and associated with the Research Centre on Inequality, Poverty, Social Exclusion and the City (OASeS) of the University of Antwerp. Her main research interest is the study of social inequality from a life-course perspective, with special attention to cross-national variations related to the impact of cultural patterns, family structures and institutional arrangements. Her current research focuses on the stratification over the life course in different institutional settings.

Lluis Flaquer is currently Professor of Sociology at the Universitat Autònoma de Barcelona. He took a degree in Political Science at the University of Paris Institut d’Études Politiques and then he received his PhD in Law at the Universitat Autònoma de Barcelona. His current research topics include the changing structure of the family, new family forms, family policy and individualization. He was the director of WELLCHI network on ‘The well-being of children: the impact of changing family forms, parents’ working conditions, social policy and legislative measures’, financed under the 6th Framework Programme of the European Union (2004–07).

Anna Garriga is currently a PhD candidate at the Department of Political and Social Science in the Universitat Pompeu Fabra in Barcelona. She holds a degree in Political Science from Universitat Autònoma de Barcelona. Her current research topics include the causes and consequences of divorce and cohabitation, and their effects on adults and children. Currently, she is the coordinator of the research team on ‘The effects of marital instability on children’s well-being’ of the project ‘Economic Change, Quality of Life and Social Cohesion’ (EQUALSOC) financed under the European Union’s Sixth Framework Programme (2005–10).

Marco Gießelmann studied Sociology and Research Methods at the Universities of Bielefeld and Essex and holds a Diploma in Sociology from the University of Bielefeld. Currently he is a Researcher at the Chair for Empirical Social and Economic Research at the University of Cologne and is preparing a PhD thesis on the working poor phenomenon in Germany and Great Britain.

Heikki Hiilamo has received a PhD from the University of Turku in Social Policy and from the University of Tampere in Public Health. He specializes in family policy and poverty issues, and works as a director at the Diaconia University of Applied Sciences in Finland. His recent publications include studies on Nordic family policy and measurement of poverty.

Dina Hummelsheim studied Sociology as well as German and Dutch Studies at the Universities of Cologne and Ghent. She recently finished her PhD in Sociology at the University of Cologne. Her dissertation focuses on the
impact of family policies and culture on maternal employment in Belgium and West and East Germany. At present she works as a Researcher at the Max Planck Institute for Foreign and International Criminal Law in Freiburg.

M. Azhar Hussain obtained his PhD in Economics from the Aarhus School of Business in 2002. Currently he is an Assistant Research Professor at the Department of Economics of the University of Copenhagen. His main research interests include income distribution analysis (inequality, poverty, polarization and deprivation), comparative welfare state studies, and econometric methods. He teaches quantitative methods.

Olli Kangas is currently Research Director at the Social Insurance Institution of Finland. He defended his PhD at the University of Helsinki 1991, was nominated as a Visiting Research Fellow at the Swedish Institute for Social Research in Stockholm and appointed as Professor of Social Policy at the University of Turku 1994. From 2004 to 2007 he was Research Professor at the Danish National Institute for Social Research in Copenhagen. His main interest is in causes and consequences of social institutions and comparative methods.

Stefano Mazzuco is Assistant Professor of Social Statistics at the Faculty of Statistical Sciences of the University of Padova. He graduated from the University of Padova in 2003, where he obtained his PhD in Statistics Applied to Economics and Social Sciences. His main research interests cover family formation and dissolution, poverty and social exclusion, and longitudinal analysis. He is currently involved in a research project on health inequalities in European Community countries.

Letizia Mencarini, PhD, is Associate Professor of Demography at the Political Science Faculty of the University of Turin and she is an associate of the DONDENA Centre for Research on Social Dynamics at Bocconi University in Milan. Her research interests include poverty and demographic dynamics (fertility and migration) both in developed and developing countries, life cycle and family formation, time use and gender issues. She has been involved in a range of national and international research projects and has been published widely in demography, social policy and gender studies.

Dimitri Mortelmans, PhD, is Associate Professor in Sociology at the Faculty of Political and Social Sciences of the University of Antwerp. He teaches Qualitative Research Methods and Applied Multivariate Statistics. He is head of the Research Centre for Longitudinal and Life Course Studies (CELLO). His principal research interest lies in the sociology
of family and labour. His main research topics cover divorce, work–life balance and career patterns.

Peter Raeymaeckers has a Master’s degree in Political and Social Sciences at the University of Antwerp (2005). Since October 2006 he has been working at OASES (Research Centre on Inequality, Poverty, Social Exclusion and the City). His main topics of research concern the measurement of multidimensional poverty in the European Union.

Wendy Sigle-Rushton obtained a PhD in Economics from Brown University in 1998 and is currently a Senior Lecturer in Social Policy at the London School of Economics. She is also affiliated with the Economic and Social Research Council’s (ESRC’s) Centre for the Analysis of Social Exclusion. Her research interests include a broad range of issues related to family, gender, social change, and complex inequalities. Recent publications have examined the associations between childhood circumstances and subsequent disadvantage.

Laurent Snoeckx studied Political and Social Sciences at the University of Antwerp. Since September 2005 he has been working on a PhD at the Department of Sociology’s Research Centre for Longitudinal and Life Course Studies (CELLO) at the University of Antwerp. His main topics of research cover determinants and consequences of partnership dissolution.

Haya Stier received her PhD in Sociology from the University of Chicago in 1990, and her BA and MA degrees in Sociology from Tel Aviv University. She is currently an Associate Professor at the Department of Labour Studies and the Department of Sociology at Tel Aviv University. Haya Stier’s research interests include issues of work, gender and the family, poverty and inequality. In her current research she is focusing on the effect of institutional arrangements on women’s work patterns, the organization of households, and their economic consequences, in a comparative framework.

Haris Symeonidou received her PhD from the University of London and is currently Research Director in the Greek National Centre of Social Research. As a demographer with a background in economics, she is a member of the board of directors of the Greek Society of Demographic Studies. She has published several books and articles in national and international journals in the areas of fertility patterns, women’s employment, family policy and social welfare. She was a visiting Professor in the Department of European Studies of the Université Sorbonne-Nouvelle (Paris III) and a former member of the European Union Network on
Women’s Employment and of the European Observatory on National Family Policies.

**Wilfred Uunk** is Assistant Professor in Sociology at Tilburg University. He received his doctoral degree in 1996 from the Department of Sociology at the University of Nijmegen with a dissertation on ‘Who marries whom? The role of social origin, education and high culture in mate selection of industrial countries during the twentieth century’. His research interests are social inequality, marriage and the family, ethnic minorities, cross-comparative research, and longitudinal analyses.

**Maike van Damme** is a PhD student in Sociology at Tilburg University. Her dissertation concerns the influence of institutions on the economic consequences of divorce for women. She obtained her MSc in Sociology at Tilburg University in 2004 and subsequently worked at the Social and Cultural Planning Office (SCP) in the Hague. Her research interests include divorce, labour market, welfare state, poverty, and gender inequality.
