Partnership for the Hydrogen Economy.

**Annika Rickne**
Annika Rickne is Associate Professor at CIRCLE, Lund University and director of research at the Dahmén Institute, Sweden. Her research includes economic growth initiated by new scientific or technological knowledge, creating opportunities that reshape existing knowledge fields and industries or gives rise to the evolution of new ones. Current projects include an international analysis of the field of regenerative medicine, regulation of biotech in Europe, an analysis of regional development initiatives within biomedicine, as well as analysis of barriers and enablers to the early commercialization of stem cell related research.

**Giorgio Simbolotti**
Giorgio Simbolotti is President’s Senior Advisor on Energy Technology at the Italian Agency on New Technology, Energy and Environment
Innovation, markets and sustainable energy

(ENEA), Rome, Italy. With the International Energy Agency from 2001 to 2007, he has been in charge of IEA programs on CO₂ capture and storage, nuclear technologies, hydrogen and fuel cells. He earned his university degree in nuclear engineering from the University of Rome and a Ph.D. in Energy Technology from the Politecnico of Torino, Italy.

Philipp Seydel
Philipp Seydel is a junior researcher at the Fraunhofer Institute for Systems and Innovation Research in Karlsruhe, Germany. He studied industrial engineering and management at the University of Karlsruhe and economics at the University of Hagen. His research focuses on new energy vectors.

Clodia Vurro
Clodia Vurro is a Ph.D. Candidate of Business Administration and Management at Bocconi University, Milan, Italy, where she is also research fellow of the CSR Unit, Department of Management. Her primary research interests span from organizational learning applied to socially responsible behaviour and strategies to social and sustainable entrepreneurship.

Martin Wietschel
Martin Wietschel is a senior scientist and project leader at the Fraunhofer Institute for Systems and Innovation Research in Karlsruhe. He is an outside lecturer at the University of Karlsruhe, Germany, where he received his Ph.D. and habilitation in economics, and ETH Zürich. His research fields are energy-economics, energy models, hydrogen roadmaps and infrastructure build up.

Robert Wuebker
Robert Wuebker is a doctoral candidate in Management at Rensselaer Polytechnic Institute, Troy, New York. He received his undergraduate degree in Philosophy from the Ohio State University, USA, and an MBA from EDHEC-Institut Theseus, France. His research interests include entrepreneurship and capital markets, renewable energy technology and strategic management.

Rolf Wüstehagen
Rolf Wüstehagen is the Vice Director of St Gallen University’s Institute for Economy and the Environment, St Gallen, Switzerland. He teaches energy and sustainability management at the University’s business school. His research focus is on understanding investor and consumer behaviour.
related to innovative energy technologies, as well as related policy implications. Rolf is a member of the core group on sustainable energy systems of the Swiss Academies of Arts and Sciences.

**Clovis Zapata**

Clovis Zapata is a research associate at the ESRC Centre for Business Relationships, Accountability, Sustainability and Society (BRASS) at Cardiff University, Wales, UK. He is also a doctoral researcher at Cardiff Business School on the Business–Economics of the Automobile Industry. He has been a visiting scholar at the Institute of Transportation Studies at the University of California – Davis, USA, during the academic year 2006–2007. Previously, he has worked as an economist for the World Bank and the Brazilian Government in the Ministry of the Environment and the Ministry of Justice. His research interests are in environmental policy, environmental market-based instruments, business models for the automobile industry and sustainable mobility.
